Overview

UL Solutions EHS Learning Solutions has partnered with clients in a variety of industries for over 20 years to provide training and services to build strong learning programs. UL Solutions courses are created by our own team of subject matter experts, certified safety professionals and degreed adult learning specialists. Their focus is on thorough subject matter research and instruction, staying ahead of changing regulatory standards and trending industry practices, all while building and updating online courses applicable to leading industries. The EHS course catalog also includes globally relevant topics in a variety of languages so you can ensure your employees all around the world receive a consistent foundation of knowledge. Should your organization have unique training requirements, you can rely on our Learning Solutions team, which develops thousands of courses each year for our clients. Our team shares best practices as it relates to instructional design and multi-media, such as incorporating your organization's unique content and branding into our standard courses or new custom courses. Courses are accessible on tablets and other mobile devices and can be translated into almost any language. Courses can be hosted independently on your own LMS, or you can take advantage of UL Solutions' industry standard LMS offerings. Learn more about UL Solutions courses and additional solutions at www.ul.com/solutions
15-Passenger Van Safety

Driving a van is not like driving a car. 15-passenger vans are more susceptible to rollovers, blind spots, weight distribution issues and special handling requirements. Take this course to learn the things you need to know about driving a 15-passenger van so you can prevent avoidable collisions and injuries. Make sure you and your passengers reach your destination. Ideal learners are 15-passenger van drivers.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Driver and Transportation Safety

Course Objectives:
- Recognize the difference between driving a 15-passenger van and a car
- Recall the best way to load a 15-passenger van
- Describe how to adjust your driving to account for the differences between cars and 15-passenger vans
- Recall potentially hazardous conditions when driving a van and how to adjust your driving to account for them

Runtime: 16

Access to Medical and Exposure Records for Employees (US)

The law requires your employer to provide you with access to your medical and exposure records. Why should you care? How do you get access? Take this course to find out! This course is ideal for all employees.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Employment Liability, Chemicals, Substances and Hazard Communication, Wind Turbine, Awareness and Microlearning

Course Objectives:
- Why medical and exposure records are useful
- How to access records
- Your rights regarding records and access

Runtime: 5

Access to Medical and Exposure Records for Managers (US)

Federal law provides employees with the basic right to know the extent and consequences of their exposure to the harmful substances with which they work. They are entitled to access to all the medical and exposure records generated for them while working for a given employer. Take this course to learn about employee rights, how to provide access to records and what information is exempt from employee access. This course is ideal for supervisors and other employees who receive and process record requests in the United States.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Employment Liability, Chemicals, Substances and Hazard Communication

Content Suite:
- OSHA 30: Construction Outreach Training Course (ACET CEU-3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (ACET CEU-3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
- Know what is included in each of the three types of records: medical, exposure and record analyses
- Recall employer requirements for retaining records and informing employees
- Know how to provide employees with access to records
- Know how to provide medical and exposure information when there are no records available
- Recall how to handle trade secrets in records

Runtime: 14
Breakdowns and accidents are unplanned events. You never know if, when, where, or how they will happen. But every time you get behind the wheel, you need to be prepared for the worst. The purpose of this course is to make you more prepared in the event of an accident or breakdown.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Driver and Transportation Safety
- General Industry and Manufacturing

**Content Suite:**
- Commercial Drivers Suite (IACET CEU=0.4) [BDL-12055]

**Course Objectives:**
- Distinguish between accidents and incidents
- Assemble and use an incident response kit
- Recognize the importance of complying with company procedures
- Protect the accident or breakdown area to prevent further incidents
- Describe what to do immediately following an accident

**Runtime:** 18

---

**Active Shooter: Law Enforcement**

When an active shooter is in a workplace, people depend on law enforcement to stop the threat. Take this course to learn what to expect from law enforcement officers and what YOU can do to ensure they can do their jobs. This course is ideal for all employees.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Employment Liability
- Ergonomics and Office Safety
- Workplace Violence and Harassment
- Health and Safety Management

**Content Suite:**
- Active Shooter: Preparation and Response Suite (IACET CEU=0.1) [BDL-12086]
- Active Shooter: Preparation and Response Suite [PS5-30011]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

**Course Objectives:**
- Know how to respond to law enforcement officers at an active shooting scene

**Runtime:** 8
Active Shooter: Prevention and Preparation

Sadly, we have all seen news reports about people who have entered a place of business or school and started shooting others. Do you know the signs that someone may become violent? Do you have a plan in case there is a shooting at your workplace? Take this course to learn how to prevent and prepare for active shooters. This course is ideal for all employees.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Employment Liability
- Ergonomics and Office Safety
- Workplace Violence and Harassment

Content Suite:
- Active Shooter: Preparation and Response Suite (IACET CEU=0.1) [BDL-12086]
- Active Shooter: Preparation and Response Suite (PS5-30011)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Recognize the warning signs that someone may be prone to violence; identify what you can do NOW to prepare for an incident involving an active shooter

Runtime: 10

Active Shooter: Run, Hide, Fight

If an active shooter came into YOUR workplace, would you know what to do to survive? Take this course to learn how to make life-or-death decisions about running, hiding or fighting to survive. This course is ideal for all employees.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Employment Liability
- Ergonomics and Office Safety
- Workplace Violence and Harassment

Content Suite:
- Active Shooter: Preparation and Response Suite (IACET CEU=0.1) [BDL-12086]
- Active Shooter: Preparation and Response Suite (PS5-30011)
- Working from Home Suite [BDL-12127]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Decide what to do during an active shooter incident

Runtime: 17
Active Shooter: Victims

If there is an active shooter in your workplace, emergency response professionals may not be able to get to victims immediately. In these cases, you may be able to help keep people alive until help arrives. Take this course to learn what YOU can do! This course is ideal for all employees.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Employment Liability, Ergonomics and Office Safety, Workplace Violence and Harassment

Content Suite:
- Active Shooter: Preparation and Response Suite (IACET CEU=0.1) (BDL-12086)
- Active Shooter: Preparation and Response Suite (PS5-30011)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
Know how to assess and assist active shooter victims

Runtime: 9

Ammonia Awareness

Ammonia can cause blindness, lung damage and death, but the good news is you can control your exposure to it. Take this course to learn how to safely identify, store and handle ammonia. You will also learn what to do in the event of an ammonia exposure or leak. This course is ideal for anyone who works with or near ammonia.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing, Awareness and Microlearning, Chemicals, Substances and Hazard Communication

Course Objectives:
Recognize when ammonia may be present;Know the hazards associated with ammonia;Recall safe practices for handling and storing ammonia;Know what to do during emergencies involving ammonia

Runtime: 11
Applying Electrical Standards (US)

Electrical standards do not just help you comply with the law, they keep you safe! You are already familiar with electrical terms and hazards. Take this course to learn about NFPA 70E and what it means for you. Stay compliant and stay safe! Ideal learners are people in all industries, particularly supervisors, electrical workers and safety managers.

Format: eLearning - Claro

Libraries: • Safety Catalog

Topic/Industry: • General Safety and Manufacturing
• Health and Safety Management
• Wind Turbine
• Electrical and LOTO

Content Suite:
• NFPA 70E Suite (IACET CEU=0.1) (BDL-12129)

Course Objectives:
Recognize the consequences of not following electrical standards; Recall the OSHA and consensus standards that apply to electrical work; Identify NFPA 70E training requirements for qualified and unqualified workers; Use NFPA 70E tables to determine safe approach boundaries, PPE categories for specific tasks and required PPE

Runtime: 30

Arsenic Awareness (US)

OSHA requires inorganic arsenic training whenever employees are exposed to arsenic at or above a certain level. This course explains the possible health effects related to inorganic arsenic and how to reduce and/or eliminate the exposures that can lead to these health effects.

Format: eLearning - Claro

Libraries: • Safety Catalog

Topic/Industry: • General Safety and Manufacturing
• Awareness and Microlearning
• Chemicals, Substances and Hazard Communication

Course Objectives:
Recall the health hazards and permissible exposure limits of arsenic; Know what PPE to wear to protect against arsenic exposure; Define regulated area; Know how to stay safe from arsenic exposure through hygiene, engineering controls and medical surveillance

Runtime: 14
Asbestos Hazards Introduction (US)

This introductory course will provide Class III and Class IV asbestos workers with an introduction to a three-part series of courses that will teach asbestos hazards and applicable federal regulations for each asbestos work classification. This introductory course will demonstrate how to identify asbestos hazards as well as how to prevent and control asbestos exposure.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Construction
- Chemicals, Substances and Hazard Communication

Content Suite:
- Asbestos Awareness Intro, Parts 1-3 (IACET CEU=0.2) [BDL-12090]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- Asbestos Hazards Intro, Parts 1-3 (US) [PS5-00464]

Course Objectives:
Identify the three-part course structure and purpose
Recall asbestos work classifications
State the intended audience for this training

Runtime: 4

Asbestos Hazards Part 1 (US)

This is Part 1 and a continuation of Asbestos Hazards Introduction and will provide Class III and Class IV asbestos workers with the knowledge and skills necessary to identify asbestos hazards, the nature of operations that could result in exposure to asbestos, and the importance of necessary protective controls. This course describes the health effects of asbestos and where it is commonly found. In addition, workers will learn ways to prevent exposure and the importance of respiratory protection.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Construction
- Chemicals, Substances and Hazard Communication

Content Suite:
- Asbestos Awareness Intro, Parts 1-3 (IACET CEU=0.2) [BDL-12090]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- Asbestos Hazards Intro, Parts 1-3 (US) [PS5-00464]

Course Objectives:
Recognize asbestos
Identify where it is commonly found
Recognize operations that could result in asbestos exposure
Describe the potential health effects of exposure to asbestos
Cite common precautions and work practices that should be taken to avoid exposure

Runtime: 38
Asbestos Hazards Part 2 (US)

This is Part 2 of a three-part training course designed to provide Class III and Class IV asbestos workers with the knowledge and skills necessary to identify asbestos hazards, the nature of operations that could result in exposure to asbestos, and the importance of necessary protective controls. Part 2 will outline the precautionary measures to take to reduce or eliminate asbestos exposure.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Construction
- Chemicals, Substances and Hazard Communication

Content Suite:
- Asbestos Awareness Intro, Parts 1-3 (IACET CEU=0.2) [BDL-12090]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- Asbestos Hazards Intro, Parts 1-3 (US) [PS5-00464]

Course Objectives:
- Define the permissible exposure limit for asbestos
- Describe monitoring and medical surveillance programs relating to asbestos exposure
- Identify proper engineering controls and work practices to reduce asbestos exposure
- Identify appropriate personal protective equipment
- Describe response procedures for asbestos releases

Runtime: 28

Asbestos Hazards Part 3 (US)

This is Part 3 of a three-part training course designed to provide Class III and Class IV asbestos workers with the knowledge and skills necessary to identify asbestos hazards, the nature of operations that could result in exposure to asbestos, and the importance of necessary protective controls. Part 3 will provide an overview of various types of respirators, their limitations, and how to properly put on and take off a respirator.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Construction
- Chemicals, Substances and Hazard Communication

Content Suite:
- Asbestos Awareness Intro, Parts 1-3 (IACET CEU=0.2) [BDL-12090]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- Asbestos Hazards Intro, Parts 1-3 (US) [PS5-00464]

Course Objectives:
- Describe the basic requirements of the Respiratory Protection Standard
- Identify capabilities and limitations of SCBA, airline and air-purifying respirators
- Identify proper maintenance practices including inspecting, cleaning, and storing your respirator
- Recognize signs of respirator failure

Runtime: 19
Avoiding Rear-End Collisions - Large Vehicles (US)

Rear-end collisions can be very serious since the vehicle that is struck from behind is usually stopped or moving very slowly. The potential for catastrophe is even greater when the vehicle in motion is a large truck and the vehicle that is struck is a smaller vehicle such as an automobile. This course focuses on the common causes of rear-end collisions and what drivers of large vehicles can do to reduce the risk of being involved in such a collision.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Driver and Transportation Safety

Course Objectives:
List the six major factors that contribute to rear-end collisions;State what you can do to avoid colliding with a vehicle in front of you;Describe how you can reduce the risk of another vehicle colliding with yours from the rear

Runtime: 27

Avoiding Rear-End Collisions - Light Vehicles (US)

Rear-end collisions can be very serious since the vehicle that is struck from behind is usually stopped or moving very slowly while the other vehicle is in motion. The potential for catastrophe is amplified when the vehicle in motion is a van or truck and the vehicle that is struck is a smaller vehicle such as an automobile. This course focuses on the common causes of rear-end collisions and what drivers of light commercial vehicles can do to reduce their risk of being involved in such a collision.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Driver and Transportation Safety

Course Objectives:
List the six major factors that contribute to rear-end collisions;State what you can do to avoid colliding with a vehicle in front of you;Describe how you can reduce the risk of another vehicle colliding with yours from the rear

Runtime: 25

Back Injury Awareness

Back ailments are painful. They can be debilitating, and may prevent you from working and enjoying activities outside of work. This course will help you become aware of what you can do to prevent back injuries. Ideal learners include all employees.

Format: eLearning - Claro

Libraries: Safety Catalog

Course Objectives:
Recognize the risk factors that increase your chance of sustaining a back injury;Recall how poor posture can lead to back injuries;Identify the best ways to prevent a back injury;List the steps you should take if a back injury occurs in the workplace.

Runtime: 12
Basic Rigging Awareness

This basic rigging awareness module addresses the core elements that workers need to understand to conduct their rigging operations in a safe manner. Employers can use this course to ingrain fundamental terms and employee responsibilities. This course is an excellent tool for organizations who want to bolster or supplement their current rigging training program.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Construction
- Wind Turbine
- Awareness and Microlearning
- Crane and Rigging

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
Recognize how to inspect, care for and store rigging equipment; identify safe methods to prepare for a rigging job

Runtime: 9

Basic Rigging Principles Part 1 (US)

Rigging is a process used to secure materials to be moved by cranes, hoists or other lifting equipment. There are many factors to consider when applying slings and chains to secure a load. Improper rigging can lead to dropped loads and catastrophic failure of lifting equipment, which can cost lives. This course will describe rigging equipment and how to care for, inspect and store it.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Crane and Rigging

Content Suite:
- Basic Rigging Principles, Parts 1-2 (US) (PS5-00465)
- Crane Safety and Basic Rigging Training Suite (IACET CEU=0.3) [BDL-01232]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Recognize equipment used to rig loads; identify the function of different pieces of rigging equipment; recall how to inspect different pieces of rigging equipment; recall storage requirements for rigging equipment

Runtime: 43
Basic Rigging Principles Part 2 (US)

Rigging is a process used to secure materials to be moved by cranes, hoists or other lifting equipment. There are many factors to consider when applying slings and chains to secure a load. Improper rigging can lead to dropped loads and catastrophic failure of lifting equipment, which can cost lives. This course will cover the steps required to prepare for safe rigging.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Crane and Rigging

Content Suite:
- Basic Rigging Principles, Parts 1-2 (US) [PS5-00465]
- Crane Safety and Basic Rigging Training Suite (IACET CEU=0.3) [BDL-01232]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Recall the general safety rules to be observed while rigging; List the four steps required to plan a rigging job; Explain how to safely prepare for rigging; Recognize how to safely mount equipment on a load

Runtime: 20

Battery and Charger Safety (US)

Batteries provide electric power for equipment like forklifts, narrow-aisle trucks, airport vehicles, electric buses, autos and golf cars. When used properly, batteries are a safe and reliable source of power. As with any power source, there are some hazards. This lesson covers these hazards, including electrical shock, corrosive chemical exposure and battery handling.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Warehouse Safety
- Chemicals, Substances and Hazard Communication

Course Objectives:
How a battery and charger work; Battery handling, recharging, watering and cleaning; Personal safe practices; Acid spill clean-up; Simple exterior repair

Runtime: 20
Bench Grinder Safety

A jagged wheel fragment can fly fast enough to penetrate the soft tissue of your neck, eyes and face. Bench grinders are powerful tools that require precision and precaution. This course will explain the steps you must take to stay safe when working with these commonly used pieces of equipment. Ideal learners are maintenance employees in general industry, employees in the construction industry, and supervisors of those employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Tools

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
Recognize common causes of injury associated with bench grinders; Identify the main safety features of a bench grinder; Recall general precautions and tips for safe use; Order the steps to replace a grinding wheel

Runtime: 19

Benzene Safety (US)

Benzene is an aromatic hydrocarbon that is produced by the burning of natural products. It is found in gasoline and other fuels, and is used in the manufacture of plastics, detergents, pesticides and other chemicals. Benzene is a clear, colorless liquid with a pleasant, sweet odor. The odor of benzene does not provide adequate warning of its hazard. In fact, benzene can cause serious health problems that you must understand if you work with it. This module covers the hazards of benzene and how to work safely with benzene. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Course Objectives:
Know the effects of overexposure to benzene; Know how exposure to benzene can occur; Know how to reduce your risk of exposure; Know how to work safely with benzene; Know emergency and first-aid procedures in the event of exposure

Runtime: 16
If you work with biological materials, it is quite possible that you will produce hazardous waste. What types of hazardous waste might you produce? The obvious answer is biohazardous, or medical, waste. But if you are like a lot of people who work with biological materials, you may also work with or around other hazardous chemicals and radioactive materials, which wind up as waste too. Ideal learners are workers who may be exposed to biohazardous waste.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Laboratory Safety
- Chemicals, Substances and Hazard Communication

Content Suite:
- Laboratory Safety Training Suite (IACET CEU=0.3) [BDL-12030]

Course Objectives:
Give a definition of hazardous waste; Describe your role in the hazardous waste management process; Discuss strategies and practices for hazardous waste minimization; List three methods of hazardous waste disposal; State what to do in the event that you find an unknown waste

Runtime: 31

Blasting Area Awareness

Blasting areas can be dangerous. It's important that the people who work on sites that have blasting know the hazards, process and what to do in emergencies. This is an awareness course about the activities that occur in a blasting area. This course is not designed to qualify blasters or their crew. It is aimed at all personnel who might be at a site where blasting activities occur.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Recognize flyrock and other site hazards that are associated with blasting; Know what to expect during pre-blast review meetings; Recall precautions that reduce the safety risk associated with blasting areas; Identify when it is safe to re-enter a blasting site; Know what to do in emergencies involving blasting sites

Runtime: 21
Blocking and Cribbing

A lot of work requires the use of lifting tools such as hydraulic jacks, cranes and truck hoists. Because these lifting tools are used so frequently and are usually reliable, you may forget that any lifting tool can potentially fail. However, if you happened to be under a load during such a failure, chances are you would be injured or killed. That is why raised equipment must be properly blocked or cribbed. This course is designed to teach general blocking and cribbing safety principles and demonstrate how those principles are applied. This course is ideal for anyone who works with heavy equipment or who performs blocking and cribbing.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Construction
- Crane and Rigging

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
- Recognize the necessity for blocking and cribbing
- Know how to select safe materials and equipment for blocking and cribbing
- Identify general blocking and cribbing safety principles

Runtime: 13

Bloodborne Pathogens (BBP)

If your job duties include even occasional contact with blood or other infectious materials, you are at risk for contracting potentially deadly, incurable diseases. Take this course to learn what bloodborne pathogens are and how you can protect yourself from them. Ideal learners include anyone who may be exposed to blood or other potentially infectious materials, including healthcare workers, custodians, maintenance staff, research personnel and construction workers.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- First Aid, Health and Wellness
- Chemicals, Substances and Hazard Communication
- General Industry and Manufacturing

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
- Recall what bloodborne pathogens are
- Recognize symptoms and treatments for hepatitis B, hepatitis C and the human immunodeficiency virus (HIV)
- Identify how bloodborne pathogens are transmitted
- Remember to assume that all blood and other potentially infectious materials (OPIM) are contaminated and handle them accordingly
- Recall safe handling procedures for blood and OPIM
- Recall emergency procedures for blood or OPIM exposure

Runtime: 19
Bloodborne Pathogens Awareness

Contact with blood or other infectious materials puts you at risk for contracting potentially deadly, incurable diseases. Take this course to learn what bloodborne pathogens are, the risk they present, and general steps you should take to ensure your protection after potential exposure. This course is not intended to teach universal precautions. You need additional information, vaccinations/immunizations, and PPE to provide first aid or handle/clean up BBP and OPIM. Ideal learners include all workers.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- First Aid, Health and Wellness
- Awareness and Microlearning

Content Suite:
- Working from Home Suite [BDL-12127]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]

Course Objectives:
Know what bloodborne pathogens (BBPs) are; Recognize symptoms and treatments for hepatitis B, hepatitis C and human immunodeficiency virus (HIV); Identify how BBPs are transmitted; Remember to assume that all blood and other potentially infectious materials (OPIM) are contaminated; Recall emergency procedures to follow after a potential exposure to BBPs

Runtime: 8

Cannabis Awareness

Are the effects of cannabis different than other controlled substances? What do I need to know about cannabis as it relates to workplace safety? Take this course to learn the answers to these and other questions you may have about cannabis. We will talk about the properties of cannabis, its effects and strategies you can use at your workplace to keep everyone safe. This course is ideal for all learners.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Employment Liability
- First Aid, Health and Wellness
- Driver and Transportation Safety

Content Suite:
- Reasonable Suspicion Training (US) Suite (PS5-12015)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- Reasonable Suspicion Training (US) Suite (IACET CEU=0.2) [BDL-12015]

Course Objectives:
Recall the properties of cannabis; Recognize how cannabis may affect users; Recall potential consequences of working while impaired; Know about strategies that may help employees avoid potential problems

Runtime: 15
Cardiopulmonary Resuscitation (CPR) Training (US)

Incidents requiring CPR can happen anywhere and at any time. The first response to such an incident is the most important. CPR given at the scene can improve the chances of survival and recovery of a victim. This course will demonstrate how to recognize and respond to a severe life-threatening emergency until the Emergency Medical Services (EMS) personnel arrive.

