

SPOT – Sustainable Product Database

Identify and select sustainable products for your green building projects with ease.

When it comes to selecting the best products for your green building projects, finding complete, credible information can be challenging and time consuming. UL SPOT is a new, trusted resource for comprehensive information on a product's attributes from sustainability to performance, safety and even manufacturers' technical specifications.

What is SPOT?

SPOT is an online product database that contains more than 45,000 products searchable by Master Format number, manufacturer, certification programs such as UL GREENGUARD and ECOLOGO Certification, or sustainable building credits in green rating systems such as the US Green Building Council's LEED program, Green Globes, WELL Building and others. SPOT can help design professionals identify sustainable products for green buildings during the design and specification phases.

Benefits of a SPOT Account

When you create a SPOT account, you gain access to special features that make it easier for you to identify and access products and information for your design and building projects. Your SPOT account includes these key features:

- Save product searches to quickly find products
- Product tagging so you can save custom notes about products
- Identify products that earn credits toward green building rating systems like LEED, Green Globes and WELL Building
- Bookmark products to return to them quickly
- Access to updates about SPOT features and news

SPOT Add-In for AutoDesk® Revit®

The first of its kind, UL's SPOT add-in for Revit is now available to download from ul.com/spot. This application enables you to access product data from SPOT and assign it directly to your project in the Building Information Modeling (BIM) work flows. This gives you a quick and easy way to insert credible green product information directly into your Revit project, while improving accuracy in reporting to the major global green building rating schemes. When you download SPOT for Revit, you will have access to a UL SPOT Tag enhanced keyword search, and Material Take Off directly in the application.

Here are just a few of the many benefits of using SPOT Add-in for Revit:

- Make more informed product decisions with complete information at your fingertips
- Access a credible, trusted source of information
- Streamline specification by entering products instantly into BIM work ow
- Ensure ease and accuracy of reporting for green building rating systems

Rely on SPOT to get the product information you need and make specifying products for your green building projects a whole lot easier.

How to Get Started
