

Safe Return to the Workspace course suite: Buildings

This course suite was built specifically to provide important information for organizations to prepare their buildings for return to work following a prolonged absence. The suite contains a series of engaging microlearning courses, containing important information from UL subject matter experts.

Preparing Building for Occupancy Following a Prolonged Shutdown course suite:

This series of microlearning courses describe the process for preparing buildings for occupants following a prolonged shutdown such as an environmental disaster, pandemic, or other catastrophic event. This series covers heating, ventilation and air conditioning (HVAC) system review, sanitation/janitorial best practices, water systems evaluations and items to look for during a walk-through of a building following a prolonged shutdown. This course suite is ideal for employers and employees responsible for ensuring employee safe return to buildings following a prolonged shutdown.

Microlearning courses in suite:

- **Preparing Buildings for Occupancy Following a Prolonged Shutdown: HVAC (5 minutes)**

This course describes the process for preparing buildings for occupants following a prolonged shutdown such as an environmental disaster, pandemic or other catastrophic event. This course specifically looks at HVAC systems and explains what to evaluate to help make the building safe for occupants. After successfully completing this course, learners should be able to recognize how to evaluate a building's HVAC system to prepare for occupancy following a prolonged shutdown.

- **Preparing Buildings for Occupancy Following a Prolonged Shutdown: Sanitation/Janitorial (7 minutes)**

This course describes the process for preparing buildings for occupants following a prolonged shutdown such as an environmental disaster, pandemic or other catastrophic event. This course specifically looks at the sanitation/janitorial systems and explains what to evaluate in order to help make the building safe for occupants. After successfully completing this course, learners should be able to recognize how to evaluate a building's sanitation/janitorial systems to prepare for occupancy following a prolonged shutdown.

- **Preparing Buildings for Occupancy Following a Prolonged Shutdown: Water Systems (6 minutes)**

This course describes the process for preparing buildings for occupants following a prolonged shutdown such as an environmental disaster, pandemic or other catastrophic event. This course specifically looks at the water systems and explains what to evaluate in order to help make the building safe for occupants. After successfully completing this course, learners should be able to recognize how to evaluate a building's water systems to prepare for occupancy following a prolonged shutdown.

- **Preparing Buildings for Occupancy Following a Prolonged Shutdown: Walk-Through of Buildings (4 minutes)**

This course describes the process for preparing buildings for occupants following a prolonged shutdown such as an environmental disaster, pandemic or other catastrophic event. This course specifically looks at the process of walking through a building to make it safe for occupancy. After successfully completing this course, learners should be able to recognize how to perform a walk-through of a building to help make it safe for occupancy.
