

# UL's Life Sciences Online Content and Custom Course Development

**Comprehensive, flexible solutions to meet  
your specific learning needs**

**Empowering Trust<sup>®</sup>**

**Your priority is to give your employees the skills and knowledge they need to be productive and successful on the job. UL is ready to help deliver the personalized content and custom learning solutions your organization needs, from compliance-based life sciences training to health and safety best practices and more.**

UL's learning solutions help you meet your learning needs with our extensive, up-to-date library of hundreds of online courses. Select courses from our catalogs, customize existing courseware or let us create the content you need.

UL's team of subject matter experts and adult learning specialists create our courses. They specialize in subject matter research and instruction, stay on top of regulatory changes, and build and update online courses applicable to the life sciences industries. Our course library includes titles in a wide variety of languages so you can ensure that your employees all around the world receive a consistent foundation of knowledge.

- Employees can access and manage their training courses 24/7 from virtually any internet-connected device.
- Fully customizable courses feature engaging content and activities to resonate with employees' experiences, reinforce lessons and optimize learning.
- UL's courses are SCORM- and AICC-conformant.

## Extensive regulatory content catalogs

Life sciences companies' regulatory obligations demand a particular set of learning requirements. From pharmaceuticals, medical devices and biologics to data integrity and ethics, our team of life sciences professionals will help ensure that your courseware content is up to date and addresses your learners' needs. UL's catalogs include:

- Pharmaceutical Good Manufacturing Practices (GMPs)
- Pharmaceutical Clinical
- Pharmaceutical — Sales and Marketing
- FDA Inspections and Enforcement
- HR Compliance and Risk Management
- Ethics and Corporate Responsibility
- Medical Device GMPs
- Medical Device Clinical
- Medical Device — Sales and Marketing
- Global Regulatory
- Data Integrity
- Environment, Health and Safety (EHS) for Life Sciences

## Co-authored courses by the U.S. FDA

Under a co-development agreement, UL works cooperatively with the U.S. Food and Drug Administration (FDA). The content produced through this collaboration empowers UL's pharmaceutical, biologics and medical device customers with the same information, level of preparedness and learning the FDA relies on. In addition to the FDA's content, we provide standardized courses on issues regulated by federal agencies, including the International Conference on Harmonization (ICH), Centers for Medicare and Medicaid Services (CMS) and the U.S. Department of Health and Human Services (HHS).

## UL Create™

UL offers our courses in an editable format to customers who want to modify the content themselves. Using our Create™ editing and authoring tool, you can:

- Customize a course's logo, text, images and audio
- Develop your own custom content
- Leverage UL's team to build content that you can maintain moving forward

## Put UL's learning professionals to work for you

One of your organization's greatest competitive advantages is your processes, systems and procedures.

To capture this knowledge and make it available to employees and outside vendors, companies are packaging their critical procedures and processes into online courses. The challenge: To be effective, companies must design their online courses to maximize information retention based on proven principles.

That is why hundreds of companies have partnered with UL for customized content.

## Let UL's team of subject matter experts create engaging courses that help address your regulatory and performance-based training needs.

- Critical organizational knowledge in a graphic-rich, interactive format
- Mobile-ready player
- Developed using proven adult learning principles to ensure behavior change

## Courses can reside on our ComplianceWire® learning management system (LMS) or yours

ComplianceWire® can host custom courses, or we can package them as SCORM-compliant courses and deliver them to you for hosting on your LMS.

### Choose your course customization level

Our team provides a range of customization options based on your budget and the risks associated with the subject you've targeted.

### Develop a course from existing materials

We'll work with your existing files to develop a course that contains the proper instructional strategy based on the knowledge you want to present (e.g., facts, concepts, principles, problem-solving). The course will build on your existing content to deliver engaging animations and graphics as well as high levels of interactivity to make the material more relevant to the learner.

### Customize one of our standard courses

Choose a course from among UL's standard options and add your branding and unique content.

### Develop a course using new content

Our team can work with your subject matter experts or provide more industry experts to help you pull together the training content you need to educate employees and third parties.

### Maximize your training results with:

- New courses on any topic
- Customized off-the-shelf training
- Performance support materials
- Online learning for legacy classroom topics
- Microlearning courses
- Mobile learning solutions

### Accommodate global learners

Our team provides translation with localization for our global customers' customized course content on a per-project basis. Each professional linguist is a native speaker of the target language experienced in adapting similar material from English.

We deliver these courses to you via our multilingual capability. Assign once and deliver to all language audiences.

# About UL's ComplianceWire®

ComplianceWire® is an industry-leading compliance training Learning Management System (LMS) designed specifically for highly regulated industries. Our team designed the platform to effectively and efficiently automate the creation, delivery and reporting of role-based training, qualification and compliance programs for the life sciences industry.

U.S. and global pharmaceutical, medical device and biologics companies as well as global regulatory authorities in the United States, China and India use this time-tested technology extensively.

UL is a premier global independent safety science company that champions progress. UL's mission of working for a safer world guides more than 14,000 professionals.