Format: eLearning - Claro

Languages Available:
- English

Course Objectives:
- Explain the purpose of CPR
- Recall the critical first steps to take for administering CPR
- Protect yourself while helping a person in need

Runtime: 19

Chemical Facility Security Awareness Training (US)

What would happen if criminals or terrorists got their hands on potentially dangerous chemicals at your facility? What if they planted a bomb at your workplace? No one wants to experience the answers to these questions. Take this course to find out what you need to watch out for and what to do if you discover a security threat. Ideal learners are workers and managers in any facilities that use bulk quantities of highly hazardous chemicals.

Format: eLearning - Claro

Languages Available:
- English
- Spanish (Latin America) (PS5-101915)

Course Objectives:
- Recall your role in keeping your facility secure
- Recognize common chemical facility security risks
- Identify ways to reduce chemical facility security risks
- Know that increased threat levels require increased vigilance
- Recall what to do when you notice a security risk

Runtime: 18

Chlorine Awareness

Chlorine has a huge variety of uses. Its chemical properties make it an extremely effective disinfectant and an essential component in the chemical manufacture of literally thousands of vital products used every day. However, there are some hazards associated with chlorine and you need to know about them and how to protect yourself against them. This course presents information about the hazards of chlorine and how to handle it safely.

Format: eLearning - Claro

Languages Available:
- English

Course Objectives:
- Identify the physical properties of chlorine
- Recognize the health effects of chlorine exposure
- Recall how to safely store and handle chlorine
- Know appropriate response and first-aid measures for chlorine-related emergencies

Runtime: 9
Cleaning Up Small Chemical Spills

Spills in the workplace are almost inevitable. Because of the range and quantity of substances used in laboratories, manufacturing facilities and other work areas, preplanning is needed to respond safely to chemical spills. Spills should be cleaned up only by knowledgeable and experienced staff. This training will provide the information needed to handle small chemical spills in the workplace. Ideal learners are those who work around chemicals.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing, Chemicals, Substances and Hazard Communication

Course Objectives:
- Define a small chemical spill
- Explain how to prepare for and respond to a small chemical spill
- List what should be included in a spill kit
- Explain how to clean up a small chemical spill
- Specify precautions to take if a chemical spill is large or involves hazardous materials
- Describe what to do if someone becomes contaminated during spill cleanup
- Recall how to dispose of spilled chemicals

Runtime: 14

Cold Stress

Cold stress is the loss of body heat to the environment. Low temperature, wind and wetness have a combined effect on the body to create cold stress, injuries and illness. Cold-related disorders such as hypothermia and frostbite can kill or injure workers. Employers and employees should be aware of cold stress hazards, cold-related disorders and how to treat and prevent them. Ideal learners are employees who may be exposed to cold temperatures.

Format: eLearning - Claro

Libraries: Safety Catalog

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) [BDL-12111]
- HAZWOPER 8-Hr Supplemental Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.3) [BDL-12112]

Course Objectives:
- Recognize extreme cold
- Identify the sources of heat loss
- Explain what may happen when you are exposed to cold
- Identify symptoms and treatments for hypothermia, frostbite and trench foot
- Identify factors that contribute to cold stress
- Use precautionary guidelines to prevent cold stress

Runtime: 19
Combustible Dust

Good housekeeping practices can help minimize the likelihood of a fire or explosion due to combustible dust. Take this course to learn what combustible dust is, how to detect it and what safety measures to use to mitigate its hazards. This course does not provide technical information suitable to engineers who design, build and maintain equipment and facilities. Ideal learners are all employees.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress
- Chemicals, Substances and Hazard Communication

Content Suite:
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]

Course Objectives:
Define combustible dust; Detect combustible dust hazards in the workplace; Recall safety measures you can use to prevent combustible dust incidents; Identify the proper PPE to wear to protect yourself in the event of a combustible dust fire or explosion

Runtime: 23

Compliance, Safety, Accountability (CSA) Overview for Drivers (US)

In 2010, the Federal Motor Carrier Safety Administration (FMCSA) introduced new measures to improve the effectiveness of its compliance and enforcement program. The goal of the Compliance, Safety, Accountability (CSA) program is to reduce large truck and bus crashes, injuries and fatalities. This overview course will provide commercial motor vehicle (CMV) drivers with important high-level information about the new CSA program.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Driver and Transportation Safety

Content Suite:
- Commercial Drivers Suite (IACET CEU=0.4) [BDL-12055]

Course Objectives:
Explain the purpose of the CSA program and operational model; Explain components of the CSA program; Identify driver responsibilities according to the CSA program; Recognize differences between the CSA Safety Measurement System (SMS) and the previous SafeStat System; Explain the Behavior Analysis and Safety Improvement Categories (BASICs); Describe how the Driver Safety Measurement System (DSMS) works

Runtime: 23
Compressed Air Safety Awareness

On its own, air is not necessarily dangerous. However, compressing air creates hazards like noise, flying objects and static electricity. Take this course to review the hazards associated with compressed air and what you can do to avoid them. This course is ideal for people who use pneumatic tools or supervise those who do.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Industry and Manufacturing

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]

Course Objectives:
Recall the hazards of using compressed air; Recall how to control the hazards of using compressed air

Runtime: 11

Compressed Gas Cylinder Safety

You do not want to be near a rocket or fragmentation bomb when it goes off. Well, that is what a compressed gas cylinder may become if used improperly. The course will teach you about the hazards of these highly pressurized containers, how they must be labeled, and how they must be stored, handled and transported to prevent leaks, burns and explosions. Ideal learners are employees who work with or around compressed gas cylinders.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress
- Chemicals, Substances and Hazard Communication

Course Objectives:
Identify common and unique hazards while working with compressed gas cylinders; Follow proper identification requirements, including labeling and color coding; Describe storage techniques of compressed gas cylinders, such as segregation, securing and signage; Recall proper handling, transportation and use of compressed gas cylinders

Runtime: 21
Compressed Gas Cylinder Safety (US)

You do not want to be near a rocket or fragmentation bomb when it goes off. Well, that is what a compressed gas cylinder may become if used improperly. The course will teach you about the hazards of these highly pressurized containers, how they must be labeled, and how they must be stored, handled and transported to prevent leaks, burns and explosions. Ideal learners include employees who work with or around compressed gas cylinders.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress
- Chemicals, Substances and Hazard Communication

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Identify common and unique hazards while working with compressed gas cylinders; Follow proper identification requirements, including labeling and color coding; Describe storage techniques of compressed gas cylinders, such as segregation, securing and signage; Recall proper handling, transportation and use of compressed gas cylinders

Runtime: 19

Compressed Gas Cylinder Safety Awareness

You do not want to be near a rocket or fragmentation bomb when it goes off. Well, that is what a compressed gas cylinder may become if used improperly. The course will teach you about the hazards of these highly pressurized containers, and how they must be stored, handled and transported to prevent leaks, burns and explosions. Ideal learners are employees who work with or around compressed gas cylinders.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress
- Awareness and Microlearning
- Chemicals, Substances and Hazard Communication

Course Objectives:
Identify common hazards while working with compressed gas cylinders; Describe storage techniques of compressed gas cylinders, such as segregation, securing and signage; Recall proper handling, transportation and use of compressed gas cylinders

Runtime: 10
Concrete and Masonry Awareness

In the construction industry, many accidents, injuries and even fatalities result from formwork collapse and bracing failure during concrete and masonry construction. These incidents are preventable. Take this course to learn how to remain safe during concrete and masonry construction. This course is ideal for all construction workers.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Construction
- Awareness and Microlearning
- Chemicals, Substances and Hazard Communication

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]

Course Objectives:
- Recall general safety requirements for concrete and masonry work
- Recognize safety requirements for tools and equipment used in concrete and masonry construction
- Identify key requirements for work with cast-in-place and pre-cast concrete, lift-slab operations and masonry construction

Runtime: 15

Confined Space Awareness for Construction

If one of your co-workers passed out in a confined space, would you go in to rescue him? Can you be sure the air in the space is safe? This training will help you understand the risks associated with confined spaces and the procedures your employer has in place to protect you and those around you. Do not take this information lightly. It can make the difference between life and death! Ideal learners are anyone who works in or around confined spaces on construction sites.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Construction
- Electrical and LOTO
- Awareness and Microlearning
- Chemicals, Substances and Hazard Communication

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
- Define a confined space
- Identify hazards and responsibilities associated with confined spaces
- Know the requirements for confined space entry

Runtime: 10
Confined Space Hazards

If one of your co-workers passed out in a confined space, would you go in to rescue him? Can you be sure the air in the space is safe? This training will help you understand the risks associated with confined spaces and the procedures your employer has in place to protect you and those around you. Do not take this information lightly as it can make the difference between life and death! Ideal learners include anyone who works in or around confined spaces.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Electrical and LOTO
- Chemicals, Substances and Hazard Communication

Content Suite:
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

Course Objectives:
Recognize a confined space; Identify employer responsibilities regarding confined spaces; Explain the responsibilities of confined space authorized entrants, attendants and entry supervisors; Identify hazards associated with confined spaces; Identify the differences in flammable, toxic, irritant or corrosive, and asphyxiating atmospheres

Runtime: 22

Confined Space Hazards (US)

If one of your co-workers passed out in a confined space, would you go in to rescue him? Can you be sure the air in the space is safe? This training will help you understand the risks associated with confined spaces and the procedures your employer has in place to protect you and those around you. Do not take this information lightly. It can make the difference between life and death! Learners include anyone who works in or around confined spaces.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Electrical and LOTO
- Chemicals, Substances and Hazard Communication

Content Suite:
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]

Course Objectives:
Recognize a confined space and why it might require a permit; Identify employer responsibilities regarding confined spaces; Explain the responsibilities of confined space authorized entrants, attendants and entry supervisors; Identify hazards associated with confined spaces; Identify the differences in flammable, toxic, irritant or corrosive, and asphyxiating atmospheres

Runtime: 21
Confined Space Hazards Awareness

If one of your co-workers passed out in a confined space, would you go in to rescue him? Can you be sure the air in the space is safe? This training will help you understand the risks associated with confined spaces. Do not take this information lightly. It can mean the difference between life and death! Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Electrical and LOTO
- Awareness and Microlearning
- Chemicals, Substances and Hazard Communication

Course Objectives:
Recognize a confined space; Explain the responsibilities of confined space authorized entrants, attendants and entry supervisors; Identify hazards associated with confined spaces

Runtime: 8

Confined Space Hazards for Construction (US)

If one of your co-workers passed out in a confined space, would you go in to rescue him? Can you be sure the air in the space is safe? This training will help you understand the risks associated with confined spaces and the procedures your employer has in place to protect you and those around you. Do not take this information lightly. It can make the difference between life and death! Learners include anyone who works in or around confined spaces on construction sites.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Electrical and LOTO
- Chemicals, Substances and Hazard Communication

Course Objectives:
Define a confined space; List the responsibilities of the attendant, entrant, supervisor and employer; Identify hazards associated with confined spaces; Know the requirements for air monitoring; Recognize the differences in flammable, toxic, irritant or corrosive and asphyxiating atmospheres; Identify potential engulfment hazards and the required responsibilities

Runtime: 20

Confined Spaces: Permit-Required

You may be able to enter an enclosed space, but could you get back out safely? If it is a permit-required confined space, you know there is a risk of a flammable, asphyxiating, corrosive or toxic atmosphere. This training will help you understand the hazards associated with confined spaces and the procedures your employer has in place to protect you and those around you. Do not take this information lightly. It can make the difference between life and death! Ideal learners are anyone who works in or around confined spaces.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Health and Safety Management
- Electrical and LOTO
- Chemicals, Substances and Hazard Communication

Course Objectives:
List the differences between permit-required confined spaces and non-permit-required confined spaces; Identify the hazards associated with confined spaces; Recall the roles and responsibilities of the confined-space entry team; Identify what is required on an entry permit and other procedural safeguards when conducting a confined-space entry; Know how to respond to emergencies

Runtime: 45
Confined Spaces: Permit-Required (US)

You may be able to enter an enclosed space, but could you get back out safely? If it is a permit-required confined space, you know there is a risk of a flammable, asphyxiating, corrosive or toxic atmosphere. This training will help you understand the hazards associated with confined spaces and the procedures your employer has in place to protect you and those around you. Do not take this information lightly as it can make the difference between life and death! Ideal learners include anyone who works in or around confined spaces.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Health and Safety Management
- Electrical and LOTO
- Chemicals, Substances and Hazard Communication

Course Objectives:
List the differences between permit-required confined spaces and non-permit-required confined spaces; Identify the hazards associated with confined spaces; Recall the roles and responsibilities of the confined-space entry team; Identify what is required on an entry permit and other procedural safeguards when conducting a confined-space entry; Know how to respond to emergencies

Runtime: 35

Construction Safety Orientation

You should expect to go home unhurt at the end of your work day. Accidents and injuries are preventable and occur because of unsafe conditions and unsafe acts. Take this orientation course to learn some basic safety rules you can use to help prevent injuries. This course is ideal for construction workers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction

Content Suite:
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
Recall some basic jobsite safe practices; Know some ways to safely choose and use tools and equipment; Recall fall protection measures to take when you work at heights; Recognize ways to minimize the hazards of excavations and confined spaces

Runtime: 20
Continuously Improve for Safety Excellence

No matter how safe an organization is or how high-quality its service and products are, there is always room for improvement. Take this training to learn more about the concept of continuous improvement. Ideal learners are managers, supervisors and safety committee members.

Format: eLearning - Claro

Libraries:
- Safety Catalog
- Topic/Industry:
  - Health and Safety Management
  - Management Skills

Content Suite:
- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3) (BDL-12117)
- AES Ergonomic Improvement Specialist (IACET CEU=0.2) (BDL-12094)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- Why Incident Management Matters (WIMM) Suite (PS5-30009)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
Know what continuous improvement is; Recognize the direct and indirect benefits of continuous improvement for occupational health and safety; Know what the continuous improvement workflow looks like; Recall the differences and advantages of lagging and leading indicators; Recognize how quality management tools can improve occupational health and safety performance

Runtime: 19

Conveyor Safety Awareness

Conveyors move materials quickly and efficiently, but they can be dangerous. Without safe practices and controls, people around them can suffer serious injuries, including amputations. This course will teach people who work around conveyors and their supervisors some basic safety guidelines. It will lay the foundation for the hands-on training that employers will provide about specific equipment, hazards, controls and practices at their work locations.

Format: eLearning - Claro

Libraries:
- Safety Catalog
- Topic/Industry:
  - General Safety and Manufacturing
  - Warehouse Safety

Content Suite:
- General Industry Safety Program (IACET CEU=1.1) (BDL-12132)

Course Objectives:
Know that different conveyors and materials present different hazards; Recognize the hazards associated with conveyors; Recall the safety controls and practices you must use to stay safe when working around conveyors

Runtime: 12
Corrosive Safety

You may know that corrosive materials can be hazardous to your skin and eyes, but are you aware of their other hazards? Corrosives (acids and bases) are materials that can cause chemical damage on contact with the skin, eyes, respiratory tract, digestive tract or even metal. Many chemicals commonly used in laboratories and the home are corrosive. Besides their health hazards, corrosives can be highly reactive. They can cause fires, explosions, or violent exothermic (heat-releasing) reactions, like an explosion. Take this training to learn how to safely identify, use and store corrosive materials, as well as methods for preventing and responding to exposure incidents and emergencies. This training is beneficial for anyone who has the potential to use or be near the use of corrosives.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Chemicals, Substances and Hazard Communication

Course Objectives:
Recognize types of corrosive materials and their hazards; Identify and read corrosive material labels; Recall chemical safety guidelines; Know how to safely use corrosive materials; Know the proper techniques to store corrosive materials; Decide actions to take in an exposure emergency

Runtime: 24

Crane Operator Safety

You can avoid accidents involving cranes by ensuring safe setup and operation. Take this course to learn some basic information about safe crane operating procedures. This course provides safety information that supplements crane operator training. Crane operators must receive hands-on instruction for the cranes they will be operating. Ideal learners are all workers involved in the operation of cranes.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Construction
- Wind Turbine
- Crane and Rigging

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Identify facts associated with crane-related injuries; Know how to safely establish worksites; Recognize proper crane setup; Recall safe crane operating procedures; Identify conditions that affect operations

Runtime: 20
Crane Signaling Awareness

Crane operators count on signalers to provide vital lifting instructions. Whether you deliver signals, receive them or just witness them, it is important that you know why they are important, what they are, and what to do if stop work signals are given. This course provides a crane signaling overview that is appropriate for all people who work around cranes and lays the foundation for additional, in-depth and hands-on training that crane operators and signalers will receive.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Crane and Rigging

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
Recognize the importance of crane signaling; Identify the forces that signaled movements can exert on crane equipment and loads; Know the methods by which crane operators and signalers communicate; Identify resources to use to properly deliver signals; Recognize communication barriers and limitations and how to compensate for them; Know all official signals for "stop work"; Know what to do if crane communication is unclear

Runtime: 14

Cryogen Safety

Cryogenic liquids help us store materials and conduct experiments at extremely low temperatures. We must be careful to work with them safely to avoid the risk of frostbite, asphyxiation and over-pressurization of containers that can lead to explosions. Take this course to learn about what cryogenic liquids are, the risks they present and how to use them safely. This course lays the foundation for the workplace-specific, hands-on training your employer will provide to you. It is ideal for anyone who works with or around cryogenic liquids.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Healthcare
- Laboratory Safety
- Chemicals, Substances and Hazard Communication

Course Objectives:
Define cryogenic liquids; Recall the hazards associated with cryogenic liquids; Recall safe work practices to use when working with or around cryogenic liquids; Know what to do during emergencies that involve cryogenic liquids

Runtime: 15
Crystalline Silica Awareness

Breathing is an act we often take for granted. Sometimes, what we breathe in can harm our bodies and cause lasting damage. That is definitely true of crystalline silica. In this course, you will learn what it is, where it is, how to avoid exposure and what to do if you are exposed. This course is intended for anyone who may be exposed to crystalline silica in their work.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Awareness and Microlearning
- Chemicals, Substances and Hazard Communication

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
Recall what crystalline silica is; Recognize materials and operations in which crystalline silica may be present; Recognize the health effects of crystalline silica exposure; Identify ways to protect themselves when working with crystalline silica; Know appropriate first aid measures for crystalline silica exposures

Runtime: 13

Culture of Early Reporting

The more people involved in company safety efforts, the better! Take this course to learn how you and your company can create a culture of early reporting to improve safety performance. Ideal learners are managers, supervisors and safety committee members.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Health and Safety Management
- Management Skills

Content Suite:
- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3) (BDL-12117)
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) (BDL-12074)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- Why Incident Management Matters (WIMM) Suite (PS5-30009)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (BDL-12061)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12108)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
Recognize how early reporting and proactive prevention efforts deliver value; Recognize the challenges of early reporting and how to overcome them; Recall simple tools and processes that can help encourage early reporting

Runtime: 22
Cyber Security

People, information, operations and systems are critical assets of an organization. Protecting the safety, confidentiality, integrity and availability of these assets is essential to maintaining profitability, compliance, public image and a competitive edge. Cyber security is the responsibility of everyone. This course will explain what the dangers are and what you can do to help. Ideal learners include all employees.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Employment Liability

Topic/Industry: Working from Home/Remote

Topic/Industry: Ergonomics and Office Safety

Content Suite: Working from Home Suite [BDL-12127]

Course Objectives:

- Identify sensitive information
- Recognize internal and external threats to cyber security
- Recall ways you can help improve cyber security
- Know what to do if you suspect a cyber security breach

Runtime: 23

 Defensive Driving - Large Vehicles

Most vehicle accidents are actually the result of human error. If an error is made at the wrong moment, an accident or collision will result. A consistent, defensive approach to driving is the best way to reduce the likelihood of driver error. The goal of this course is to provide drivers of large vehicles with the knowledge and safe driving techniques they need to prevent collisions and violations.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Wind Turbine

Topic/Industry: Driver and Transportation Safety

Course Objectives:

- List the five characteristics of defensive drivers
- State the three major causes of traffic accidents
- Describe the actions you can take to remain in control of yourself as you drive
- Describe what you can do to control your vehicle as you drive
- List the eight most common driving errors and give examples of how to prevent them
- State the collision prevention formula
- Describe the action to take in the event of a collision/traffic incident

Runtime: 43
Defensive Driving - Small Vehicles

A split-second decision can change your life, especially when you are behind the wheel of a fast-moving, heavy vehicle. Take this course to refresh your memory about safe driving practices - particularly what you need to do before and during your drive. Ideal learners are anyone who drives cars or small vehicles.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Working from Home/Remote
- Wind Turbine
- Driver and Transportation Safety

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

Course Objectives:
Know how to prepare to drive safely; Recall best practices for driving safely; Make safe driving choices in specific situations and conditions; Recall what to do in case of an accident

Runtime: 24

Defensive Driving Awareness

A split-second decision can change your life, especially when you are behind the wheel of a fast-moving, heavy vehicle. Take this course to refresh your memory about safe driving practices - particularly what you need to do before and during your drive. Ideal learners are anyone who drives cars or small vehicles.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Working from Home/Remote
- Wind Turbine
- Awareness and Microlearning
- Driver and Transportation Safety

Content Suite:
- Working from Home Suite [BDL-12127]

Course Objectives:
Know how to prepare to drive safely; Recall best practices for driving safely; Make safe driving choices in specific situations and conditions

Runtime: 12
Distracted Driving

When you are driving, taking your eyes and mind off the road for even a few seconds can result in an accident. By failing to give full attention to the road, distracted drivers put themselves, their passengers and everyone else on the road at risk. This course presents strategies drivers can use to remain focused on the road. It is ideal for all drivers.

