

Kick start your sustainability
program with 360 Sustainability
Essentials

Empowering Trust[®]

Everything you need, nothing you don't

Designing a sustainability program from scratch can be challenging for businesses of all sizes. If you're not sure where to begin, let us help.

Rated #1 by Verdantix¹, our award winning investment grade sustainability data management system is available as an out-of-the-box solution. We've answered the tough questions for you so that you can hit the ground running. 360 Sustainability Essentials includes everything you need to report to CDP, GRI and SASB while empowering you to focus on performance improvement.

Collect

Gather data from across your organization on the most common KPIs

Calculate

Track your emissions against our standard library of factor sets. Inbuilt automated calculations for intensity factors and other standard metrics such as lost time incident frequency rate, % of male/female employees.

Review

Review data trends in easy to share reports and dashboards

Manage and improve performance

Set actions to manage follow up. Add ons available for managing targets and initiatives.

Our solution

360 Sustainability Essentials makes it easy to collect reliable data across your whole organization, whether you collect data centrally or delegate it worldwide. Designed as an easy to deploy, low cost model of our award-winning software suite, we include everything you need for GRI and CDP reporting. 360 Sustainability - Essentials gives you the starting points needed to run a successful sustainability program without the guess work.

Key benefits

Corporate Responsibility is about more than collecting and holding data, it's about sharing it with your stakeholders in a transparent manner. We take our clients beyond the first hurdle of data collection and give them tools to support their (award winning) reporting:

- Deploys quickly to use right away
- Saves time through automated data chasing, status reports and templated reports
- Reduces mistakes by automated quality checks and calculations
- Increases transparency with comprehensive audit trails
- Focuses you on program improvements instead of data headaches
- Allows you to easily spot your best and worst performing locations to course correct and share lessons learned
- Uses a highly scalable model to easily expand as your business grows so your admins can add extra locations, users and reports
- UL's advisory team can provide advice on specific topics, or act as an ongoing extension of your team via our dedicated consultancy service

A closer look at 360 Sustainability Essentials
