5 facts about virtual functional safety training

UL is one of the industry leaders for virtual training solutions. Let’s look at a few reasons why.

**Global gains**
We’ve rolled out our functional safety courses to more countries, in more languages, covering more topics.

**Planet plus**
With no commuting and digital-only materials, UL’s e-learning has a much smaller carbon footprint than in-person training.

**Safety specialists**
UL is a leader in functional safety training across a wide range of industries, driven by experts in innovative training strategies.

**Synchronous support**
Our training is available in a real-time format to create an engaging environment with open dialogue and live Q&A.

**Customer centricity**
UL collaborates with customers to provide training that suits their business needs, from certification to ISO 26262 and beyond.