Format: eLearning - Claro

Languages Available:
- Chinese (Simplified) (PS5-101614)
- English
- French (European) (PS5-103146)
- Portuguese (Brazil) (PS5-103251)
- Spanish (Latin America) (PS5-102357)

Libraries:
- Safety Catalog

Topic/Industry:
- Working from Home/Remote
- Wind Turbine
- Driver and Transportation Safety

Content Suite:
- Working from Home Suite (BDL-12127)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
- Identify sources of driver distraction
- Know how to avoid distractions while driving

Runtime: 16

DOT Driver Compliance (US)

This training covers some important U.S. Department of Transportation (DOT) rules that all Commercial Motor Vehicle (CMV) drivers are required to follow. The purpose of these rules is to keep CMV drivers and everyone else on the road safe. Ideal learners are commercial drivers and their supervisors.

Format: eLearning - Claro

Languages Available: English

Libraries:
- Safety Catalog

Topic/Industry:
- Wind Turbine
- Driver and Transportation Safety

Content Suite:
- Commercial Drivers Suite (IACET CEU=0.4) (BDL-12055)

Course Objectives:
- Recall the documents and other requirements needed for a qualified driver
- Know the Hours-of-Service regulations, including the maximum daily and weekly driving times and the daily and weekly on-duty and off-duty time requirements
- Know how to correctly fill out a daily log sheet
- Know how to ensure that all required inspections are conducted when needed
- Recall important HAZMAT compliance issues
- Identify whistleblower protections for safety issue reporting
- Know what a DOT auditor will look for during an inspection
- Recognize what is included in the Compliance, Safety, Accountability (or CSA) program

Runtime: 32
DOT Vehicle and Roadside Inspections (US)  
This course educates commercial big-rig truck drivers and other personnel at trucking companies about the importance of vehicle and roadside inspections. This course will provide information about the items for which drivers or enforcement officers will check during an inspection.

Format: eLearning - Claro

Libraries:  
Safety Catalog

Content Suite:  
Commercial Drivers Suite (IACET CEU=0.4) [BDL-12055]

Course Objectives:
- Explain the importance of inspecting your vehicle before each day's operation;
- List the things that may occur during an enforcement inspection;
- Describe how to ensure your safety and the safety of others when you inspect your own vehicle;
- Identify items on a vehicle that require correction.

Runtime: 9

Driver Fatigue (US)  
Fatigue impairs the ability of a driver to safely operate a large truck or other types of equipment. It leads to accidents that cause vehicle damage, property damage, injury and even death.

Format: eLearning - Claro

Libraries:  
Safety Catalog

Content Suite:  
Commercial Drivers Suite (IACET CEU=0.4) [BDL-12055]

Course Objectives:
- Differentiate between being drowsy and fatigued;
- Demonstrate the ability to identify dangers associated with fatigued driving;
- Categorize the factors that contribute to fatigued driving;
- Demonstrate the ability to identify signs and symptoms of a fatigued driver;
- Identify the techniques that prevent driver fatigue.

Runtime: 22

Driver Wellness (US)  
This awareness-level course is intended to provide commercial motor vehicle (CMV) drivers with information about how to improve and maintain their health. It will cover some common health concerns for drivers as well as things they can do to improve their physical condition.

Format: eLearning - Claro

Libraries:  
Safety Catalog

Content Suite:  
Commercial Drivers Suite (IACET CEU=0.4) [BDL-12055]

Course Objectives:
- Identify federal regulations regarding driver fitness;
- List some of the common health hazards for commercial motor vehicle (CMV) drivers;
- Explain how poor driver health may impact drivers and carriers;
- Describe what you can start doing right away to improve your health;
- Identify the benefits of healthy choices and activities.

Runtime: 25
Driving Safety: Changing Lanes (US)
Changing positions in the flow of traffic can be stressful. When vehicles are passing each other or merging into the same lanes, collisions are a concern. Fortunately, there are some safe techniques drivers can use to prevent accidents. This course is ideal for drivers in the United States and their managers or supervisors.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Driver and Transportation Safety

Content Suite:
- Driver Safety Training - Large Vehicles Suite (IACET CEU=0.1) [BDL-12020]

Course Objectives:
- Recall how and why to keep a cushion of safety around vehicles
- Know what blind zones are and how to adjust vehicle mirrors to minimize them
- Recall safe practices for changing lanes
- Know how to safely merge into different traffic lanes
- Identify techniques for safely passing vehicles

Runtime: 14

Driving Safety: Speeding and Stopping Distance (US)
Most people have been tempted to speed or have seen speeders on the road. Take this course to learn why speeding is dangerous and what you can do to avoid the temptation to speed. This course is ideal for drivers in the United States and their managers or supervisors.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Driver and Transportation Safety

Course Objectives:
- Know how speed can impact the likelihood and severity of collisions
- Identify the factors that influence stopping distance
- Recall strategies that can help drivers avoid speeding

Runtime: 13

Driving Safety: Tailgating (US)
Following vehicles too closely, or tailgating, limits the reaction time that drivers have, significantly increasing the chance of a collision. Take this course to learn why tailgating is dangerous and how to avoid it. This course is ideal for drivers in the United States and their managers or supervisors.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Driver and Transportation Safety

Course Objectives:
- Know what tailgating is and why it is dangerous
- Recall strategies that can help drivers avoid tailgating

Runtime: 9
Drug and Alcohol Awareness

Substance abuse causes harm to more people than just the abuser. This course teaches workers what substance abuse is and it outlines the costs of substance abuse to employers. It also provides facts about commonly abused substances and how to reduce the risks of substance abuse. Ideal learners are all employees, including managers and supervisors.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Content Suite:
- Working from Home Suite (BDL-12127)

Course Objectives:
Define substance abuse; Identify the effects of substance abuse; Explain ways to reduce the risk of substance abuse

Runtime: 16

Drugs and Alcohol: The Facts

Substance abuse causes harm to more people than just the abuser. This course teaches workers what drug and alcohol abuse is and it outlines the costs of substance abuse to employers. It also provides facts about commonly abused substances and how to reduce the risks of substance abuse. Ideal learners are all employees, including managers and supervisors.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU-2.7) (BDL-12010)

Course Objectives:
Define substance abuse; Identify the effects of substance abuse; Specify the costs of substance abuse in the workplace; Explain ways to reduce the risk of substance abuse; Identify resources for education, prevention and intervention

Runtime: 44
Substance abuse causes harm to more people than just the abuser. This course teaches workers what substance abuse is and it outlines the costs of substance abuse to employers and co-workers. It also provides facts about commonly abused substances and how to reduce the risks of substance abuse. Ideal learners are all employees, including managers and supervisors.

**Course Objectives:**
- Define substance abuse
- Identify the effects of substance abuse
- Specify the costs of substance abuse in the workplace
- Explain ways to reduce the risk of substance abuse
- Identify resources for education, prevention and intervention

**Runtime:** 50

---

You are probably exposed to some level of dust in your workplace, dust that may pose a variety of health hazards. If those hazards are significant enough, your employer will require that you use respiratory protection. If the hazards are minor and protection is not mandated, you can choose to wear a dust mask. This course will explain how to select, use and care for dust masks. Ideal learners are employees in the heavy equipment, manufacturing (production and maintenance), construction and mining industries, and their supervisors.

**Course Objectives:**
- Differentiate between types of respirators
- Recognize situations in which it is a good idea to voluntarily use a dust mask
- Recall how to properly use a dust mask
- Determine if a dust mask is in good working order

**Runtime:** 14
Effective Supervision (US)

In the increasingly competitive marketplace of today, people are the most valuable resource in an organization. Effectively supervising this resource is crucial to success. This course presents the tools needed to be an effective supervisor. The course will help those new to the supervisory role transition to their new responsibilities, while providing a good review for more seasoned supervisors. Ideal learners are supervisors and managers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Employment Liability
- Management Skills

Course Objectives:
Recognize the importance of being an effective supervisor; Understand the multiple roles a supervisor plays; Identify common mistakes to avoid; Describe how to transition to a supervisory position; List seven supervisory styles and understand when and how to use them; Describe how to manage better using motivation, accountability, recognition and communication

Runtime: 33

Egress and Emergency Action Plans

Fires injure or kill thousands of workers annually. Those are the losses due to fires, but there are other hazardous situations that can threaten the life and health of a worker. These situations include severe weather, medical emergencies, chemical releases, and bomb threats. We cannot completely eliminate dangerous workplace situations, but we can reduce the number of associated injuries and deaths. This course will focus on two important aspects of this effort. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Fire Extinguisher, Prevention and Egress
- Ergonomics and Office Safety
- Chemicals, Substances and Hazard Communication

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

Course Objectives:
Identify the different components of an exit route; Describe the general recommendations of egress; Explain the detailed elements of egress; Discuss the core elements of an emergency action plan

Runtime: 28
Egress and Emergency Action Plans (US)

Fires, severe weather, medical emergencies, chemical releases, bomb threats and other hazardous situations can threaten life and limb. Precautions reduce the number of injuries and deaths attributable to these threats. This course will focus on two important aspects of this effort: egress and emergency action plans. This course is ideal for all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Fire Extinguisher, Prevention and Egress
- Ergonomics and Office Safety
- Chemicals, Substances and Hazard Communication

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
Identify the different components of an exit route; Recognize the fundamental requirements of egress; Remember the detailed elements of egress; Recall the core elements of an emergency action plan

Runtime: 27

Egress and Emergency Action Plans Awareness

Fires, severe weather, medical emergencies, chemical releases, bomb threats and other emergencies can threaten the entire workforce. We cannot completely eliminate dangerous workplace situations, but we can reduce the harm they cause. This course will focus on two important aspects of this effort: egress and emergency action plans. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Wind Turbine
- Fire Extinguisher, Prevention and Egress
- Ergonomics and Office Safety
- Awareness and Microlearning
- Chemicals, Substances and Hazard Communication

Content Suite:
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) (BDL-12074)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (BDL-12061)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12108)
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) (BDL-12102)

Course Objectives:
Identify the components of an exit route; Recognize the fundamental requirements of egress; Recall the detailed elements of egress; Recall the core elements of emergency action plans; Know how to safely evacuate during an emergency

Runtime: 15
Electrical Arc Flash Awareness

An arc flash can generate a temperature of up to 19,000 degrees Celsius (35,000 degrees Fahrenheit)! Working in or near electrical panels and systems increases your chance of exposure to an arc flash. It requires that you take extreme precautions. This course will provide information to help protect you from this deadly hazard that cannot be seen or heard, until it is too late. Ideal learners are qualified and unqualified electrical personnel (employees and managers) in a variety of industries with an emphasis on general industry maintenance and fabrication settings.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Electrical and LOTO
- Awareness and Microlearning

Content Suite:
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]

Course Objectives:
Recognize the significance of the arc flash hazard; Define arc flash; Recall common causes of injury; Identify general precautions and safe work practices related to the arc flash hazard, including personal protective equipment (PPE), labels and boundaries

Runtime: 11

Electrical Safety and Lockout/Tagout (LOTO)

Working with electricity can be dangerous. Workers performing service or maintenance on machinery and equipment may be injured by the unexpected startup of the machinery or equipment, or release of stored electrical energy in the equipment. In fact, failure to lock out machinery before working on it is a major cause of injury and death. These deaths and injuries can be prevented by establishing and following an effective lockout/tagout program. This training will tell you more about electrical hazards, safe practices when working with electricity, and the lockout/tagout program and how it can save your life. Ideal learners are any employee who works on or around electrical machinery.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Wind Turbine
- Electrical and LOTO
- General Industry and Manufacturing

Course Objectives:
Describe how electricity works; Define conductors and insulators; Explain how electric shock occurs; Recall safe practices for working with and around electricity; Explain the purpose of lockout/tagout; List different forms of hazardous energy; Identify who should use lockout/tagout and when it should be used; Describe the three elements of an energy control program; Recognize the types of lockout/tagout devices; List the steps for attaching and removing locks and tags; Discuss periodic inspections of lockout/tagout procedures; Understand the training recommendations for lockout/tagout

Runtime: 43
### Electrical Safety and Lockout/Tagout (LOTO) (US)

Working with electricity can be dangerous. Every year, between 300 and 500 people in the U.S. are killed by electrocutions at work. To handle electricity safely, you need to know how it acts, how it can be controlled, and its hazards. Workers performing service or maintenance on machinery and equipment may be injured by the unexpected startup of the machinery or equipment, or release of stored electrical energy in the equipment. In fact, failure to lock out machinery before working on it is a major cause of injury and death in the United States. These deaths and injuries can be prevented by establishing and following an effective lockout/tagout program. This training will tell you more about electrical hazards, safe practices when working with electricity, and the lockout tagout program and how it can save your life.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog
  - General Safety and Manufacturing
  - Wind Turbine
  - Electrical and LOTO

**Course Objectives:**
- Describe how electricity works
- Define conductors and insulators
- Explain how electric shock occurs
- Recall safe practices for working with and around electricity
- Explain the purpose of lockout/tagout
- List different forms of hazardous energy
- Identify who is covered and what activities are covered by the lockout/tagout standard
- Describe the three elements of an energy control program
- Recognize the types of lockout/tagout devices
- Explain who is required to lockout or tagout
- List the steps for attaching and removing locks and tags
- Discuss periodic inspections of lockout/tagout procedures as required by the standard
- Understand the training requirements for lockout/tagout

**Runtime:** 46

### Electrical Safety for Construction: Cord and Plug Connected Equipment (US)

Construction workers use cord- and plug-connected electrical equipment every day. Because the equipment is so common, it is easy to forget that it can be dangerous. Take this course to refresh your memory about electrical hazards and how to protect yourself. Ideal learners are construction workers.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog
  - Construction
  - Electrical and LOTO

**Content Suite:**
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) (BDL-12009)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12107)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (BDL-12060)
- Construction Industry Safety Program (IACET CEU=0.9) (BDL-12133)

**Course Objectives:**
- Identify major electrical hazards
- Describe types of electrical hazards
- Protect yourself from electrical hazards
- Recognize employer requirements to protect workers from electrical hazards

**Runtime:** 20
Electrical Safety for Construction: Power Lines and Lockout/Tagout (US)

Workers who contact power lines or perform work on electrical equipment may be injured or even killed by the unexpected startup or release of electrical energy. You can prevent these incidents by following some basic best practices. This course will tell you about electrical hazards in construction work, safe practices when working with electricity and how a lockout/tagout program can save your life. Ideal learners are construction workers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Electrical and LOTO

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12100]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12070]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
- Identify major electrical hazards
- Protect yourself from electrical hazards
- Recognize employer requirements to protect workers from electrical hazards

Runtime: 17

Emergency Response for Multi-Story Buildings

In the event of an emergency in a multi-story building, all occupants need to know what to do, where to go and who is in charge. This course will provide you with the information you need to safely evacuate a multi-story building in case of an emergency.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Fire Extinguisher, Prevention and Egress
- Ergonomics and Office Safety

Course Objectives:
- Define the role of a floor warden
- Identify the risks and challenges involved when working in a multi-story building
- Recognize the types of emergencies that floor wardens address
- Identify the components of an Emergency Action Plan
- Understand and perform the role that bystanders play
- Identify what type of equipment could be used by a floor warden

Runtime: 17
Environmental Overview (US)

This course provides a general understanding of how our daily work activities can potentially alter environmental balances. By being more aware of this, we can act responsibly to protect our communities, air, water, land and ourselves. Ideal learners are all employees.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Content Suite:**
- Environmental Responsibility Suite (IACET CEU-0.3)

**Course Objectives:**
- Environmental safety and health policy
- Environmental protection laws
- The individual's role in protecting the environment
- How job performance affects the environment
- Improving environmental performance

**Runtime:** 12

Environmental Responsibility Part 1 (US) - Environmental and Waste Management

What if your company mishandled hazardous wastes or dangerous chemicals, leading to environmental damage and worker injury? The implications for the company, your job, or even your life, would be enormous. The purpose of this 3-part series is to help you work in an environmentally responsible manner and in compliance with all applicable environmental laws and regulations. Part 1 outlines environmental goals, the purpose of environmental management systems, environmental issues such as hazardous waste and stormwater, and management practices when dealing with industrial waste. The ideal learner is anyone who must comply with environmental regulations on the job.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Content Suite:**
- Environmental Responsibility, Parts 1-3 (US)
- Environmental Responsibility Suite (IACET CEU-0.3)

**Course Objectives:**
- Identify our environmental mission and goals
- State the purpose of an environmental management system (or EMS)
- Recognize the amounts of hazardous waste associated with each generator classification
- Identify certain EPA-regulated environmental issues, including: hazardous waste, non-hazardous waste, industrial wastewater and stormwater
- List best management practices (BMPs) for dealing with industrial waste

**Runtime:** 27
Environmental Responsibility Part 2 (US) - Air, Tanks, Oil and Waste

This is Part 2 of a three-part course designed to promote working in an environmentally responsible manner and in compliance with all applicable environmental laws and regulations. This second part identifies EPA-regulated environmental issues concerning air emissions, stationary storage tank management, used oil and universal waste, and the best management practices for dealing with these issues. Ideal learner: Anyone who must comply with environmental regulations on the job.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Environmental
- Chemicals, Substances and Hazard Communication

Content Suite:
- Environmental Responsibility, Parts 1-3 (US) (PSS-30013)
- Environmental Responsibility Suite (IACET CEU=0.3) [ ]

Course Objectives:
- Identify additional EPA regulated environmental issues, including air emissions, stationary storage tanks management, used oil, and universal waste
- State the best management practices for dealing with these issues

Runtime: 22

Environmental Responsibility Part 3 (US) - Storage, Handling and Response

This is Part 3 of a three-part course designed to promote working in an environmentally responsible manner and in compliance with all applicable environmental laws and regulations. This, the third part, outlines OSHA-regulated environmental issues, the elements of an Emergency Action Plan, major steps in spill and fire response, storage requirements for hazardous chemicals, and issues related to handling chemicals. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Environmental
- Chemicals, Substances and Hazard Communication

Content Suite:
- Environmental Responsibility, Parts 1-3 (US) (PSS-30013)
- Environmental Responsibility Suite (IACET CEU=0.3) [ ]

Course Objectives:
- Identify OSHA-regulated environmental issues
- List the elements of an emergency action plan for spill, fire and emergency response
- Discuss the major steps in spill and fire response
- List storage requirements for flammable and combustible liquids and other chemicals
- Identify issues related to handling chemicals

Runtime: 26
Excavation and Trenching Safety

Excavation and trenching work is performed thousands of times daily in all types of conditions. Unfortunately, many fatalities and work-related injuries are associated with excavation and trenching incidents. Cave-ins can occur suddenly, without warning, giving you little time to react. But their signs are present when proper safety precautions are not taken. This program has been created to increase your awareness and provide you with a better understanding of the safety procedures associated with your work. Ideal learners are employees who work in or near excavations and trenches.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Construction

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]

Course Objectives:
- List the hazards associated with excavation and trenching work
- Discuss soil mechanics and identify conditions that increase the chance of cave-in
- Define the role and responsibilities of the Competent Person
- Categorize the soil types found in North America
- Recall four different types of protection systems
- Discuss safety precautions and emergency response

Runtime: 30

Excavation and Trenching Safety (US)

Excavation and trenching work is performed thousands of times daily in all types of conditions. Unfortunately, cave-ins can occur suddenly, without warning, giving little time to react. But their signs are present when proper safety precautions are not taken. This program has been created to increase your awareness and provide you with a better understanding of the laws, regulations, and company safety policies and procedures associated with your work. Ideal learners are workers who may work in or around excavations and trenches.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Construction

Content Suite:
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (BDL-12060)
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
- Recognize the hazards associated with excavation and trenching work
- Identify soil mechanics and conditions that increase the chance of cave-in
- Define the role and responsibilities of the Competent Person
- Categorize the soil types found in North America
- Recall four different types of protection systems
- Know safety precautions and emergency response

Runtime: 27
Excavation and Trenching Safety Awareness

Excavation and trenching work is performed thousands of times daily, in all types of conditions. Unfortunately, many fatalities and work-related injuries are associated with excavation and trenching incidents. Cave-ins can occur suddenly, without warning, giving you little time to react. But their signs are present when proper safety precautions are not taken. This program has been created to increase your awareness and provide you with a better understanding of the safety procedures associated with your work. Ideal learners are employees who work in or near excavations and trenches.

