The bottom line for property owners and operators

UL offers prompt reactive services to building engineers, owners and managers to quickly identify and resolve indoor environmental disruptions.

- Pandemic response services
- HVAC inspections
- Noise surveys
- Legionella testing
- Mold and moisture inspections
- Post flood inspections
- Mold clearance inspections
- Post remediation inspections
- Focused air quality inspections
- Odor inspections
- Drinking water testing

UL technicians perform mold, air quality and water quality inspections to quickly resolve indoor environmental concerns.
