

DRINKING WATER PRODUCT CERTIFICATION

Delivering Value to the Water Treatment Chemical Industry

When choosing a certifier for drinking water treatment chemicals, make UL your one-stop provider for the recognition, technical expertise and customer service that come only from the global leader in product certification.

UL's water products certification program — expertise you can count on

You want to have confidence that your product certification is handled accurately and efficiently. With UL, you have:

- A dedicated team of toxicologists, engineers and chemists specializing in water product certification who have the knowledge and experience to thoroughly and accurately certify your product. The UL team has more than 400 combined years of experience in testing to the ANSI/NSF Standards.
- Water product team members who actively participate in numerous national water product standard committees and industry technical task groups to make sure they understand the letter and spirit of the requirements applied to your products.
- A national team of experts in place to support you with the needs of the regulatory community ... available at no charge to regulators or customers.
- A council of experts in environmental and public health representing local, state and federal governments, as well as academic institutions, from around the world that supports and provides oversight for UL's water programs.

Only UL has the expertise, breadth and track record to keep your business ahead of the curve, enabling your new products, technologies and services to safely enter the global marketplace.

ANSI/NSF Standard 60 certification

UL provides the expertise and quality services you need to meet the requirements of ANSI/NSF Standard 60. Our comprehensive compliance services cover the following product categories:

- Coagulation and flocculation
- Corrosion and scale control
- Disinfection and oxidation
- pH adjustment
- Precipitation
- Sequestering
- Softening

UL's certification program to ANSI/NSF Standard 60 incorporates the use of ANSI/NSF Standard 223 for the surveillance of ANSI/NSF 60 certifications.

A complete solution for your certification needs

- Easy, step-by-step process — utilizing existing test results and product data — to transfer your current water treatment chemical certifications to UL.
- Comprehensive follow-up program supported by a global network of technical professionals to assess ongoing product compliance, giving you confidence that your products continue to meet the requirements established by your customers.
- Information about your certified products in online, searchable certification directories that make it easy for buyers and specifiers to identify compliant products and source your products.

Return on your certification investment

- Ongoing compliance assessments create a level playing field to make sure that only those who have earned the UL Mark benefit from using it.
- Globally respected program to prevent counterfeiting of the UL Mark built on long-term relationships with U.S. Immigration and Customs Enforcement and the Royal Canadian Mounted Police.

Take advantage of the strength of the UL brand

Choosing to work with UL communicates to your customers your commitment to the highest levels of quality and safety and leverages your product in the marketplace:

- Unique marketing advantage afforded by the high level of recognition of the UL Mark by U.S. consumers and demand drivers in the supply chain. The UL Mark appears on more than 20 billion products in the marketplace and on an average of 125 products in the typical home.
- Ability to promote your UL certification to differentiate your products from those that can't pass the UL test.
- With trained experts, unmatched standards development experience and more than 100 years of history, no one knows safety like UL.
- UL's relentless dedication to safety means "UL-certified" is trusted by consumers, businesses and governments the world over.

With UL, you have a single resource for all of your product certifications and follow-up requirements.