Format: eLearning - Claro
Libraries: Safety Catalog
Topic/Industry: Construction, Awareness and Microlearning

Course Objectives:
List the hazards associated with excavation and trenching work; Discuss soil mechanics and identify conditions that increase the chance of cave-in; Describe four different types of protection systems; Discuss safety precautions

Runtime: 13

Extreme Driving Conditions (US)

Extreme weather driving includes every adverse weather condition that could cause a hazardous driving situation, such as rain, snow, ice, fog, or extremely cold or hot weather. The purpose of this training is to show drivers how to handle extreme weather conditions on the road so they can stay safe in rain, snow or shine. Ideal learners are all employees.

Format: eLearning - Claro
Libraries: Safety Catalog
Topic/Industry: Driver and Transportation Safety

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
List key factors for driving safely in extreme weather; Describe how to drive on differing road surfaces; Discuss the actions to take when driving in winter weather; State how to reduce your speed to drive in different extreme weather conditions; Discuss how to prepare for and drive in extremely hot weather

Runtime: 22
Fall Protection

Each year, many workers are hurt or killed as a result of falls in the workplace. Falls are usually complex events that involve a variety of factors. This training will cover systems and procedures designed to prevent falls off, onto or through working levels and to protect workers from being struck by falling objects. Ideal learners include all workers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Construction
- Wind Turbine
- Slips, Trips and Falls

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

Course Objectives:
- Identify common fall hazards
- Recognize the types of equipment and methods that provide fall protection
- List the components of a personal fall protection system
- Recognize the importance of inspecting fall protection equipment
- Recall important information about fall rescue plans

Runtime: 48

Fall Protection (US)

Each year, many workers are hurt or killed as a result of falls in the workplace. Falls are usually complex events that involve a variety of factors. For that reason, the OSHA fall protection standard deals with both human- and equipment-related issues for protecting workers from fall hazards. This training will cover systems and procedures designed to prevent falls off, onto or through working levels and to protect workers from being struck by falling objects. Ideal learners are workers who work at heights, including on ladders and aerial lifts.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Wind Turbine
- Slips, Trips and Falls
- General Industry and Manufacturing

Content Suite:
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) [BDL-12102]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]

Course Objectives:
- Identify common fall hazards
- Recognize the types of equipment and methods that provide fall protection
- List the components of a personal fall protection system
- Recognize the importance of inspecting fall protection equipment
- Recall important information about fall rescue plans

Runtime: 43
Fall Protection Awareness

Each year, many workers are hurt or killed as a result of falls in the workplace. Falls are usually complex events that involve a variety of factors. This training will cover systems and procedures designed to prevent falls off, onto or through working levels. Ideal learners are workers who work at heights.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Construction
- Wind Turbine
- Slips, Trips and Falls
- Awareness and Microlearning

Course Objectives:
- Identify common fall hazards
- Recognize the types of equipment and methods that provide fall protection
- List the components of a personal fall protection system

Runtime: 15

Fall Protection: Rescues

A worker falls, but his personal fall arrest system stops his descent. Now the worker is suspended in midair and screaming for help. What do you do? This can be a chilling moment if you do not have a plan. This course highlights common considerations in fall protection rescue planning and provides advice for reducing post-fall suspension trauma. It is ideal for workers, supervisors and managers.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Slips, Trips and Falls

Course Objectives:
- Recognize the possible consequences of fall suspension
- Know how suspension trauma happens
- Know how to reduce the effects of suspension traumas
- Know what to include in fall rescue plans

Runtime: 12

Field Service Cranes Part 1: Planning a Safe Lift

Safe crane operation begins before you ever reach the controls. Take this course to learn what you can do to establish a safe work area and plan a safe lift. This course is ideal for field service crane operators and may be taken with other training and hands-on practice.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Construction
- Wind Turbine
- Crane and Rigging

Content Suite:
- Field Service Cranes, Parts 1-2 (PS5-30073)

Course Objectives:
- Identify the steps you can take to establish a safe work area and plan for a safe lift

Runtime: 12
Field Service Cranes Part 2: Performing a Safe Lift

Once you establish a safe work area and plan a lift, it is time to perform the lift safely. Take this course to learn how. This course is ideal for field service crane operators and may be taken with other training and hands-on practice.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Construction
- Wind Turbine
- Crane and Rigging

**Content Suite:**
- Field Service Cranes, Parts 1-2 [PS5-30073]

**Course Objectives:**
Identify the steps you can take to perform a safe lift

**Runtime:** 11

---

Fire Extinguisher Safety

If you were confronted with a fire in your workplace, would you know whether to fight or flee? If you decide to fight the fire, do you know what to do? Take this course to learn when to fight or flee a fire and how to choose and use fire extinguishers. Knowing what to do can save lives! Ideal learners include all employees.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Working from Home/Remote
- Wind Turbine
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress
- Ergonomics and Office Safety
- General Industry and Manufacturing

**Content Suite:**
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

**Course Objectives:**
Decide when to fight or flee a fire; Recall the three elements needed to start and sustain a fire; Choose the appropriate fire extinguishers for different types of fires; Recall how to use the PASS method to operate fire extinguishers; Recall general guidelines about how to inspect and maintain fire extinguishers; Identify best practices for hands-on fire extinguisher training

**Runtime:** 15
Fire Extinguisher Safety Awareness

If you were confronted with a fire in your workplace, would you know whether to fight or flee? If you decide to fight the fire, do you know what to do? Take this course to learn when to fight or flee a fire and how to choose and use fire extinguishers. Knowing what to do can save lives! Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress
- Ergonomics and Office Safety
- Awareness and Microlearning
- Wind Turbine

Content Suite:
- Working from Home Suite [BDL-12127]

Course Objectives:
Decide when to fight or flee a fire; Recall the three elements needed to start and sustain a fire; Choose the appropriate fire extinguishers for different types of fires; Recall how to use the PASS method to operate fire extinguishers; Recall general guidelines about how to maintain fire extinguishers

Runtime: 14

Fire Extinguisher Safety for Construction: Part 1 - Fight or Flee (US)

It is dangerous to fight a large fire with the wrong equipment. Take this course to learn when to fight or flee a fire. Knowing what to do can save lives! Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- Fire Extinguisher Safety for Construction, Parts 1-2 (US) [PS5-30073]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]

Course Objectives:
Decide whether to fight or flee fires; Recognize the limitations of fire extinguishers; Recall basic fire-fighting safety tips

Runtime: 6
Fire Extinguisher Safety for Construction: Part 2 - Using Extinguishers (US)

To effectively put out small fires, you need to CHOOSE and USE the right extinguishers. Take this course to learn about the types of extinguishers, how they work, and how to use and maintain them. This course is ideal for anyone who works in the construction industry.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Construction
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- Fire Extinguisher Safety for Construction, Parts 1-2 (US) [PS5-30073]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]

Course Objectives:
- Know how fire extinguishers work
- Recall types of fires and applicable extinguishers
- Recall safe fire-fighting practices
- Remember the PASS extinguishing method
- Recall how to use and maintain fire extinguishers

Runtime: 12

Fire Extinguisher Safety: Part 1 - Fight or Flee (US)

If there were a fire in your area, would you know whether to fight or flee? You need to be able to make the right decision and act safely. Take this course to learn how to make safe choices. This course is ideal for anyone who works in general industry.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing
- Working from Home/Remote
- Wind Turbine
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress
- Ergonomics and Office Safety

Content Suite:
- Fire Extinguisher Safety, Parts 1-2 (US) [PS5-30069]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]

Course Objectives:
- Decide whether to fight or flee fires
- Recognize the limitations of fire extinguishers
- Recall basic fire-fighting safety tips

Runtime: 5
Fire Extinguisher Safety: Part 2 - Using Extinguishers (US)

To effectively put out small fires, you need to CHOOSE and USE the right extinguishers. Take this course to learn about the types of extinguishers, how they work, and how to use and maintain them. This course is ideal for anyone who works in general industry.

Format: eLearning - Claro

Libraries:
- Safety Catalog

- Wind Turbine
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress
- Ergonomics and Office Safety

Content Suite:
- Fire Extinguisher Safety, Parts 1-2 (US) [PS5-30069]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]

Course Objectives:
Know how fire extinguishers work; Recall types of fires and applicable extinguishers; Recall safe fire-fighting practices; Remember the PASS extinguishing method; Recall how to use and maintain fire extinguishers

Runtime: 11

Fire Prevention

Fire is a terrible way to die or be injured. You cannot assume that having a fire department keeps you safe. Most workplace fires are completely preventable. Take this course to find out how to reduce the risk of fires in your workplace. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Wind Turbine
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress
- Ergonomics and Office Safety

Content Suite:
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]

Course Objectives:
Know the four components needed to start and sustain a fire; Recognize the leading causes of fires in the workplace; Recall common workplace fire prevention tools and practices; Recall typical requirements for fire drills and evacuations

Runtime: 25
Fire Prevention Awareness

Fire is a terrible way to die or be injured. You cannot assume that having a fire department keeps you safe. Most workplace fires are completely preventable. Take this course to find out how to reduce the risk of fires in your workplace. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Wind Turbine
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress
- Ergonomics and Office Safety
- Awareness and Microlearning

Content Suite:
- Working from Home Suite (BDL-12127)
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU-1.0) (BDL-12102)

Course Objectives:
- Know the four components needed to start and sustain a fire
- Recognize the leading causes of fires in the workplace
- Recall common workplace fire prevention tools and practices

Runtime: 12

Fire Watch

Every year, many workplace fires occur as a result of hot work including cutting, welding and other work that generates heat and sparks. Hot work is often being done without an adequate fire watch in place. Most, if not all, hot work incidents are completely preventable. A fire watch, conducted properly, is one of the most important ways to keep workers safe during hot work and prevent damage and destruction to property. This course covers the role and responsibilities of the fire watcher. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress

Course Objectives:
- Understand the hazards presented by hot work
- Describe where hot work is, and is not, permitted
- Identify the safety precautions needed to prepare an area for hot work
- Explain the role and responsibilities of a fire watcher
- Recall the responsibilities of other individuals involved in hot work
- Know what emergency procedures need to be in place for hot work

Runtime: 17
**First Aid - Basics**

Incidents requiring first aid can happen anywhere and at any time. The first response to such an incident is the most important. First aid given at the scene can improve the chances of survival and recovery of a victim. This course presents ways to respond to basic first aid situations until the emergency medical services personnel arrive. Ideal learners are all employees.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Construction
- Working from Home/Remote
- Wind Turbine
- First Aid, Health and Wellness

**Course Objectives:**
Assess scenes and victims before providing first aid; Provide valuable information to emergency medical services; Recall guidelines about when and how to move victims; Recall basic first aid techniques for the treatment of breathing emergencies, choking, severe bleeding, shock, fractures, sprains, strains and burns

**Runtime:** 40

**First Aid - Medical Emergencies**

Injuries, both on and off the job, represent a significant health problem. The outcome of injuries depends on not only the severity of the injury, but also on the rendering of first aid care. Prompt, properly administered first aid care can mean the difference between life and death. This course will cover a variety of emergency scenarios and the appropriate first aid care. Ideal learners are all employees.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Construction
- Working from Home/Remote
- Wind Turbine
- First Aid, Health and Wellness

**Course Objectives:**
Recall basic first aid techniques to treat sudden illness (such as fainting, seizures, diabetic emergencies, severe allergic reactions, heart attacks, asthma attacks and stroke), poisoning, stings and bites, and heat- and cold-related illnesses

**Runtime:** 25
First Aid - Medical Emergencies (US)

Injuries, both on and off the job, represent a significant health problem. The outcome of injuries depends on not only the severity of the injury, but also on the rendering of first aid care. Prompt, properly administered first aid care can mean the difference between life and death. This course will cover a variety of emergency scenarios and the appropriate first aid care.

- First Aid, Health and Wellness

Course Objectives:
- Sudden illness (such as fainting, seizures, asthma attacks, heart attacks, diabetic emergencies, stroke, and severe allergic reactions);
- Poisoning;
- Stings and bites;
- Heat and cold-related illnesses

Runtime: 33

First Aid - Mental Wellness

How would you describe your mental state? Do you ever feel that it impacts your work or personal life? Take this course to learn about the importance of improving your mental wellness and reducing your stress. It will also include topics on how to improve your mental health and well-being so that you can be happier and more productive at work and at home. This course is ideal for anyone feeling the pressure of your job or personal relationships.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Working from Home/Remote
- First Aid, Health and Wellness

Course Objectives:
- Define mental health;
- Define and recognize mental distress;
- Recognize how mental health and mental distress impact businesses and performance in the workplace;
- Recognize ways to improve mental health

Runtime: 19

First Aid - Module 01 - Introduction (US)

When you provide first aid, it is important that you help both the victim and yourself. Take this module to find out how to avoid legal liability, prevent disease transmission and determine how and when to move victims. Ideal learners are employees who have already taken in-depth first-aid training.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Wind Turbine
- First Aid, Health and Wellness
- Construction

Content Suite:
- First Aid Suite (US) (ACET CEU=0.2) (BDL-30084)
- First Aid Suite (US) (PS5-30084)

Course Objectives:
- Recognize the importance of obtaining consent before performing first aid;
- Know what constitutes abandonment;
- Recall how to prevent the transmission of disease during first aid;
- Recognize situations in which it is acceptable to move a victim;
- Recall how to move a victim safely

Runtime: 9
First Aid - Module 02 - Finding Out What Is Wrong (US)

You cannot begin to offer first aid to a victim until you know what is wrong. This module will remind you how to assess the scene and the victim and gather information that may be helpful to you and to emergency responders when they arrive. Ideal learners are employees who have already taken in-depth first aid training.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Wind Turbine
- First Aid, Health and Wellness
- Construction

Content Suite:
- First Aid Suite (US) (ACET CEU=0.2) (BDL-30084)
- First Aid Suite (US) (PS5-30084)

Course Objectives:
- Recall what dangers to look for when you first arrive at a scene
- Assess injuries or illnesses
- Recall the SAMPLE information gathering process
- Know how to physically examine a victim

Runtime: 7

First Aid - Module 03 - Basic Life Support (US)

When victims are not breathing or their hearts are not beating, every second counts! This module will refresh your memory about how to recognize cardiac incidents, perform CPR, treat choking and put victims in the recovery position. Ideal learners are employees who have already taken in-depth first aid training.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Wind Turbine
- First Aid, Health and Wellness
- Construction

Content Suite:
- First Aid Suite (US) (ACET CEU=0.2) (BDL-30084)
- First Aid Suite (US) (PS5-30084)

Course Objectives:
- Recognize the symptoms of a cardiac incident
- Know the five actions you can take to improve a cardiac incident victim’s chance of survival
- Recall when and how to give CPR to an adult
- Know when and how to provide choking care for adults
- Know why and how to put an unresponsive victim into a recovery position

Runtime: 11
First Aid - Module 04 - Bleeding and Wound Care (US)

Getting bleeding under control quickly, and dressing wounds correctly, is imperative. Take this course to find out how to control bleeding, care for minor wounds, and offer first aid to victims with more severe injuries such as amputations and head or facial wounds. Ideal learners are employees who have already taken in-depth first aid training.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Wind Turbine
- First Aid, Health and Wellness
- Construction

Content Suite:
- First Aid Suite (US) (ACET CEU=0.2) (BDL-30084)
- First Aid Suite (US) (PS5-30084)

Course Objectives:
- Know how to avoid wound contamination and disease transmission
- Know how to control bleeding
- Know how to clean and dress a minor wound to control bleeding and prevent infection
- Recall the special care needed for impaled objects, amputations and injuries of the head, eye, ear, nose and mouth

Runtime: 15

First Aid - Module 05 - Shock and Anaphylaxis Care (US)

Do you know what it looks like when someone experiences shock and anaphylaxis? Do you know what to do? Take this course to find out what the signs and symptoms are and what first aid treatment you need to administer. Ideal learners are employees who have already taken in-depth first aid training.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Wind Turbine
- First Aid, Health and Wellness
- Construction

Content Suite:
- First Aid Suite (US) (ACET CEU=0.2) (BDL-30084)
- First Aid Suite (US) (PS5-30084)

Course Objectives:
- Recognize the causes, signs and symptoms of shock
- Know how to administer first aid for shock
- Recognize the causes, signs and symptoms of anaphylaxis
- Know how to administer first aid for anaphylaxis

Runtime: 8
**First Aid - Module 06 - Burns and Electrical Shock (US)**

When someone has experienced a serious burn or electrical shock, the pain may make it impossible to think clearly. The victim is counting on you to know what to do. Take this training to refresh your memory about types of burns and how to administer first aid for them as well as first aid for electrical shock. Ideal learners are employees who have already taken in-depth first aid training.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Content Suite:**
- First Aid Suite (US) (ACET CEU=0.2) [BDL-30084]
- First Aid Suite (US) [PS5-30084]

**Course Objectives:**
Know how to extinguish flames if you are on fire; Recognize first-, second-, and third-degree burns; Recognize heat, chemical and electrical burns and electrical shock; Recall first aid to administer for various types of burns and electrical shock

**Runtime:** 11

**Languages Available:**
English

---

**First Aid - Module 07 - Serious Injuries (US)**

Serious injuries are those that can lead to disability or death if improperly treated. Take this module to refresh your memory about how to treat brain, spine, chest, abdominal and pelvic injuries. Ideal learners are employees who have already taken in-depth first aid training.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Content Suite:**
- First Aid Suite (US) (ACET CEU=0.2) [BDL-30084]
- First Aid Suite (US) [PS5-30084]

**Course Objectives:**
Recognize potential brain, spine and pelvic injuries; Know how to treat potential brain, spine and pelvic injuries; Recall first aid practices for broken ribs and sucking chest wounds; Know what first aid to administer for open and closed abdominal injuries

**Runtime:** 14

**Languages Available:**
English
First Aid - Module 08 - Bone Joint and Muscle Injuries (US)

Bone, joint and muscle injuries can be very painful. Victims are counting on you to do everything you can to minimize the risk of further injury and help alleviate pain. Take this course to refresh your memory about what to do for various bone, joint and muscle injuries. Ideal learners are employees who have already taken in-depth first aid training.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Wind Turbine
- First Aid, Health and Wellness
- Construction

Content Suite:
- First Aid Suite (US) (ACET CEU=0.2) (BDL-30084)
- First Aid Suite (US) (PS5-30084)

Course Objectives:
Recognize different types of potential bone, joint and muscle injuries; Know the guidelines for safe splinting; Recognize joint dislocations or sprains and muscle strains and cramps; Know what first aid to perform for joint dislocations; Know the importance of rest, ice, compression and elevation (RICE) for injuries to the joints and muscles

Runtime: 10

First Aid - Module 09 - Sudden Illness (US)

If someone were suddenly to become ill, would you know what was wrong and what to do? Take this module to refresh your memory about general and specific sudden illnesses and treatments. Ideal learners are employees who have already taken in-depth first aid training.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Wind Turbine
- First Aid, Health and Wellness
- Construction

Content Suite:
- Working from Home Suite (BDL-12127)
- First Aid Suite (US) (ACET CEU=0.2) (BDL-30084)
- First Aid Suite (US) (PS5-30084)

Course Objectives:
Recognize the general signs and symptoms of sudden illness; Know the general first aid steps for sudden illness; Recall specific first aid to administer for stroke, respiratory distress, seizures, severe abdominal pain and diabetic emergencies

Runtime: 13
**First Aid - Module 10 - Poisoning (US)**

If you are like most people, you have experienced some type of poisoning or bite in your lifetime, whether it is a mosquito bite or something more serious. Because they are so common, it is important that you are prepared to properly treat them. Take this module to find out how! Ideal learners are employees who have already taken in-depth first aid training.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Wind Turbine
- First Aid, Health and Wellness
- Construction

**Content Suite:**
- Working from Home Suite [BDL-12127]
- First Aid Suite (US) (ACET CEU=0.2) [BDL-30084]
- First Aid Suite (US) [PS5-30084]

**Course Objectives:**
- Recognize when to call the poison control center or medical emergency number in cases of poisoning;
- Recall first aid steps for victims of swallowed or inhaled poisons;
- Know what first aid steps to follow for victims of poison ivy, oak or sumac;
- List the first aid steps for a victim with bites or stings

**Runtime:** 14

**Languages Available:** English

---

**First Aid - Module 11 - Cold and Heat Emergencies (US)**

Cold and heat are conditions we all encounter at some point. Take this module to learn how to prevent cold- and heat-related injuries and illnesses. You will also learn how to recognize symptoms of these emergencies and treat victims. Ideal learners are employees who have already taken in-depth first aid training.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Wind Turbine
- First Aid, Health and Wellness
- Construction

**Content Suite:**
- Working from Home Suite [BDL-12127]
- First Aid Suite (US) (ACET CEU=0.2) [BDL-30084]
- First Aid Suite (US) [PS5-30084]

**Course Objectives:**
- Recognize the symptoms of medical conditions related to cold and heat;
- Know the first aid procedures for hypothermia and frostbite;
- Know the first aid procedures for heat cramps, heat exhaustion and heat stroke

**Runtime:** 8

**Languages Available:** English
First Aid - Stress

Stress is a phenomenon that each one of us experiences. Even though stress is part of our everyday life, excessive stress can affect personal health and emotional stability. It can also affect our overall quality of life by reducing productivity or by creating or aggravating health problems. This course highlights types of stress and provides immediate and long-term ways to reduce stress.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Working from Home/Remote
- First Aid, Health and Wellness

Course Objectives:
- Define stress;
- Recognize the differences between good stress and bad stress;
- Recognize the differences between stress and anxiety;
- Recall how to reduce stress quickly;
- Recall practices to keep long-term stress low and manageable

Runtime: 19

First Aid Awareness

Incidents requiring first aid can happen anywhere and at any time. The first response to such an incident is the most important. First aid given at the scene can improve the chances of survival and recovery of a victim. This course presents ways to respond to basic first aid situations until the emergency medical services (EMS) personnel arrive.

Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Working from Home/Remote
- Wind Turbine
- Awareness and Microlearning
- First Aid, Health and Wellness

Content Suite:
- Working from Home Suite (BDL-12127)

Course Objectives:
- Explain when you might be held accountable for a victim’s outcome;
- Assess scenes and victims before providing first aid;
- Provide valuable information to emergency medical services (EMS);
- Recall guidelines about when and how to move victims;
- Know the steps of basic first aid, including cardiopulmonary resuscitation and bleeding control

Runtime: 17
Flammable and Combustible Liquids

Petroleum is a flammable liquid, and practically everyone uses it to fuel their cars. But flammable and combustible liquids are dangerous. Something as simple as whether or not you promptly put a liquid in a flammable liquid storage cabinet can be a matter of life or death. This course covers risks associated with flammable and combustible liquids, and general safety procedures such as proper storage and use. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Warehouse Safety
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress
- Chemicals, Substances and Hazard Communication

Content Suite:
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]
- HAZWOPER 8-Hr Supplemental Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.3) [BDL-12112]
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) [BDL-12111]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]

Course Objectives:
Define the properties of flammable and combustible liquids; Explain the risks associated with flammable and combustible liquids; Select correct general safety procedures for working around flammable and combustible liquids; Identify proper storage methods for flammable and combustible liquids; Recognize violations of flammable and combustible liquid safety principles and procedures

Runtime: 20

Flammable and Combustible Liquids Awareness

Petroleum is a flammable liquid, and practically everyone uses it to fuel their cars. But flammable and combustible liquids are dangerous. Something as simple as whether or not you promptly put a liquid in a flammable liquid storage cabinet can be a matter of life or death. This course covers risks associated with flammable and combustible liquids, and general safety procedures such as proper storage and use. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Warehouse Safety
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress
- Awareness and Microlearning
- Chemicals, Substances and Hazard Communication

Course Objectives:
Define the properties of flammable and combustible liquids; Explain the risks associated with flammable and combustible liquids; Select correct general safety procedures for working around flammable and combustible liquids; Identify proper storage methods for flammable and combustible liquids; Recognize violations of flammable and combustible liquid safety principles and procedures

Runtime: 11
Food Service and Distribution - HACCP Overview (US)

The Centers for Disease Control and Prevention (CDC) estimates that, every year, millions of people in the United States become ill from pathogens in food. The number of illnesses would be even higher if the Food and Drug Administration had not adopted a food safety program focused on preventing hazards that cause foodborne illnesses by applying science-based controls at every critical point in the process, from raw materials to finished products. This program is appropriately called Hazard Analysis and Critical Control Points, or HACCP. This training provides an overview of the HACCP process. Ideal learners are anyone who works in or is associated with food service and distribution.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Food Services and Distribution Safety

Course Objectives:
- Recognize what HACCP is, its purpose and to whom it applies
- Recall the seven principles of HACCP, in order
- Recall the elements and practices of active managerial control, including HACCP

Runtime: 16

Forklift Awareness

Powered industrial trucks like forklifts are used every day to lift and move equipment or materials. Because of the high risk of injury and even death while operating a powered industrial truck, some use and training recommendations have been developed to improve safety. This training is ideal for all workers who operate or supervise the operation of forklifts.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing

- Warehouse Safety
- Awareness and Microlearning

Course Objectives:
- State the most common causes of forklift injuries and fatalities
- Identify key elements for safe operation of a forklift, including stability and load handling
- Recognize the most important considerations for stopping a lift and/or ending a shift

Runtime: 12

Formaldehyde (US)

Formaldehyde is commonly used in anatomy labs, medical research and teaching facilities as a tissue preservative or as an organic chemical reagent. This course will inform you of the health risks, precautions and handling procedures you need to know when working with formaldehyde.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Laboratory Safety

- Construction
- Chemicals, Substances and Hazard Communication

Course Objectives:
- The uses of formaldehyde
- Potential health effects of formaldehyde
- How to handle formaldehyde safely
- Personal protective clothing and appropriate equipment
- How to respond to a chemical spill
- When medical surveillance may be necessary

Runtime: 16
**Giving and Receiving Feedback**

No one likes to be the target of being told they are doing something incorrectly or provided unconstructive criticism. But there are ways you can both give and receive feedback that will make such conversations more engaging and productive instead of defensive and emotional. Take this course to learn best practices for giving and receiving feedback effectively. Ideal learners are managers, supervisors and safety committee members.

**Format:** eLearning - Claro

**Libraries:**  
- Safety Catalog

**Topic/Industry:**  
- Health and Safety Management
- Management Skills

**Content Suite:**  
- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3) (BDL-12117)  
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)  
- Why Incident Management Matters (WIMM) Suite (PS5-30009)  
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)  
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

**Course Objectives:**  
Recognize unproductive ways to react to feedback;Recall how to give and receive feedback in a positive, productive way;Recognize the characteristics of effective feedback

**Runtime:** 15

---

**Hand and Power Tool Safety**

Most of us use tools in our daily work. But do you realize how dangerous tools can be if they are not handled correctly? This training focuses on the importance of hand and power tool safety, the hazards that can lead to injuries and deaths, and the precautions needed to work safely with these tools. Ideal learners include anyone who works with tools.

**Format:** eLearning - Claro

**Libraries:**  
- Safety Catalog

**Topic/Industry:**  
- General Safety and Manufacturing
- Wind Turbine
- Hot Work, Fire Watch and Welding
- Ergonomics and Office Safety
- Tools

**Course Objectives:**  
Recall the kinds of injuries associated with hand and power tools;Identify the hazards associated with hand and power tools;Describe general precautions to take when using hand and power tools;Describe specific precautions to take with various categories of hand and power tools

**Runtime:** 28
Hand and Power Tool Safety Awareness

Most of us use tools in our daily work. But do you realize how dangerous tools can be if they are not handled correctly? This training focuses on the importance of hand and power tool safety, the hazards that can lead to injuries and deaths, and the precautions needed to work safely with these tools. Ideal learners are anyone who works with hand or power tools.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Hot Work, Fire Watch and Welding
- Ergonomics and Office Safety
- Tools
- Awareness and Microlearning

Course Objectives:
Recall the injuries associated with hand and power tools; Identify the hazards associated with hand and power tools; Describe precautions to take when using hand and power tools

Runtime: 15

Hand Tool Safety for Construction

Using the correct hand tools in a safe way can help you avoid injuries. Take this course to find out about both general and specific hand tool hazards and precautions. This course is ideal for all construction workers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Wind Turbine
- Hot Work, Fire Watch and Welding
- Tools

Content Suite:
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- Hand and Power Tool Safety for Construction, Parts 1-2 [PS5-30071]  

Course Objectives:
Identify the hazards associated with hand tools; Recall precautions for using hand tools

Runtime: 15
Hand, Wrist and Finger Safety

Enjoying your hobbies. Checking your phone. Getting ready in the morning. Your hands help you do a remarkable variety of tasks. Throughout the workday, your hands can encounter any number of hazards. Fortunately, many hand and wrist injuries are preventable. This course will present potential hand, wrist and finger hazards, as well as the steps to take to avoid them. Ideal learners include all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Warehouse Safety
- Hot Work, Fire Watch and Welding
- Ergonomics and Office Safety

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) (BDL-12009)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12107)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) (BDL-12102)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (BDL-12060)

Course Objectives:
Recall common types of injuries to hands, wrists and fingers; Recognize hazards to hands, wrists and fingers; Recall how to avoid injuring hands, wrists and fingers; Know what factors to consider when wearing gloves

Runtime: 20

Hand, Wrist and Finger Safety Awareness

Your hands help you do a remarkable variety of tasks. Throughout the workday, your hands can encounter any number of hazards. Fortunately, many hand and wrist injuries are preventable. This course will present potential hand, wrist and finger hazards, as well as the steps to take to avoid them. Ideal learners include all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Warehouse Safety
- Hot Work, Fire Watch and Welding
- Ergonomics and Office Safety
- Awareness and Microlearning

Course Objectives:
Give examples of situations in your work that are potentially hazardous to the hands, wrists and fingers; Choose appropriate precautions to take to protect your hands, wrists and fingers; Discuss how certain types of movements can cause ergonomic problems

Runtime: 11
Handwashing Awareness

We wash our hands every day because keeping our hands free of germs and chemicals helps us avoid disease and illness. But are we washing them effectively? Take this course to learn how and when to wash your hands and how proper glove use benefits your health. This course is ideal for all workers.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Working from Home/Remote
- Awareness and Microlearning
- First Aid, Health and Wellness

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Identify reasons handwashing is important; Recall situations that require handwashing; Know techniques for proper handwashing; Recall guidelines for washing your hands when using gloves

Runtime: 11

Hazard Communication - Labels (US)

Labels keep us in the know all the time - they inform our diet decisions, they ensure we take the right medicines in the right amounts, and they keep us safe at heights and in tight spaces. The purpose of the GHS is to increase the quality and consistency of information provided to workers, employers and chemical users by adopting a standardized approach to hazard classification, labels and Safety Data Sheets.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Course Objectives:
The basic elements of a label under the GHS; The labeling precedence scheme when multiple hazards are present; Upcoming dates for compliance with GHS labeling requirements

Runtime: 9

Hazard Communication - Pictograms (US)

Hazards are universal and languages are not. To keep individuals safe in workplaces throughout the world, standardized symbols called pictograms have been created to communicate hazards in a consistent manner from workplace to workplace and from country to country. This mini-module covers pictograms and the hazards associated with them, as encountered on labels and Safety Data Sheets (SDSs).

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Course Objectives:
Recognize pictograms; Recall the specific pictograms associated with specific hazards

Runtime: 4
Hazard Communication - Safety Data Sheets (US)

When you are working with a hazardous chemical, you need to know what it is, what it does and how to stay safe around it. Safety Data Sheets (SDSs) explain the necessary information to keep you safe around hazardous substances. This course explains SDSs to managers and front-line workers in industries and environments that require the use of hazardous substances.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing, Chemicals, Substances and Hazard Communication

Course Objectives:
Recall how information is laid out in an SDS; Use an SDS to find information about how to work safely around a chemical; Identify SDS requirements for both users and producers

Runtime: 9

Hazard Communication (US)

Workers are exposed to hazardous chemical products every day. This poses serious problems for exposed workers and their employers. Hazard Communication (HazCom) training is designed to provide workers with the information they need to recognize and avoid hazardous chemicals. This course will introduce learners to everything from the content of the HazCom Standard to how to use Safety Data Sheets (SDSs) and chemical labels to prepare for hazards or react to exposures. Ideal learners are employees who work with or around hazardous chemicals.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing, Wind Turbine, Chemicals, Substances and Hazard Communication

Content Suite:
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (BDL-12061)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12108)
- General Industry Safety Program (IACET CEU=1.1) (BDL-12132)

Course Objectives:
State the purpose of the HazCom Standard; Recognize who is covered by the HazCom Standard; State the four basic parts of the HazCom Standard; Identify physical and health hazards of chemicals; List what items should be included in a hazardous chemical inventory; Recognize what should be included in the written hazard communication program; Recognize the information contained in a Safety Data Sheet (SDS) and how it is used and maintained in the workplace; Identify where and how hazard warning labels must be used; List the elements of the HazCom Standard training program

Runtime: 26
Hazard Communication Awareness (US)

Workers are near hazardous chemical products every day. This poses serious problems for workers and their employers. Hazard Communication (HazCom) training is designed to provide workers with the information they need to recognize and avoid exposure to hazardous chemicals. This course will introduce learners to the HazCom Standard as well as demonstrate how Safety Data Sheets (SDSs) and chemical labels help workers to prepare for hazards and react to exposures.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing, Awareness and Microlearning, Chemicals, Substances and Hazard Communication

Content Suite: Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:

State the purpose and basic sections of the HazCom Standard; Identify general responsibilities established by the HazCom Standard; Use Safety Data Sheets to identify physical and health hazards; Identify where and how hazard warning labels must be used.

Runtime: 16

Hazard Communication for California (US)

Workers are exposed to hazardous chemical products every day. This poses serious problems for exposed workers and their employers. Hazard Communication (HazCom) training is designed to provide workers in California with the information they need to recognize and avoid hazardous chemicals. This course will introduce learners to the content of Proposition 65 and the federal and California HazCom Standards. It will also explain how to use Safety Data Sheets (SDSs) and chemical labels to prepare for hazards or react to exposures. This course is ideal for all employees in California.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing, Chemicals, Substances and Hazard Communication

Course Objectives:

State the purpose of the Hazard Communication (HazCom) Standard; Recognize who is covered by the HazCom Standard; State the four basic parts of the HazCom Standard; Identify physical and health hazards of chemicals; List what items should be included in a hazardous chemical inventory; Know what California's Proposition 65 is; Recognize what should be included in the written hazard communication program; Recognize the information contained in a Safety Data Sheet (SDS) and how it is used and maintained in the workplace; Identify where and how hazard warning labels must be used; List the elements of the HazCom Standard training program.

Runtime: 27
Hazardous chemicals are present on most construction sites and put the workers who use them or who are around them at risk. This Hazard Communication, also called HazCom, training will provide you with the information you need to understand labels and safety data sheets (SDSs). Your company may enhance this online course with additional company, jobsite and chemical-specific information. This course is ideal for all construction workers.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Construction

Chemicals, Substances and Hazard Communication

Content Suite:
- Hazard Communication for Construction, Parts 1-2 (US) [PS5-30066]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (BDL-12060)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12107)

Course Objectives:
Identify where and how to use hazard warning labels; Know what information is in a safety data sheet (SDS)

Runtime: 12

Hazard Communication for Construction: Written Program (US)

Every jobsite is unique, but how we communicate about hazards should be the same no matter where you work. That is why OSHA has a Hazard Communication Standard! In this course, you will learn about what is included in every written program and what you should expect in terms of responsibilities and training. This course is ideal for all construction workers.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Construction

Chemicals, Substances and Hazard Communication

Content Suite:
- Hazard Communication for Construction, Parts 1-2 (US) [PS5-30066]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (BDL-12060)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12107)

Course Objectives:
Know the purpose and contents of the Hazard Communication (HazCom) Standard; Classify the physical and health hazards of chemicals; Recognize the responsibilities of chemical manufacturers, chemical importers and companies; Recognize the types of information in a written hazard communication program; Know what training and information to expect after this training

Runtime: 12
Hazardous Chemical Information

Workers are near hazardous chemical products every day. This poses serious problems for potentially exposed workers and their employers. Hazard identification and classification training is designed to provide workers with the information they need to recognize and avoid hazardous chemicals. This course will introduce learners to everything from the content of a hazardous chemical information program to how to use Safety Data Sheets (SDSs) and chemical labels to prepare for hazards or react to exposures. Ideal learners are all employees who may be exposed to hazardous chemicals.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]

Course Objectives:
State the purpose of a hazardous chemical information program; Recognize who hazardous chemical information applies to; State four basic parts of a hazardous chemical information program; Identify physical and health hazards of chemicals; List what items should be included in a hazardous chemical inventory; Recognize what should be included in a written hazardous chemical information program; Identify where and how hazard warning labels must be used; Recognize the information contained in a Safety Data Sheet (SDS) and how it is used and maintained in the workplace; List best practices for employee information and training

Runtime: 21

Hazardous Chemical Information - Labels

Labels keep us informed all the time. Labels inform our diet decisions, ensure we take the right medicines in the right amounts, and keep us safe at heights and in tight spaces. In the workplace, labels communicate hazards, precautions and exposure treatment for hazardous substances.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Course Objectives:
Recall the basic elements of a label under the GHS; Use the basic elements to acquire information about a labeled hazardous substance; Recognize the labeling precedence scheme when multiple hazards are present

Runtime: 7

Hazardous Chemical Information - Pictograms

Hazards are universal but languages are not. To keep individuals safe in workplaces throughout the world, standardized symbols called pictograms have been created to communicate hazards in a consistent manner from workplace to workplace and from country to country. This mini-module covers pictograms and the hazards associated with them, as encountered on labels and Safety Data Sheets (SDSs).

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Course Objectives:
Recognize pictograms; Recall the specific pictograms associated with specific hazards

Runtime: 5
Hazardous Chemical Information - Safety Data Sheets

When you are working with a hazardous chemical, you need to know what it is, what it does and how to stay safe around it. Safety Data Sheets (SDSs) are being harmonized throughout the world to maintain a consistent and thorough explanation of necessary information to keep you safe around hazardous substances. This course explains SDSs to managers and front line workers in industries and environments that require the use of hazardous substances.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Course Objectives:
- Recognize the purpose of SDSs
- Recall how information is laid out in an SDS
- Use an SDS to find information about how to work safely around a chemical
- Identify SDS requirements for both users and producers

Runtime: 10

Hazardous Chemical Information Awareness

Workers are exposed to hazardous chemical products every day, and this poses serious problems for exposed workers and their employers. Hazard identification and classification training is designed to provide workers with the information they need to recognize and avoid hazardous chemicals. This awareness course will introduce learners to everything from the content of a hazardous chemical information program to the Globally Harmonized System of Classification and Labeling of Chemicals (GHS) to how to use Safety Data Sheets (SDSs) and chemical labels to prepare for hazards or react to exposures. Ideal learners are all employees who may be exposed to hazardous chemicals.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication
- Awareness and Microlearning

Course Objectives:
- State the purpose of a hazardous chemical information program
- State the purpose of the Globally Harmonized System of Classification and Labelling of Chemicals (GHS)
- Recognize what should be included in a written hazardous chemical information program
- Identify how hazard warning labels and Safety Data Sheets (SDSs) are used

Runtime: 12

Hazardous Waste Minimization and Disposal

The decisions we make about how to minimize and dispose of hazardous waste can affect our environment, our profitability, and our health and safety. Take this course to learn how you can help reduce waste and handle it appropriately. This course is ideal for all workers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Environmental
- Chemicals, Substances and Hazard Communication

Course Objectives:
- Identify hazardous waste
- Know your role in the hazardous waste management process
- Recall strategies and best practices for hazardous waste minimization
- Know three methods of hazardous waste disposal

Runtime: 14
Because of the risks and dangers associated with shipping hazardous materials, the U.S. Department of Transportation's Pipeline and Hazardous Materials Safety Administration and its supporting agencies regulate the transport of these materials within the US and ensure we comply with the Hazardous Materials Regulations (or the HMR).

