

UL360 Task Force on Climate- Related Financial Disclosures (TCFD) Assessment

Fast-track your reporting

Aligning your reporting to the TCFD helps fulfill investor and stakeholder demands. However, gathering together the data and analysing it takes expertise. The UL 360 advisory team can put together a successful program of data collection, analysis and reporting for you.

The TCFD was established in 2015 to develop consistent climate-related financial risk disclosures for use by companies, banks and investors in providing information to stakeholders. More than 1,500 organizations have expressed their support for TCFD recommendations, increasing more than 85% since 2019.

The framework consists of 11 recommended disclosures split into four core areas:

Source: www.fsb-tcfid.org

Governance

The organization's governance around climate-related risks and opportunities

Strategy

The actual and potential impacts of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning

Risk Management

The process used by the organization to identify, assess, and manage climate-related risks

Metrics and Targets

The metrics and targets used to assess and manage relevant climate-related risks and opportunities

Each of the elements shown above is designed to improve the clarity, consistency and reliability of climate-related disclosures.

The benefits of TCFD disclosure

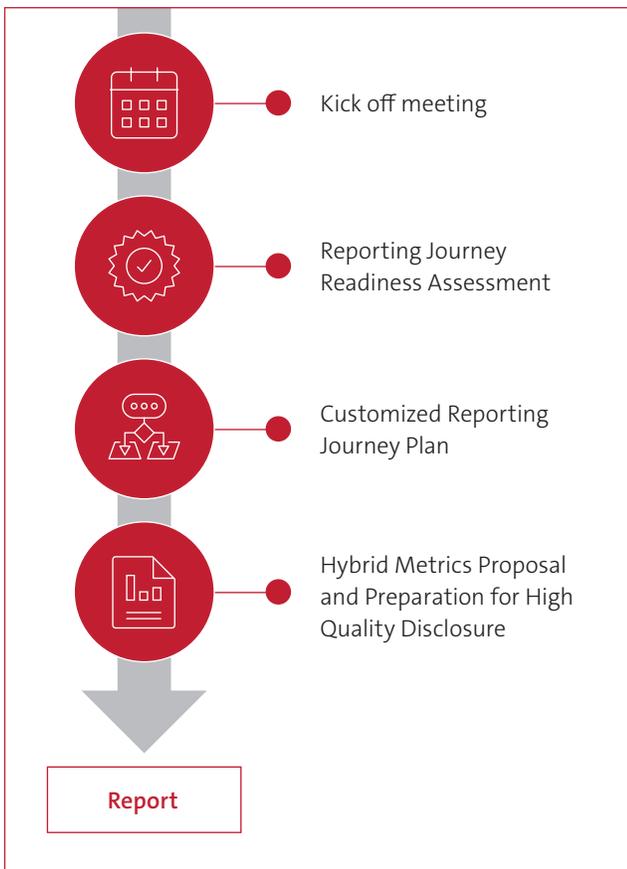

Despite the investment that TCFD reporting takes, the results bring many benefits to your business. Climate-related risk assessment drives efficiencies, better-informed decision-making, cost savings and, perhaps most importantly, investor confidence in your organization.

How UL 360 can help

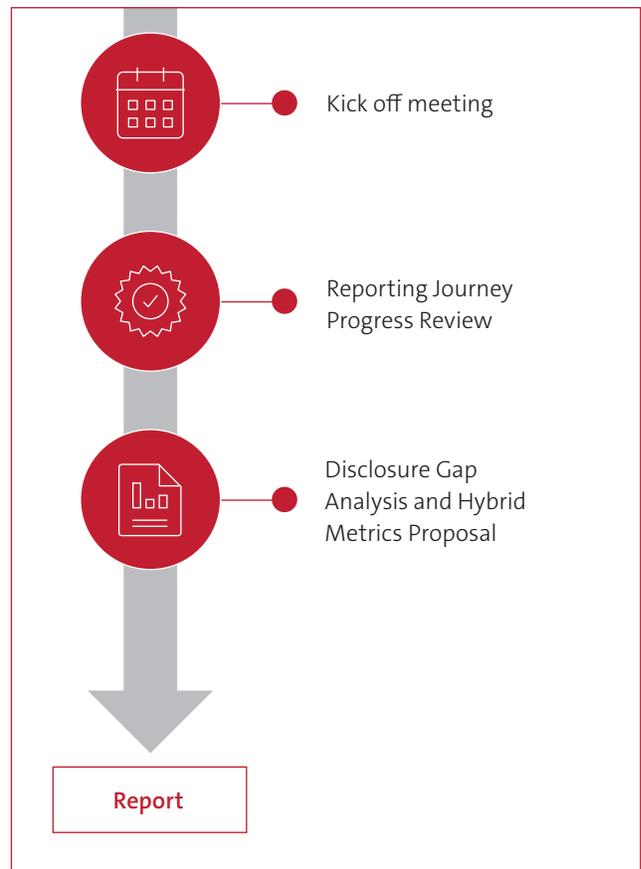

The UL 360 TCFD Assessment Advisory Service helps organizations align their carbon reporting with the TCFD framework, improving the quality of climate-related financial disclosures by:

- **Assessing** your readiness to disclose or reporting on your progress so far
- **Strengthening your understanding** of enabling factors for disclosure
- **Proposing bespoke metrics** to effectively track and report on your progress towards a low-carbon economy
