

# PureOHS™ Surveillance Module

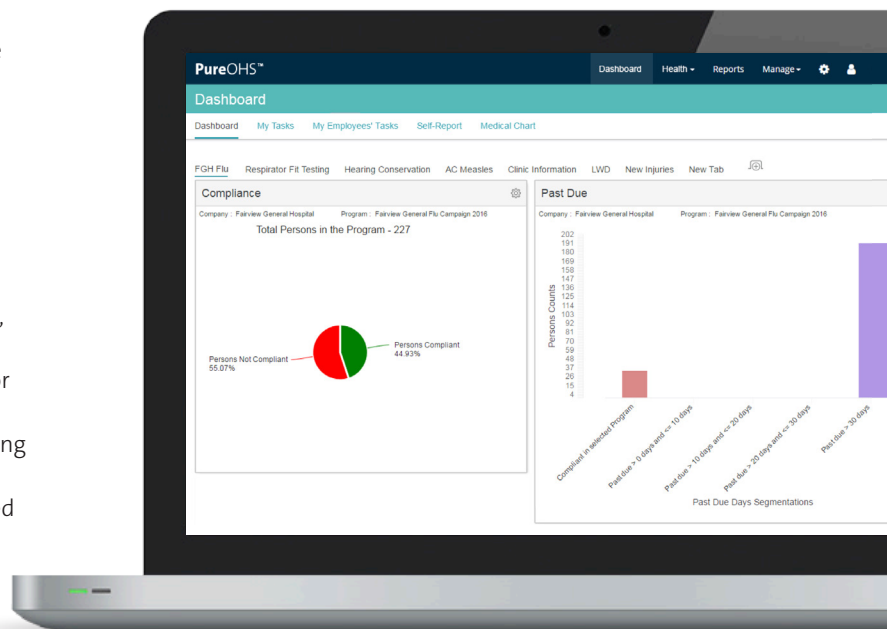

PureOHS™ Surveillance is UL's solution helping to make medical compliance management easy. Whether you're a manufacturer, a healthcare facility, a municipality, or any other organization that is struggling to track your employees' compliance with OSHA, CDC or internal regulations, PureOHS can help. At-a-glance reports allow you to see the compliance rates of your most complicated surveillance programs, quickly understand which employees are in and out of compliance, and take action to fill the gaps.

PureOHS is a web-based system that helps companies track employee's compliance with any medical surveillance program, including respirator fit testing, DOT physicals, immunizations and many others.

## Key benefits

- Customized dashboard tailored for your specific reporting needs
- Filters that provide current status across the company, by department, or supervisor
- Email reminders for upcoming tests or notifications for past due employees
- Simplified encounters log for easy viewing and reporting
- Event management for rapid entry of encounters
- Configurable encounter screens to support streamlined workflow and electronic signatures

*As a web-based system, it is available on any device, including iPads and other tablets. Installation is simply opening the browser on the device and logging into the application. No IT support is necessary and you can use PureOHS from anywhere with an internet connection.*