**Course Objectives:**
- Identify proper shipping names
- Know how to decipher the codes within the HMT
- Utilize Appendices A and B of the HMT to determine which materials qualify as a hazardous substance or marine pollutant

**Runtime:** 28

---

**HAZMAT Transportation - Part 2 - Shipping Papers (US)**

Shippers are responsible for documenting information about hazardous materials before offering them for transport. This module covers the components of a properly prepared shipping paper.

**Course Objectives:**
- Identify the information required on shipping papers
- Recognize the correct entries for the shipping and basic descriptions
- Identify shipping paper and certification exceptions
- Select the appropriate retention requirements for shipping papers

**Runtime:** 23
HAZMAT Transportation - Part 3 - Packaging (US)

If given the task of packaging or inspecting and accepting hazardous materials for transportation, could you do so in compliance with HMR (Hazardous Materials Regulations) packaging requirements? Your employer wants to make sure you can, since the DOT and its designated agencies regulate the packaging and transportation of hazardous materials. These agencies also have the authority to inspect hazardous materials packages and fine or penalize you as well as your employer for any HMR violations. Module 3 covers general packaging requirements.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Chemicals, Substances and Hazard Communication
- Driver and Transportation Safety

Content Suite:
- DOT/EPA Hazardous Materials Suite (IACET CEU-0.5) [BDL-01230]
- HazMat Transportation Suite (US)(IACET CEU-0.4) [BDL-12124]
- HazMat Transportation, Parts 1-7 (US) [PS5-30111]

Course Objectives:
- Identify the packaging requirements and exceptions for hazardous materials
- Determine which types of packages and materials are forbidden from transportation
- Recall the requirements for reusing packaging, as well as for transporting leaking or damaged packages and empty packaging

Runtime: 27

HAZMAT Transportation - Part 4 - Marking (US)

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Chemicals, Substances and Hazard Communication
- Driver and Transportation Safety

Content Suite:
- DOT/EPA Hazardous Materials Suite (IACET CEU-0.5) [BDL-01230]
- HazMat Transportation Suite (US)(IACET CEU-0.4) [BDL-12124]
- HazMat Transportation, Parts 1-7 (US) [PS5-30111]

Course Objectives:
- Explore how to mark bulk and non-bulk packages
- Detail special provisions and exceptions in marking certain types of hazardous materials and packaging
- Identify general marking requirements
- Describe special provisions for marking hazardous materials
- Determine when exceptions apply to marking hazardous materials

Runtime: 23
HAZMAT Transportation - Part 5 - Labeling and Placarding (US)

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Chemicals, Substances and Hazard Communication

Driver and Transportation Safety

Content Suite:
- DOT/EPA Hazardous Materials Suite (IACET CEU-0.5) (BDL-01230)
- HazMat Transportation Suite (US) (IACET CEU-0.4) (BDL-12124)
- HazMat Transportation, Parts 1-7 (US) (PS5-30111)

Course Objectives:
Identify the general requirements for affixing labels and placards to hazardous material (HAZMAT) shipments; Determine when exceptions to these requirements apply as well as when modifications can be made to labels and placards; Use the labeling and placarding tables to select the appropriate labels and placard for hazardous materials

Runtime: 29

HAZMAT Transportation - Part 6a - Carrier Requirements - Highway (US)

This series of Hazardous Materials Transportation e-Lessons provides general awareness training for the U.S. Department of Transportation's (USDOT) Hazardous Materials Regulations. Module 6 is composed of four parts; Module 6a covers Highway Carrier Requirements.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Chemicals, Substances and Hazard Communication

Driver and Transportation Safety

Content Suite:
- DOT/EPA Hazardous Materials Suite (IACET CEU-0.5) (BDL-01230)
- HazMat Transportation Suite (US) (IACET CEU-0.4) (BDL-12124)
- HazMat Transportation, Parts 1-7 (US) (PS5-30111)

Course Objectives:
Identify the general Highway Carrier Requirements; Determine segregation requirements for hazardous materials; Select the appropriate methods of loading, unloading and transporting hazardous materials

Runtime: 22
When it comes to transporting hazardous materials by air, Part 175 of the Hazardous Materials Regulations or HMR provides air carriers with the specific requirements they need to accept, handle and transport hazardous materials.

**Course Objectives:**
- Recognize how shippers and carriers must work together to comply with HMR requirements
- Identify which hazardous materials are authorized for air transportation
- Determine the quantity limitation, stowage and segregation requirements for transporting hazardous materials aboard passenger and cargo aircraft

Runtime: 30

The DOT (Department of Transportation) identifies requirements for transporting hazardous materials by rail in Part 174 of the HMR (Hazardous Materials Regulations).

**Course Objectives:**
- Recall the documentation, inspection and movement requirements for hazardous materials by rail
- Identify proper HAZMAT handling and loading requirements
- Determine how to segregate hazardous materials and position rail cars containing these materials

Runtime: 21
HAZMAT Transportation - Part 6d - Carrier Requirements - Water (IMDG) (US)

In this module, we will focus on the actions we can take to protect our waters and marine life when transporting hazardous materials by any type of vessel or ship.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Chemicals, Substances and Hazard Communication
- Driver and Transportation Safety

Content Suite:
- DOT/EPA Hazardous Materials Suite (IACET CEU=0.5) [BDL-01230]
- HazMat Transportation Suite (US) (IACET CEU=0.4) [BDL-12124]
- HazMat Transportation, Parts 1-7 (US) [PS5-30111]

Course Objectives:
Determine who is responsible for preparing HAZMAT packages, shipping documentation and the vessel for transportation; Select the stowage location of hazardous materials according to the segregation restrictions; Identify the appropriate handling, loading, unloading and inspection requirements for hazardous materials.

Runtime: 28

HAZMAT Transportation - Part 7 - Security Awareness (US)

Hazardous materials are vulnerable when they are in transit. Imagine what would happen if criminals or terrorists were able to obtain dangerous chemicals and materials! Take this course to find out what you can do to prevent that from happening. Ideal learners include people who work at companies involved in the packaging, shipment, transportation and distribution of hazardous materials.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Chemicals, Substances and Hazard Communication
- Driver and Transportation Safety

Content Suite:
- Commercial Drivers Suite (IACET CEU=0.4) [BDL-12055]
- DOT/EPA Hazardous Materials Suite (IACET CEU=0.5) [BDL-01230]
- HazMat Transportation Suite (US) (IACET CEU=0.4) [BDL-12124]
- HazMat Transportation, Parts 1-7 (US) [PS5-30111]

Course Objectives:
Recall security requirements for people who handle hazardous materials; Identify potential targets for hazardous material terrorism; Identify potential threats of hazardous material terrorism; Recognize the key factors that go into planning a safe route for hazardous materials transportation; Recognize ways to prevent hazardous materials from getting into the wrong hands; Use security checklists to identify and resolve security vulnerabilities.

Runtime: 27
## HAZMAT Transportation Awareness (US)

In the United States, we ship millions of tons of hazardous materials (HAZMAT) every day. These materials can be poisonous, toxic, flammable, explosive or corrosive by nature. Take this course to learn basic information about how to identify and safely handle hazardous materials, all while complying with federal laws and regulations. This course may be taken for general familiarization and is also ideal for employees who are involved in shipping, packaging or transporting hazardous materials.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Awareness and Microlearning
- Chemicals, Substances and Hazard Communication
- Driver and Transportation Safety

**Course Objectives:**
- What hazardous materials and associated risks are
- How they are transported
- How they are regulated
- What responsibilities employers, handlers, shippers and carriers have

**Runtime:** 10

---

## HAZWOPER First Responder Awareness (US)

First responders at the awareness level play an important role in emergencies involving hazardous substances. The information they report helps to prepare the personnel who will contain materials, address fires and explosions and treat victims. Take this course to learn more about hazardous substances, how to recognize and identify them and what to do when you encounter an emergency in which they are involved. This course is ideal for industrial workers and their managers who aspire to become a responder or better understand what the role entails.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Chemicals, Substances and Hazard Communication
- General Safety and Manufacturing

**Course Objectives:**
- Recall what hazardous substances are and their associated risks
- Identify the role of first responders at the awareness level in emergencies that involve hazardous substances
- Recognize and identify hazardous substances and potential hazards in an emergency

**Runtime:** 21
HAZWOPER Refresher Training - Module 1 - Scope, Application and Training Requirements (US)

This course is designed for professionals who engage in hazardous waste/substance operations and/or hazardous materials emergency response, and who have previously completed the 24-hour or 40-hour HAZWOPER certification course. The 13 parts in this suite address annual refresher training topics required by OSHA with 5.5 hours of instructional time in support of the overall 8-hour annual refresher requirement.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Content Suite:
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) [BDL-12111]
- HAZWOPER Refresher Training, Modules 1-13 (US) [PS5-30017]

Course Objectives:
- Define key terms relating to Hazardous Waste Operations and Emergency Response, or HAZWOPER
- Identify the laws that regulate hazardous waste and the agencies that enforce them
- Describe the operations that are covered by the HAZWOPER Standard (that is, the scope of the standard)
- List what you are responsible for knowing about HAZWOPER
- State what training you must receive for your level of involvement in HAZWOPER

Runtime: 34

Languages Available:
- English
- Spanish (Latin America) (PS5-102492)

------------------------

HAZWOPER Refresher Training - Module 10 - Spill Prevention (US)

This is Part Ten of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Ten covers spill prevention. Those working in hazardous waste operations and emergency response need to know how to prevent spills or leaks of hazardous materials and how to respond if or when they do occur. Prompt and proper action can mean the difference between an emergency and a disaster.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Content Suite:
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) [BDL-12111]
- HAZWOPER Refresher Training, Modules 1-13 (US) [PS5-30017]

Course Objectives:
- Identify key preventive measures for spills and releases
- Discuss basic precautions for handling drums and containers
- List general steps to take in spill response
- Give examples of physical and chemical methods of leak control

Runtime: 25

Languages Available:
- English
- Spanish (Latin America) (PS5-102585)
HAZWOPER Refresher Training - Module 11 - Site Control (US)

This is Part 11 of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part 11 covers site control. If uncontrolled, a spill or release of hazardous waste could spread rapidly, leading to contamination on a large scale. For this reason, site control is required on a hazardous waste site. Site control helps limit the spread of contamination in the event of a spill or release of a hazardous substance and is a critical component of the HAZWOPER standard. The site control program is designed to reduce the spread of hazardous substances from contaminated areas to clean areas, to identify and isolate contaminated areas of the site, to facilitate emergency evacuation and medical care, to prevent unauthorized entry to the site, and to deter vandalism and theft. This module examines the elements of a site control program and how they can be implemented.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Content Suite:
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) (BDL-12111)
- HAZWOPER Refresher Training, Modules 1-13 (US) (PS5-30017)

Course Objectives:
- Identify the elements of a site control program;
- Discuss how these site control program elements are used to prevent contamination

Runtime: 17

HAZWOPER Refresher Training - Module 12 - Decontamination (US)

This is Part 12 of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part 12 covers decontamination, an important set of procedures designed to protect the environment, emergency responders, and other people from exposures or contamination resulting from a hazardous materials incident. This module presents the basics of decontamination to prevent the spread of hazardous materials to people and the environment.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Content Suite:
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) (BDL-12111)
- HAZWOPER Refresher Training, Modules 1-13 (US) (PS5-30017)

Course Objectives:
- Regulatory requirements for decontamination;
- How personnel contamination occurs;
- Common decontamination procedures

Runtime: 17
HAZWOPER Refresher Training - Module 13 - Emergency Response (US)

This is Part 13 of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. This final module of our HAZWOPER training deals with emergency response. Emergency incidents are actual or potential spills or releases of hazardous materials into the environment. Because the possibility of damage to people, property and the environment is so serious, prompt and proper emergency response is critical. Training in safe emergency response practices will reduce the chances of harm to people or property. All organizations must plan for emergencies. Depending on operations, formal HAZWOPER emergency response planning may be required and that is covered in this module.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing
              Chemicals, Substances and Hazard Communication

Content Suite:
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) [BDL-12111]
- HAZWOPER Refresher Training, Modules 1-13 (US) (PS5-30017)

Course Objectives:
Differentiate between on-site and off-site emergencies; Describe how to conduct preplanning for emergencies; Discuss personnel considerations in the event of an emergency; Identify the elements of an emergency response plan

Runtime: 21

HAZWOPER Refresher Training - Module 2 - Environmental Issues for HAZWOPER (US)

Hazardous waste operations and emergency response need to be conducted in an environmentally responsible manner and in compliance with all applicable environmental laws and regulations. This is Part Two of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Two covers operations that are regulated by the U.S. Environmental Protection Agency (EPA) and reviews environmentally responsible ways of dealing with industrial waste to prevent pollution from hazardous waste.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing
              Chemicals, Substances and Hazard Communication

Content Suite:
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) [BDL-12111]
- HAZWOPER Refresher Training, Modules 1-13 (US) (PS5-30017)

Course Objectives:
Environmental issues of concern in hazardous waste operations and emergency response: Hazardous waste; Non-hazardous waste; Industrial wastewater; Stormwater; Best management practices (BMPs) for dealing with industrial waste

Runtime: 25
HAZWOPER Refresher Training - Module 3 - Hazard Communication: Your Right to Know (US)

This is Part Three of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Three covers Hazard Communication (HazCom), which provides workers with the information they need to know in order to understand the hazards and identities of the chemicals they may be exposed to when working.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing, Chemicals, Substances and Hazard Communication

Content Suite:
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) (BDL-12111)
- HAZWOPER Refresher Training, Modules 1-13 (US) (PS5-30017)

Course Objectives:
- State the purpose of the Hazard Communication Standard
- Identify who is covered by the Hazard Communication Standard
- Name the four basic parts of the Hazard Communication Standard
- State the purpose of the Globally Harmonized System of Classification and Labelling of Chemicals (GHS)
- Explain how the HazCom Standard aligns with the GHS
- Identify physical and health hazards of chemicals
- Identify the hazard communication responsibilities of manufacturers, importers and employers
- List what items should be included in a hazardous chemical inventory
- Recognize what should be included in the written Hazard Communication program
- Identify where and how hazard warning labels must be used
- Recognize the information contained in a Safety Data Sheet (SDS) and how it is used and maintained in the workplace
- List the elements of the Hazard Communication Standard training program

Runtime: 27

HAZWOPER Refresher Training - Module 4 - Hazard and Risk Assessment Techniques (US)

This is Part Four of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Four covers hazard and risk assessment. Individuals involved in hazardous waste operations and emergency response need to know and understand what hazards they may encounter in their work environment. They must be trained to identify hazards so that they can first assess them, and then take steps to control them whenever possible. This module examines the different types of hazards, their properties, and systems available for identifying them. It also discusses risk and how to assess the scene of an emergency involving hazardous waste.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing, Chemicals, Substances and Hazard Communication

Content Suite:
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) (BDL-12111)
- HAZWOPER Refresher Training, Modules 1-13 (US) (PS5-30017)

Course Objectives:
- Define hazard, risk and mishap
- Identify the different types of hazards
- Describe the following properties of hazardous materials - toxic, corrosive, flammable and explosive, unstable and reactive, pyrophoric, oxidizers, asphyxiants, cryogenic, and radioactive materials
- Give examples of hazard identification systems and how to use them
- Identify common process equipment hazards
- Summarize how to conduct a hazard assessment of a spill or release scene

Runtime: 37
HAZWOPER Refresher Training - Module 5 - Toxicology (US)

This is Part Five of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Five covers toxicology. Everyone is exposed on and off the job to a variety of chemical substances. Most are not hazardous under ordinary circumstances, but they all have the potential to cause injury at some concentration. How a material is used is the major factor for determining its hazard potential. The module provides an overview of toxicology to help trainees understand the potential effects of the hazardous substances they work with.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Content Suite:
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) [BDL-12111]
- HAZWOPER Refresher Training, Modules 1-13 (US) [PS5-30017]

Course Objectives:
Define toxicology; Use important terminology associated with toxicology; List the routes of entry for toxic exposure; Identify target organs; Describe the possible responses to toxic exposure

Runtime: 28

HAZWOPER Refresher Training - Module 6 - Monitoring and Medical Surveillance (US)

This is Part Six of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Six covers monitoring and medical surveillance. Monitoring helps to determine what protection is needed before exposure to hazardous materials. Medical surveillance allows for the early detection of diseases or conditions caused by exposure to hazardous materials so treatment can be given to prevent further illness.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Content Suite:
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) [BDL-12111]
- HAZWOPER Refresher Training, Modules 1-13 (US) [PS5-30017]

Course Objectives:
What monitoring is; Air monitoring equipment and how it is used; Requirements of a medical surveillance program; Who is covered by the medical surveillance program; What medical examinations are given as part of the program

Runtime: 30
HAZWOPER Refresher Training - Module 7 - Respiratory Protection (US)

This is Part Seven of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Seven covers respiratory protection. Respirators provide vital protection against chemicals and oxygen-deficient atmospheres. For this reason it is critical to know how to select and use the appropriate respirator for the job. All respirators are not created equal; not all of them will provide protection in atmospheres with low oxygen or certain other atmospheric hazards. In this module, those with a role in hazardous waste operations and emergency response will learn how to protect themselves from the breathing hazards they may face.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Content Suite:
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) [BDL-12111]
- HAZWOPER Refresher Training, Modules 1-13 (US) [PS5-30017]

Course Objectives:
State when respirators must be used; Describe what a respiratory protection program is; Identify different types of respirators; Summarize the process for selecting a respirator for emergency response; Explain how to perform a seal check; Discuss how to maintain and care for a respirator

Runtime: 17

HAZWOPER Refresher Training - Module 8 - Personal Protective Equipment (PPE) (US)

This is Part Eight of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Eight covers PPE, personal protective equipment, your last line of defense against hazardous materials in your work environment. Although PPE cannot provide protection from all exposure, when properly selected and worn it can prevent unnecessary harmful exposures. For this reason it is critical to select the appropriate protective equipment for the job.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Content Suite:
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) [BDL-12111]
- HAZWOPER Refresher Training, Modules 1-13 (US) [PS5-30017]

Course Objectives:
PPE selection; Levels of PPE protection and the PPE components applicable to each level

Runtime: 13
HAZWOPER Refresher Training - Module 9 - Confined Spaces (US)

This is Part Nine of a 13-part series of modules on HAZWOPER designed to provide the annual refresher training as required by OSHA for all employees affected by this regulation. Part Nine covers confined spaces. Many work environments contain spaces that are considered confined because their shape and size make conditions difficult for employees who must enter, work in, and exit them. There are many instances where employees who work in confined spaces face increased risk of exposure to serious hazards that could result in serious injury or death. For this reason, special procedures must be followed when working in confined spaces and they are reviewed in this module.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Content Suite:
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) (BDL-12111)
- HAZWOPER Refresher Training, Modules 1-13 (US) (PS5-30017)

Course Objectives:
- Distinguish between permit-required confined spaces and non-permit-required confined spaces
- Identify the hazards associated with confined spaces
- Recall the roles and responsibilities of the confined space entry team
- Identify what is required on an entry permit and other procedural safeguards when conducting a confined space entry
- Know how to respond to emergencies

Runtime: 25

Health Hazards in Construction: Asbestos Awareness

Asbestos can cause serious illness and affect the health of a worker in the long term. This course is designed to provide an awareness of the potential dangers of asbestos and how to control them. Ideal learners are all construction employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Chemicals, Substances and Hazard Communication

Content Suite:
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12107)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)
- Health Hazards in Construction, Parts 1-5 (PS5-30110)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (BDL-12060)
- Construction Industry Safety Program (IACET CEU=0.9) (BDL-12133)

Course Objectives:
- Identify where asbestos may be present on construction sites
- Recall the health effects of asbestos exposure
- Know some basic ways to prevent or limit exposure to asbestos

Runtime: 6
Health Hazards in Construction: Crystalline Silica Awareness

Crystalline silica is present in the sand, stone, concrete, brick and mortar that construction workers may be around every day. It can cause serious illness and affect the health of a worker in the long term. This course was designed to provide an awareness of the potential dangers of silica and how to control them. Ideal learners are all construction employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Chemicals, Substances and Hazard Communication

Content Suite:
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- Health Hazards in Construction, Parts 1-5 [PS5-30110]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
Identify where crystalline silica may be present on construction sites;
Recall the health effects of crystalline silica exposure;
Know some basic ways to prevent or limit exposure to crystalline silica

Runtime: 6

Health Hazards in Construction: Introduction

Workers in the construction industry face a number of health and safety hazards in their worksites every day, including exposure to materials that can cause serious illness and affect the health of a worker in the long term. This course was designed to provide an awareness of the potential dangers of some common materials to which construction workers may be exposed. Ideal learners are all construction employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Chemicals, Substances and Hazard Communication

Content Suite:
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- Health Hazards in Construction, Parts 1-5 [PS5-30110]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
Define the term health hazard;
Recognize health hazards to which you may be exposed at a construction site

Runtime: 3
Health Hazards in Construction: Lead Awareness

Lead can cause serious illness and affect the health of a worker in the long term. This course was designed to provide an awareness of the potential dangers of lead and how to control them. Ideal learners are all construction employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Chemicals, Substances and Hazard Communication

Content Suite:
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- Health Hazards in Construction, Parts 1-5 [PS5-30110]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
Identify where lead may be present on construction sites; Recall the health effects of lead exposure; Know some basic ways to prevent or limit exposure to lead

Runtime: 7

Health Hazards in Construction: Special Concerns

Workers in the construction industry face health and safety hazards in their worksites every day, including exposure to wood dust, solvents and welding or cutting operations. These exposures can cause serious long-term health effects. This course was designed to provide awareness of the potential dangers and how to control them. Ideal learners are all construction employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Chemicals, Substances and Hazard Communication

Content Suite:
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- Health Hazards in Construction, Parts 1-5 [PS5-30110]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
Recall the chemical-related health effects of exposure to wood dust, solvents, and welding and cutting operations; Know some basic ways to prevent or limit exposure to the hazardous conditions caused by wood dust, solvents, and welding and cutting operations

Runtime: 7
Think about the last time you heard news about an information security breach. Chances are that you heard about company embarrassment, outraged consumers and even legal actions and fines. No one wants private information released to people who could misuse or abuse it! That is why the government enacted the Health Insurance Portability and Accountability Act, or HIPAA. This course will provide you with important information about what HIPAA is, how it applies to your job and what happens when there is an information breach. The course is intended for general industry employees.

