PureOHS™ Essentials

PureOHS Essentials is a rapidly deployable, highly effective instance of our trusted PureOHS software solution to better manage employee health activities and compliance efforts. You can be up and running in just a matter of days to track your employee encounters, their work statuses and surveillances for compliance.

Advantages:

- View real-time compliance statuses
- Eliminate paper recordkeeping
- Avoid regulatory fines
- Track and manage occupational health and safety (OHS) related costs
- Simplify data transfer
- Increase environment, health and safety (EHS) data transparency at all levels
- Remind employees of past-due activities
- Use data to make more informed decisions that help deliver better employee health and safety results

PureOHS Essentials at a glance

PureOHS Essentials is a rapidly deployable, highly effective instance of our trusted PureOHS software solution to better manage employee health activities and compliance efforts. You can be up and running in just a matter of days to track your employee encounters, their work statuses and surveillances for compliance.

"We have used UL EHS software solutions for many years to manage our municipality's employee health and safety programs. In particular, we have found UL's cloud-based software tools to be highly effective for managing our medical surveillance, compliance and return-to-work programs. UL's cloud-based offering is quick to set up and makes it easy to manage and track our ongoing employee health and safety programs."

— Scott Kalis, occupational safety and health services manager, City of Virginia Beach

Time is valuable to every organization. Many organizations spend an inordinate amount of time keeping track of employee health and safety. But without a standardized approach or a central repository to access the information they need, it's challenging to make informed decisions. The unintended consequences are fragmented processes and poor risk identification that could lead to more employee injuries, illnesses or worse — unreported events. This drives the need for technology that can be deployed and used quickly and effectively rather than complicated systems with higher costs and long implementation times.

Some organizations are not ready for the investment and effort required by large complex applications. With PureOHS Essentials, we solved this challenge by taking the power of our enterprise PureOHS employee health and safety solution and making it affordable and available to organizations that need it now. PureOHS Essentials is a self-service software application that allows you to manage critical employee health programs with one thing in mind: returning your staff to work as quickly and safely as possible. With our predefined templates, you can immediately start tracking and reporting on key surveillance programs, such as:

- Respirator fit tests
- Hearing conservation
- Influenza vaccination
- Specific COVID-19 encounter information
- Return to work timeframes

Injury management:

Simplify the process of managing employees returning to work after an injury or illness, and easily identify who is unable to work, on restricted duty or has been exposed to an illness.

- Work status tracking (illnesses and injuries)
- Return-to-work process management
- Encounters

Surveillance testing management:

Automatically track which employees are due for important medical testing and screenings, and enable automatic upcoming and past due notifications to help boost compliance. Medical test management includes:

- Tuberculosis
- Hepatitis B
- Influenza
- Respirator fit tests
- Bloodborne pathogens training
- Hazard communication training

Dashboards:

Every time you open PureOHS Essentials, a visual dashboard displays real-time status updates of all your programs. Managers have access to reports to view compliance rates of your surveillance programs and worker health status. Quickly see which employees are in and out of compliance so you can take action to fill gaps.

Preconfigured set up and implementation

PureOHS Essentials does not require involvement from IT staff and comes preconfigured with the most critical surveillance programs. PureOHS Essentials comes with out-of-the-box forms and processes, built by ourtrusted team of health and safety experts, so you can immediately begin managing the health and safety of your employees.

Mobile & secure

Accessible anywhere with an internet connection, PureOHS Essentials is designed to work on any device and meet or exceed existing security standards, including the Health Insurance Portability and Accountability Act (HIPAA).
