Hydromassage Bathtubs

Faster and Easier Global Certification

U.S. and Canadian Electrical Safety and Plumbing Codes

UL is your single source solution provider for testing and certification needs in both the U.S. and Canada.

Electrical Safety:

- CAN/CSA C22.2 No. 218.2 — Hydromassage Bathtub Appliances
- UL 1795 — Hydromassage Bathtubs

Plumbing Code:

- ASME A112.19.7-2012/CSA B45.10-12

Going Global?

Hydromassage Bathtub Certifications for CE and CB Scheme

- IEC 60335-1 and 60335-2-60

CE marking for Hydromassage Bathtubs

CE Marking is a European marking of conformity indicating that a product complies with the essential requirements of applicable European laws or directives regarding safety, health, environment, and consumer protection. A manufacturer is responsible for affixing the CE Marking to a product.

UL can assist you with CE Marking by:

- Providing guidance on how to apply the appropriate directives, including the steps leading up to affixing a CE Marking
- Compiling a CE technical file using information and data provided by you or UL

Product Engineering Services

UL's Product Engineering team has a rich heritage in advancing products from design to production for companies ranging from small to Fortune 500. These customer-centric testing and integrated advisory services help manufacturers meet the complex challenges of today's competitive global market with services that streamline the product development, reliability, safety, energy efficiency and performance testing processes. Give your product the sustainable competitive advantage by partnering with UL.

CB Scheme

The CB Scheme is a vast international arrangement established by the International Electrotechnical Commission (IEC) for mutual acceptance of test reports among participating certification organizations in the field of electrical and electronic equipment.

The CB Scheme benefits product manufacturers and distributors engaged in international trade by providing:

- A single point of product testing for efficient global market access
- Global acceptance of test reports leading to national certification in CB Scheme member countries
- Unilateral acceptance of test reports in many developing countries that are not yet participating in the CB Scheme
- The CB Scheme is an international network of product certification organizations in more than 50 countries around the world.

Total Solutions

Whether you're interested in one country or multiple markets across the world, UL takes an integrated and customized service approach to meet all of your product compliance needs. UL's global service package provides the complete compliance solution spanning the entire process and across multiple regulations. UL's flexible services can show proof of certification through many different services: the D-Mark, a Certificate of Conformance, Test Report Form (TRF), publication of your certifications through our Online Directory, and a traditional UL Report. We listen to our customers and customize solutions based on their needs. One project with a single test plan can provide your product with UL, cUL, D-Mark Marks along with Certification to multiple countries for:

- Safety
- Energy Efficiency
- Performance
- Reliability and more...