Format: eLearning - Claro
Libraries:
- Safety Catalog
- Employment Liability
- First Aid, Health and Wellness

Course Objectives:
- Explain what HIPAA and PHI are
- Recognize why HIPAA is important to patients, employers and employees
- Recall how HIPAA applies to most general industry jobs
- Recognize a PHI security breach
- Recall what to do in case of an information breach

Runtime: 23

Hearing Conservation

Did you know that most noise-related hearing loss is completely preventable? In this course you will learn about the noise risks in your workplace and what you need to do to protect your hearing. Ideal learners include all employees who work with noisy tools or equipment or in loud environments.

Format: eLearning - Claro
Libraries:
- Safety Catalog
- General Safety and Manufacturing
- Wind Turbine
- First Aid, Health and Wellness

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

Course Objectives:
- Recognize the effects of noise on hearing
- Recall the components of a hearing conservation program
- Compare the advantages and disadvantages of various types of hearing protection
- Know how to use and care for hearing protection

Runtime: 20
Did you know that most noise-related hearing loss is completely preventable? In this course, you will learn about the noise risks in your workplace and what you need to do to protect your hearing. Ideal learners include all employees who work with noisy tools or equipment or in loud environments.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Content Suite:**
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

**Course Objectives:**
Recognize the effects of noise on hearing; Recall the five components of a hearing conservation program; Compare the advantages and disadvantages of various types of hearing protection; Know how to use and care for hearing protection

**Runtime:** 22

---

Did you know that most noise-related hearing loss is completely preventable? In this course you will learn about the noise risks in your workplace and what you need to do to protect your hearing. Ideal learners include all employees who work with noisy tools or equipment or in loud environments.

- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]

**Course Objectives:**
Recognize the effects of noise on hearing; Compare the advantages and disadvantages of various types of hearing protection

**Runtime:** 11
Heat Stress
It is easy to forget the danger that heat poses to the body, from sunburn and heat rash to heat stroke and death. Whether you work outside on hot days or in a foundry, mine, bakery or any other hot or humid environment, the key to preventing excessive heat stress is knowing the hazards of working in heat and the benefits of implementing proper controls and work practices. You will learn about all of these in this training. Ideal learners include all employees, managers and supervisors.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12109]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12107)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12102]
- HAZWOPER 8-Hr Supplemental Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.3) (BDL-12112)
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) (BDL-12113)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]

Course Objectives:
Know how the body handles heat; Know common health and safety problems associated with heat; Recognize the symptoms of health problems associated with exposure to heat and how to treat them; Know how to reduce the likelihood of heat stress

Runtime: 18

Heat Stress Awareness
It is easy to forget the danger that heat poses to the body, from sunburn and dehydration to heat stroke and death. Whether you work outside on hot days or in a foundry, mine, bakery, or any other hot or humid environment, the key to preventing excessive heat stress is knowing the hazards of working in heat and the benefits of implementing proper controls and work practices. You will learn about all of these in this training. Ideal learners include all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Content Suite:
- General Safety and Manufacturing
- Construction
- Working from Home/Remote
- Wind Turbine
- Warehouse Safety
- Hot Work, Fire Watch and Welding
- First Aid, Health and Wellness

Course Objectives:
Describe how the body handles heat; State common health and safety-related problems associated with heat; Give examples of ways to reduce the likelihood of heat stress

Runtime: 13
Hexavalent Chromium

This course will inform learners about the risks associated with hexavalent chromium as well as steps they can take to protect themselves. Ideal learners are all employees.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Content Suite:**
- OSHA 30: Construction Outreach Training Course (IACET CEU-3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU-3.0) (Actively Proctored) [BDL-12109]

**Course Objectives:**
- Recognize the health risks associated with exposure to hexavalent chromium
- Identify where hexavalent chromium is found
- Recognize who may be exposed to hexavalent chromium
- Recall best practices for hexavalent chromium exposure prevention and control

**Runtime:** 13

Hexavalent Chromium (US)

This course will inform learners about the risks associated with hexavalent chromium as well as steps they can take to protect themselves. Ideal learners are all employees.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Course Objectives:**
- Recognize the health risks associated with exposure to hexavalent chromium
- Identify where hexavalent chromium is found
- Recognize who may be exposed to hexavalent chromium
- Recall best practices for hexavalent chromium exposure prevention and control

**Runtime:** 15

Hot Work

Many destructive fires are caused by hot work, or cutting, welding and other work that generates heat and sparks. When you follow them properly, various recommendations for hot work can help ensure that you and your co-workers stay safe. This course covers hazards, safety precautions, responsibilities and emergency procedures associated with this dangerous work. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Health and Safety Management
- Wind Turbine
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress

Content Suite:
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

Course Objectives:
Determine where hot work is, and is not, allowed; Identify the hazards and safety precautions associated with performing hot work; Separate the responsibilities of individuals involved in hot work; Recall how a hot work permit is used; Know what emergency procedures should be in place for hot work

Runtime: 24

Hot Work (US)

Many destructive fires are caused by hot work or the cutting, welding and other work that generates heat and sparks. Various regulations and codes cover hot work and, when followed properly, help ensure you and your co-workers stay safe. This course covers hazards, safety precautions, responsibilities and emergency procedures associated with this dangerous work. Ideal learners include all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Health and Safety Management
- Wind Turbine
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress

Course Objectives:
Determine where hot work is, and is not, allowed; Identify the hazards and safety precautions associated with performing hot work; Separate the responsibilities of individuals involved in hot work; Discuss how a hot work permit is used; Detect what emergency procedures need to be in place for hot work

Runtime: 30
Hot Work Awareness

Many destructive fires are caused by hot work, which is cutting, welding and other work that generates heat and sparks. Various best practices, company policies, regulations and codes govern hot work and, when followed properly, help ensure you and your co-workers stay safe. This course covers hazards, safety precautions, responsibilities and emergency procedures associated with this dangerous but necessary work. Ideal learners include all employees who perform, supervise or work near hot work.

Format: eLearning - Claro

Libraries: Safety Catalog

Course Objectives:
Recognize hot work; identify the hazards and safety precautions associated with performing hot work; recall how hot work permits define the general responsibilities of individuals involved in hot work; know how a hot work permit is used

Runtime: 11

Hot Work for Construction

Many destructive fires are caused by hot work, which is cutting, welding and other work that generates heat and sparks. Various best practices, company policies, regulations and codes govern hot work and, when followed properly, help ensure you and your co-workers stay safe. This course covers hazards, safety precautions, responsibilities and emergency procedures associated with this dangerous but necessary work. Ideal learners include all construction employees who perform, supervise or work near hot work.

Format: eLearning - Claro

Libraries: Safety Catalog

Content Suite:
Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) (BDL-12009)
Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12107)
OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)
OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (BDL-12060)

Course Objectives:
Define hot work; identify the hazards and safety precautions associated with performing hot work; recall the general responsibilities of individuals involved in hot work; know how a hot work permit is used

Runtime: 17
Housekeeping on the Job

Good housekeeping makes your job easier, more efficient and, most importantly, safer. Take this course to learn some basic housekeeping practices that will help you stay organized and keep workspaces clean. This course is ideal for all workers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Wind Turbine
- Warehouse Safety
- Slips, Trips and Falls
- Fire Extinguisher, Prevention and Egress
- Ergonomics and Office Safety

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- Working from Home Suite [BDL-12127]

Course Objectives:
Recognize the effects and benefits of housekeeping; Identify housekeeping considerations when planning work; Identify housekeeping considerations for designated areas such as those for storage, eating, drinking and smoking; Recall strategies for organizing and storing tools, materials and equipment; Know how to safely perform basic cleaning tasks

Runtime: 17

Hydraulic Safety

Hydraulic systems are extraordinarily powerful. They can lift and crush cars, houses and giant boulders. That kind of force requires strict safety measures to keep people who work on or near hydraulic systems safe. Take this course so that you will be aware of the hazards and ways to prevent accidents and to protect yourself. Ideal learners are employees who use and work around hydraulic equipment and their supervisors. Note that while this course may be used as part of an overall training plan for qualified employees who build, dismantle, maintain and repair hydraulic systems, these audiences need additional in-depth and machine-specific training that is beyond the scope of this course.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Warehouse Safety
- Electrical and LOTO
- Crane and Rigging

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Recognize the hazards associated with hydraulics; Remember that only qualified employees should perform installation and maintenance activities; Identify safety practices to follow during pre-operation hydraulic inspections; Identify signs of impending hose, system and cylinder failure; Recall general safe work practices when using and working around hydraulics; Recall what to do for injuries caused by hydraulic fluid

Runtime: 16
Hydrogen Sulfide (H2S) Awareness

You notice the faint smell of rotten eggs and see a co-worker collapse. Do you know what could be happening? How will you get help for your co-worker and avoid becoming another victim? In this course, you will get the answers to these questions. You will learn about the characteristics and dangers of hydrogen sulfide (H2S) and what to do if you suspect it is present. This training is ideal for workers in general industry, manufacturing and construction.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Awareness and Microlearning
- Chemicals, Substances and Hazard Communication
- General Industry and Manufacturing

Content Suite:
- Advanced Safety Orientation for Construction Industry (ACET CEU=0.9) [BDL-12009]
- Advanced Safety Orientation for Managers and Supervisors in Construction (ACET CEU=2.7) [BDL-12010]
- OSHA 10: Construction Industry Outreach Training Course (ACET CEU=1.0) (Actively Proctored) [BDL-12017]
- OSHA 30: Construction Outreach Training Course (ACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (ACET CEU=3.0) (Actively Proctored) [BDL-12019]
- Advanced Safety Orientation for General Industry (ACET CEU=0.9) [BDL-12074]
- HAZWOPER 8-Hr Supplemental Training 29 CFR 1910.120/29 CFR 1926.65 (ACET CEU=0.3) [BDL-12112]
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (ACET CEU=0.8) [BDL-12111]
- OSHA 10: General Industry Outreach Training Course (ACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (ACET CEU=1.0) (Actively Proctored) [BDL-12108]
- OSHA 10: Construction Industry Outreach Training Course (ACET CEU=1.0) [BDL-12060]

Course Objectives:
- Know what hydrogen sulfide is and why it is dangerous;
- Recognize signs and symptoms that indicate its presence;
- Know what protective measures to use;
- Recall emergency procedures when hydrogen sulfide is present

Runtime: 9

Hydrogen Sulfide Safety Part 1 (US)

Part 1 of this two-part course describes hydrogen sulfide (known as H2S) and emphasizes the critical rules of H2S safety. Any worker who has the potential to be exposed to H2S at or above the exposure limit must receive this training prior to working in that environment and on an annual basis thereafter.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Chemicals, Substances and Hazard Communication
- General Industry and Manufacturing

Content Suite:
- Hydrogen Sulfide Safety, Parts 1-2 (ACET CEU=0.1) [BDL-30010]
- Hydrogen Sulfide Safety Parts 1-2 (US) [ ]

Course Objectives:
- Know what hydrogen sulfide is;
- Know where hydrogen sulfide is found;
- Know the properties and characteristics of hydrogen sulfide

Runtime: 21
Hydrogen Sulfide Safety Part 2 (US)

Part 2 of this two-part course identifies how you can detect, monitor and protect yourself from hydrogen sulfide (H2S). This course also addresses H2S contingency and emergency response plans.

Course Objectives:
- Know the effects of exposure to hydrogen sulfide
- Know how hydrogen sulfide can be detected and monitored
- Recall how to protect oneself from exposure
- Know the contingency and emergency response plans for hydrogen sulfide release
- Recall how to rescue a person who has been exposed and what first aid they need

Runtime: 18

IHS Introduction: Fundamentals of Integrated Health and Safety (US)

This course, comprised of seven instructional modules, provides an understanding of how workplace health and safety programs can be made more impactful and effective by integrating them strategically. Modules 1 through 4 focus on the fundamentals of workplace health and productivity and workplace safety, offering advice on how to create and measure effective health and safety programming. Modules 5, 6 and 7 then offer a roadmap for integrating these programs together for greater impact, including how to create an overarching culture of health and safety. Included is instruction in the use of the Integrated Health and Safety Index, a new tool that helps employers establish, measure and track integrated health and safety programming.

Course Objectives:
- Have a clear understanding of health and productivity management (HPM) and its principal components
- Know the key trends that are advancing the use of HPM in the workplace
- Recognize the impacts of poor health in the workplace
- Know how HPM adds value to the healthcare strategy of an employer

Runtime: 40
IHS Module 2: Impact of Safety in the Workplace (US)

This course will discuss current trends in safety in the United States and why it is imperative for employers to prioritize safety programming. A basic system is offered that helps employers structure their safety efforts with an eye toward sustainability and results. A case study is provided, offering an example of how one employer completely turned around its safety efforts, establishing an award-winning culture of safety.

Format: eLearning - Claro

Libraries: IHS Library

Topic/Industry:
- Health and Safety Management
- Management Skills

Content Suite:
- Fundamentals of Integrated Health and Safety (IHS) (IACET CEU=0.4) [BDL-30058]
- Fundamentals of Integrated Health and Safety (IHS) (US) [PS5-30058]

Course Objectives:
- Identify the trends in workplace fatalities, injuries and illnesses;
- Describe the impact of safety on the workplace;
- Explain how safety programs add value to a company;
- Recall basic systems and processes that go into effective safety programming.

Runtime: 47

IHS Module 3: Measuring Productivity Loss and Using Metrics to Enhance Health (US)

The purpose of Module 3 is to discuss how one measures the total costs of the impact of health on a company. The module discusses the usual costs that are measured, such as medical and pharmacy claims costs, and also identifies those costs that are often not measured, such as absenteeism (sick leave, workers compensation and short- and long-term disability) and presenteeism (being at work but not working to full capacity). Module 3 identifies sources to obtain data to assist employers in understanding the full costs of poor health.

Format: eLearning - Claro

Libraries: IHS Library

Topic/Industry:
- Health and Safety Management
- Management Skills

Content Suite:
- Fundamentals of Integrated Health and Safety (IHS) (IACET CEU=0.4) [BDL-30058]
- Fundamentals of Integrated Health and Safety (IHS) (US) [PS5-30058]

Course Objectives:
- Identify potential data sources for quantifying health and productivity costs;
- Recognize representative metrics used for quantifying health and productivity costs;
- Characterize the features of available health and productivity measurement tools;
- Describe several of the challenges associated with measurement and quantification of health and productivity.

Runtime: 45
IHS Module 4: Using Metrics and Outcome Trends for Enhancing Safety (US)

Module 4 describes how to measure the efforts of an organization to improve the safety of its workforce, explaining that measurement is a crucial phase of sustaining a culture of safety and driving down accident and injury rates. It provides tools that can be used to help this process, including the use of a safety scorecard.

Format: eLearning - Claro

Libraries: IHS Library

Topic/Industry: Health and Safety Management, Management Skills

Content Suite:
- Fundamentals of Integrated Health and Safety (IHS) (IACET CEU-0.4) [BDL-30058]
- Fundamentals of Integrated Health and Safety (IHS) (US) [PS5-30058]

Course Objectives:
- Recognize the role of leading and lagging indicators, key performance indicators (KPIs) and data selection in assessing safety;
- Describe how to implement a basic program of safety measurement;
- Describe how to create sustainability in safety measurement efforts

Runtime: 29

IHS Module 5: Value of Integrating Health and Safety (US)

Module 5 will discuss why it makes sense to view health and safety programming as a unified strategy and provide ideas on how you can begin integrating your health and safety programs in the workplace.

Format: eLearning - Claro

Libraries: IHS Library

Topic/Industry: Health and Safety Management, Management Skills

Content Suite:
- Fundamentals of Integrated Health and Safety (IHS) (IACET CEU-0.4) [BDL-30058]
- Fundamentals of Integrated Health and Safety (IHS) (US) [PS5-30058]

Course Objectives:
- Recognize the rationale for integrating health and safety;
- Recall the key components of integration;
- Identify the dimensions of the integrated health and safety index (IHS);
- Identify the metrics to monitor for ensuring a safe and healthy workplace

Runtime: 31

IHS Module 6: Combining Health and Safety Metrics: The Integrated Health and Safety Index (US)

Module 6 will discuss the Integrated Health and Safety (IHS) Index and the IHS Self-Assessment Tool, and will explain how both are used.

Format: eLearning - Claro

Libraries: IHS Library

Topic/Industry: Health and Safety Management, Management Skills

Content Suite:
- Fundamentals of Integrated Health and Safety (IHS) (IACET CEU-0.4) [BDL-30058]
- Fundamentals of Integrated Health and Safety (IHS) (US) [PS5-30058]

Course Objectives:
- Identify the concepts of the Integrated Health and Safety (IHS) Index;
- Describe in detail the three dimensions of the IHS index;
- Recognize how to use the IHS Self-Assessment Tool

Runtime: 25
IHS Module 7: Creating a Sustainable Culture of Health and Safety (US)

Module 7 will discuss the importance of creating an integrated culture of health and safety and how to go about establishing such a culture.

Format: eLearning - Claro

Libraries:
- IHS Library

Topic/Industry:
- Health and Safety Management
- Management Skills

Content Suite:
- Fundamentals of Integrated Health and Safety (IHS) (IACET CEU=0.4) [BDL-30058]
- Fundamentals of Integrated Health and Safety (IHS) (US) [PS5-30058]

Course Objectives:
Recognizing why it is necessary to build an overarching culture of health and safety in your organization;
Recalling an 8-step process for building a culture of health and safety;
Recognizing why population health management and overall well-being are fundamental to creating cultures of health and safety;
Identifying how to create a metrics framework for measuring results as you integrate your health and safety programming

Runtime: 37

- Fundamentals of Integrated Health and Safety (IHS) (US) [PS5-30058]

Runtime: 5
Incident Investigation

Have you ever heard the old expression that the definition of insanity is doing the same thing over and over and expecting different results? We can apply that expression to safety in the case of companies that keep doing the same things over and over but somehow expect that their workplaces will somehow become safer. The bottom line is that we have to look at what we are doing and figure out how we can improve. That is why we have incident investigation and causal analysis! This course will explain how you can turn safety incidents into opportunities for continuous improvement. You will learn about how to gather information, find underlying causes and take corrective actions. This course is intended for all industries and construction employees, including managers.

Format: eLearning - Claro

Libraries:
- Safety Catalog
  - Health and Safety Management
  - Management Skills

Content Suite:
- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3) [BDL-12117]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- Why Incident Management Matters (WIMM) Suite [PS5-30009]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
- Define concepts and terms associated with incident investigation
- Know why incident investigation and causal analysis are important
- Identify why incident investigation matters, when it occurs and who is involved
- Know how to apply best practices for gathering information when an incident occurs
- Keep asking why to perform causal analysis
- Recall what to do once investigations are complete

Runtime: 24

Incident Investigation Awareness

We have to look at what we are doing and figure out how we can improve. That is why we have incident investigation and causal analysis! This course will explain how you can turn safety incidents into opportunities. You will learn about how to gather information, find underlying causes and take corrective actions. This course is intended for all industries and employees, including managers.

Format: eLearning - Claro

Libraries:

  - Awareness and Microlearning

Content Suite:
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]

Course Objectives:
- Know why incident investigation and causal analysis are important
- Identify why incident investigation matters, when it occurs and who is involved
- Know how to apply best practices for gathering information when an incident occurs
- Keep asking “why” to perform causal analysis

Runtime: 18
Industrial Ergonomics

Jobs in an industrial environment can be physically demanding. Preventing work-related musculoskeletal problems rests on an ergonomically sound work environment, good work practices and employee awareness. This course will introduce common risk factors and methods to prevent musculoskeletal injury. Ideal learners include all industrial employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Warehouse Safety
- Ergonomics and Office Safety

Content Suite:
- AES Ergonomic Improvement Specialist (IACET CEU=0.2) [BDL-12094]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

Course Objectives:
- Identify the signs and symptoms of musculoskeletal disorders;
- Recognize workplace risk factors for musculoskeletal disorders;
- Identify general methods for controlling these risk factors

Runtime: 24

Languages Available:
- Chinese (Simplified) (PS5-101172)
- Dutch (PS5-101166)

- Warehouse Safety
- Ergonomics and Office Safety

Course Objectives:
- Identify the signs and symptoms of musculoskeletal disorders
- Recognize workplace risk factors for musculoskeletal disorders
- Identify general methods for controlling these risk factors

Runtime: 26

Industrial Hygiene Awareness

Industrial hygiene is vital. By anticipating, recognizing and managing conditions that may expose people to workplace contaminants and physical agents, we can prevent harm to people’s health. This course will teach you what industrial hygiene is, what it targets, and how it works. It is ideal for all employees and supervisors.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- First Aid, Health and Wellness
- Chemicals, Substances and Hazard Communication
- General Industry and Manufacturing

Content Suite:
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]

Course Objectives:
- Define industrial hygiene
- Know the types of issues that industrial hygiene helps to solve
- Recall basic principles of minimizing exposure to harmful substances

Runtime: 12

Infection Control - Handwashing

This course provides learners with basic information about handwashing as it relates to infection control principles. This course is intended for all healthcare workers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Healthcare
- First Aid, Health and Wellness

Content Suite:
- Working from Home Suite [BDL-12127]

Course Objectives:
- Define nosocomial infections
- Describe prevention measures against transferring nosocomial infections
- Describe the employer's responsibility in controlling the spread of nosocomial infections

Runtime: 7
Injury and Illness Prevention Program (IIPP)

Many employers have written Injury and Illness Prevention Programs (IIPPs or I2P2s) to help protect their workers from health and safety hazards on the job. This training describes IIPP program elements so employees know where to go with questions, concerns and ideas about safety and health issues. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Health and Safety Management
- Slips, Trips and Falls
- First Aid, Health and Wellness
- Chemicals, Substances and Hazard Communication

Course Objectives:
Description of common Injury and Illness Prevention Program (IIPP) requirements; IIPP elements; Employee, supervisor and employer IIPP responsibilities

Runtime: 18

Injury and Illness Prevention Program (IIPP) (US)

Many employers have written Injury and Illness Prevention Programs (IIPPs or I2P2s) to help protect their workers from health and safety hazards on the job, thanks to Cal/OSHA and the California Occupational Safety and Health Act. This training describes IIPP program elements so employees know where to go with questions, concerns and ideas about safety and health issues. Many states have requirements or voluntary guidelines for workplace injury and illness prevention programs. While this training course is based on Cal/OSHA requirements, many of the guidelines and best practices apply to other state programs. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Health and Safety Management
- Slips, Trips and Falls
- First Aid, Health and Wellness
- Chemicals, Substances and Hazard Communication

Course Objectives:
Description of California's Injury and Illness Prevention Program (IIPP) requirements; IIPP Elements; Employee, supervisor and employer IIPP responsibilities

Runtime: 24
Inspections and Observations

If you saw an unsafe condition at work, would you know what to do? If you were performing a safety inspection, would you know how to make the most of your time? In this course, you will learn how you can use inspections and observations to promote safety in your workplace. Ideal learners include managers, supervisors and safety committee members.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Health and Safety Management
- Management Skills

**Content Suite:**
- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3) (BDL-12117)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- Why Incident Management Matters (WIMM) Suite (PS5-30009)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

**Course Objectives:**
- Know why inspections and observations are important
- Anticipate and react to negative perceptions about inspections and observations
- Identify ways to prepare for inspections and observations
- Recall and use best practices for inspections and observations
- Know what to do after an inspection and observation

**Runtime:** 27

---

Integrated Systems - Achieving Organizational Excellence

How can you integrate compliance, risk management, leadership and culture systems to make your workplace safe? Take this course to find out how and what benefits you will see as a result! Ideal learners include managers, supervisors and safety committee members.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Health and Safety Management
- Management Skills

**Content Suite:**
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

**Course Objectives:**
- Identify the components of an integrated system
- Identify organizational best practices that support integrated systems
- Recognize the benefits of integrated systems
- Identify ways to implement or strengthen integrated systems

**Runtime:** 16
Introduction to OSHA (US)

After the Occupational Safety and Health Act was passed in 1970, OSHA (Occupational Safety and Health Administration) was established to help make our workplaces safer. This course examines the role of OSHA in promoting the health and safety of American workers as well as the rights and responsibilities of the employer and the employee.

Format: eLearning - Claro

Libraries:

Topic/Industry:
- Health and Safety Management
- General Industry and Manufacturing

Content Suite:
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12107]
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) [BDL-12102]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]

Course Objectives:
- Explain why OSHA is important to workers
- Explain worker rights under OSHA
- Discuss employer responsibilities under OSHA
- Discuss the use of OSHA standards
- Explain how OSHA inspections are conducted
- Use helpful worker safety and health resources

Runtime: 51

Ionizing Radiation

Although radiation offers many benefits, exposure to it can also threaten our health and the quality of our environment. We cannot eliminate radiation, but this training shows how we can reduce our risk by controlling our exposure to it. Ideal learners include for workers whose job duties require them to work or spend time in any portion of an area where harmful radiation may be present.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Industry and Manufacturing

Content Suite:
- HAZWOPER 8-Hr Supplemental Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.3) [BDL-12112]
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) [BDL-12111]

Course Objectives:
- Define ionizing radiation
- Identify types and sources of ionizing radiation
- Recognize the risks and health effects of exposure to radiation
- Describe basic practices to maintain radiation exposures “as low as reasonably achievable”
- Recall measures used to control radiation doses in the workplace
- Recognize what to do in the event of an emergency involving ionizing radiation

Runtime: 27
Job Hazard Analysis (JHA)

What if you could eliminate or minimize risks before an incident occurs? You can. In fact, a job hazard analysis provides a systematic way to identify potential hazards for a task so you can take measures to remove or control the risks. There are also additional benefits to conducting a job hazard analysis, which you will learn about in this course.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Health and Safety Management
- Wind Turbine
- Warehouse Safety
- General Industry and Manufacturing

**Content Suite:**
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

**Course Objectives:**
- State the methods and purpose for performing a Job Hazard Analysis
- Explain the importance of involving others in the Job Hazard Analysis process
- Recognize safety precautions to take during a Job Hazard Analysis
- Understand the steps to completing a Job Hazard Analysis form

**Runtime:** 23

---

Job Hazard Analysis (JHA) Awareness

What if you could eliminate or minimize risks before an incident occurs? You can. In fact, a job hazard analysis provides a systematic way to identify potential hazards for a task so you can take measures to remove or control the risks. There are also additional benefits to conducting a job hazard analysis, which you will learn about in this course. Target includes all construction and manufacturing workers.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- General Safety and Manufacturing
- Health and Safety Management
- Wind Turbine
- Warehouse Safety
- Awareness and Microlearning

**Course Objectives:**
- State the methods and purpose for performing a job hazard analysis
- Understand the steps of the job hazard analysis
- Recognize safety precautions to take during a job hazard analysis
- Understand a job hazard analysis form

**Runtime:** 15
Jobsite Safety: Contractors and Non-Employees

Companies must provide a safe workplace for all workers. This includes rules to prevent incidents that occur as a result of an unsafe condition or an unsafe act, or both. All incidents and injuries are preventable. This orientation will explain the rules in place to prevent incidents and provide a safe workplace. Ideal learners are all contractors and non-employees seeking access to sites that require this training.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing

Course Objectives:
Know what you and other contractors, your employer and the clients for whom you work must do to create and maintain a safe workplace

Runtime: 19

Lab Safety

A laboratory safety program depends on participation and cooperation from every employee. This course describes common hazards associated with laboratory environments and introduces ways to control and limit chemical exposure. Ideal learners are any employees who work in a laboratory environment.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Chemicals, Substances and Hazard Communication

Content Suite:
Laboratory Safety Training Suite (IACET CEU=0.3) (BDL-12030)

Course Objectives:
Identify the most common routes of chemical exposure in a laboratory setting; Identify common hazards found in the laboratory environment; Identify control methods that reduce chemical exposure; Recall general rules of lab safety; Know appropriate responses to various emergencies such as exposure, spills and fire; Identify proper handling, storage and disposal methods of hazardous chemicals

Runtime: 21
Lab Safety Awareness

A laboratory safety program depends on participation and cooperation from every employee. This course describes common hazards associated with laboratory environments and introduces ways to control and limit chemical exposure. Ideal learners are any employee who works in a laboratory environment.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Laboratory Safety
- Chemicals, Substances and Hazard Communication
- General Safety and Manufacturing
- Health and Safety Management
- Awareness and Microlearning

Course Objectives:
Identify the most common routes of chemical exposure; identify common hazards found in the laboratory environment; identify control methods that reduce chemical exposure; describe appropriate responses to various emergencies

Runtime: 10

Laboratory Biosafety Part 1: Understanding Risk (US)

Do you know how exposure to potentially infectious materials can occur in your laboratory? Take this course to find out. You will learn about common biosafety hazard classification systems and the steps used to assess and manage the risks associated with potentially infectious biological materials. This course is ideal for anyone who works in a laboratory setting.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Chemicals, Substances and Hazard Communication
- General Safety and Manufacturing
- Health and Safety Management
- Laboratory Safety

Content Suite:
- Laboratory Biosafety, Parts 1-2 (US) (ACET CEU=0.1) [BDL-00475]
- Laboratory Safety Training Suite (ACET CEU=0.3) [BDL-12030]
- Laboratory Biosafety, Parts 1-2 (US) (PS5-00475)

Course Objectives:
Recall how exposure to potentially infectious materials can occur in the workplace via four exposure routes; classify potentially infectious materials using risk groups and biosafety levels; identify the steps in assessing and managing the risks associated with potentially infectious materials

Runtime: 17
Laboratory Biosafety Part 2: Controlling Risk (US)

Laboratory biosafety incidents are often preventable. Take this course to learn about the engineering and work practice controls you should follow, the appropriate personal protective equipment to wear in lab settings, and what to do in the event of a spill or other emergency. This course is ideal for anyone who works in a laboratory setting.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Chemicals, Substances and Hazard Communication
- General Safety and Manufacturing
- Health and Safety Management
- Laboratory Safety

Content Suite:
- Laboratory Biosafety, Parts 1-2 (US) (IACET CEU=0.1) [BDL-00475]
- Laboratory Safety Training Suite (IACET CEU=0.3) [BDL-12030]
- Laboratory Biosafety, Parts 1-2 (US) [PS5-00475]

Course Objectives:
Recall various ways that risks are managed, including engineering controls and work practice controls; identify appropriate personal protective equipment for laboratory settings; know what to do when things go wrong, such as following spill and emergency procedures.

Runtime: 27

Ladder Safety

Obviously, falling off a ladder can injure you. But did you know that falling just 4 feet (or 1 meter) can actually kill you? If there is ever a chance you will use a ladder at work, you need to use it safely. This program covers the types of ladders and how to use each type, as well as ladder safety, inspection and storage. Ideal learners include all employees who use ladders.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Warehouse Safety
- Slips, Trips and Falls
- Ergonomics and Office Safety

Content Suite:
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

Course Objectives:
Recognize types of ladders; explain when and how to use each type of ladder; recall guidelines for ladder safety, inspection and storage.

Runtime: 25
Ladder Safety Awareness

Obviously, falling off a ladder can injure you. But did you know that falling just 4 feet (or 1 meter) can actually kill you? If there is ever a chance you will use a ladder at work, you need to use it safely. This program covers the types of ladders as well as guidelines for proper ladder safety and inspection. Ideal learners include all employees who use ladders.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Warehouse Safety
- Slips, Trips and Falls
- Ergonomics and Office Safety
- Awareness and Microlearning

Course Objectives:
Recognize types of ladders; Recall guidelines for ladder safety and inspection; Explain how to use a ladder properly

Runtime: 12

Ladder Safety for Construction: Selection and Inspection

Can you imagine what would happen if you were on a metal ladder and it touched a live wire? You could be electrocuted! What if a tall ladder was not secured properly while you were climbing it? You could fall! Different types of ladders have different uses and safety practices. Take this course to learn how to select and inspect ladders so that you can work safely. This course is ideal for all construction workers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Slips, Trips and Falls

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- Ladder Safety for Construction, Parts 1-2 (PS5-30087)
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
Recognize when to use different types of ladders; Recall how to inspect ladders prior to use

Runtime: 9
Ladder Safety for Construction: Setup and Use

Workers use ladders so frequently on construction sites that they often forget or underestimate how dangerous they can be. Take this course to review how to safely set up and use ladders. This course is ideal for anyone who works in construction.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Slips, Trips and Falls

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12067]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- Ladder Safety for Construction, Parts 1-2 (PS5-30087)
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
Know how to safely set up ladders; Recall guidelines for safely using ladders

Runtime: 12

Laser Safety Awareness

Lasers can present a variety of potentially serious hazards, including hazardous biological or chemical fumes given off by materials being lased and injury to the eyes and the skin from laser radiation. Lethal electrical and fire hazards can also be present with high-powered lasers. This course outlines the hazards that lasers present as well as how to work safely with and around them.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Awareness and Microlearning

Course Objectives:
Describe the properties of laser light; Identify the potential hazards associated with lasers and their use; Describe how to conduct a laser hazard evaluation; Recognize the laser hazard classes; Identify safety precautions when working with lasers; Understand responsibilities of the Laser Safety Officer

Runtime: 14
Latex Allergy Awareness

Many workers routinely use latex products in their everyday work. Even people who have never had a reaction before could begin to develop symptoms. By reducing your exposure to latex and detecting latex allergy symptoms early, you can prevent long-term health effects. Take this course to learn what natural rubber latex is, where you may find it and how to recognize reactions to it. This course is ideal for all learners.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication
- Hot Work, Fire Watch and Welding
- Health and Safety Management
- Construction

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU-3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU-3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Define natural rubber latex; Identify products that may contain natural rubber latex; Recall routes of latex exposure; Identify people who are at increased risk of latex exposure and reaction; Recognize the symptoms associated with reactions to latex exposure

Runtime: 8

Lead Poisoning

Exposure to lead can cause serious health effects, so it is important that you understand how to protect yourself and what to do if you think you have been overexposed to lead. This course is ideal for people who may be exposed to lead in general industry or construction settings.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Construction
- Hot Work, Fire Watch and Welding
- Chemicals, Substances and Hazard Communication
- Health and Safety Management

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU-3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU-3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Identify common uses and sources of lead; Recognize the health effects of lead exposure; Recall the monitoring and medical surveillance practices employers must take regarding lead; Know what safety measures to take to reduce lead exposure; Know what to do if you believe you have been overexposed to lead

Runtime: 15
**Line Breaking (US)**

Line breaking is an extremely hazardous task that can cause chemical exposure and injuries due to the extreme pressure in lines. It is important that you know what safety guidelines you can follow to minimize your risk. Take this course to learn more! Ideal learners are any employees in an industrial work environment who manage, use or process chemicals, particularly those with hazardous chemical operations.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- General Safety and Manufacturing
- Electrical and LOTO
- Chemicals, Substances and Hazard Communication
- Health and Safety Management

**Course Objectives:**
- Understand line breaking and its associated hazards
- Distinguish between routine and non-routine line breaking
- Identify different types of flanges
- Recall safety procedures for the line breaking process, including the use of personal protective equipment (PPE)

**Runtime:** 17

---

**Lithium-Ion Battery Awareness**

Lithium-ion batteries, like the ones that power your portable electronics, are finding favor over traditional lead-acid batteries. These batteries offer many advantages but pose huge risks if not handled correctly. Take this course to make yourself aware of how to safely use lithium-ion batteries on and off the job. This course is ideal for everyone and all industries.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- General Safety and Manufacturing
- Working from Home/Remote
- Warehouse Safety
- Tools
- Chemicals, Substances and Hazard Communication
- Health and Safety Management

**Content Suite:**
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

**Course Objectives:**
- Identify lithium-ion batteries
- Describe how lithium-ion batteries fail
- Describe how to handle lithium-ion batteries safely
- Identify warning signs for lithium-ion battery incidents
- Recall how to respond to lithium-ion battery incidents

**Runtime:** 14
Load Securement and Distribution (US)

The North American Cargo Securement Standard forms the basis for the cargo securement and distribution regulations in the United States and Canada. The regulations are designed to ensure cargo stays in place, keeping drivers and other motorists safe. This training details the securement regulations for most types of cargo.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Construction
- Driver and Transportation Safety
- Crane and Rigging

**Content Suite:**
- Commercial Drivers Suite (IACET CEU=0.4) [BDL-12055]

**Course Objectives:**
- Recognize the forces acting on cargo;
- Identify securement system elements and their properties;
- Select safe and legal securement and distribution methods;
- Apply tiedown regulations to varied cargo

**Runtime:** 35

Load Securement for Heavy Equipment (US)

The North American Cargo Securement Standard forms the basis for the cargo securement and distribution regulations in the United States and Canada. The regulations are designed to ensure cargo stays in place, keeping drivers and other motorists safe. This training covers the regulations and best practices for loading, securing and unloading heavy equipment. Ideal learners are equipment operators and drivers who load, unload and transport heavy equipment.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Construction
- Driver and Transportation Safety
- Crane and Rigging

**Content Suite:**
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

**Course Objectives:**
- Recall what is included in the North American Cargo Securement Standard;
- Recognize the forces acting on cargo;
- Recall safe practices for loading and unloading heavy equipment;
- Identify securement system elements and their properties;
- Select safe and legal securement and distribution methods

**Runtime:** 23
Lockout/Tagout (LOTO) Awareness

Energy powers machines and industrial systems. Lockout/tagout procedures neutralize hazardous energy and prevent equipment startup during servicing, maintenance and installation activities. Take this course to learn how lockout/tagout helps ensure workplace safety. Ideal learners are personnel working where lockout/tagout occurs. Those who work under lockout protections also benefit from refresher information provided in this course. Your employer may also ask you to complete this awareness training as the first step in the process of achieving lockout/tagout authorization.

Format: eLearning - Claro

Libraries:
- Safety Catalog
- General Safety and Manufacturing
- Electrical and LOTO
- Awareness and Microlearning

Course Objectives:
- Identify lockout/tagout responsibilities
- Recognize different forms of hazardous energy
- Recognize types of lockout/tagout devices
- Recall best practices for attaching and removing locks and tags

Runtime: 10

Lockout/Tagout (LOTO) Programs and Procedures

Energy powers equipment, but when it is uncontrolled it can harm or even kill people. That is why we have lockout/tagout procedures and energy control programs. Take this course to learn what these procedures and programs are and how we use them to stay safe at work. Your employer may ask you to complete this training as part of their process for obtaining lockout/tagout authorization. This course is ideal for workers in general industry and construction.

Format: eLearning - Claro

Libraries:
- Safety Catalog
- Electrical and LOTO
- General Industry and Manufacturing

Content Suite:
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]

Course Objectives:
- Know the definition and purpose of lockout/tagout
- Recognize what is included in energy control programs
- Be able to recall the steps for applying locks and tags
- Be able to recall the steps for removing locks and tags
- Know what to do when lockout/tagout procedures involve testing, outside personnel, shift changes and groups

Runtime: 24
Logging and Chainsaw Safety (US)

Logging is one of the most hazardous industries in the U.S. Medical costs for chainsaw injuries amount to about $350 million per year in the U.S and every year, a number of loggers are fatally injured on the job. This course addresses the hazards of logging with chainsaws and safety precautions workers need to take to reduce their risk of injury on the job.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing

Course Objectives:
- Identify potential injuries associated with logging
- Identify hazards related to the site, trees and equipment
- Identify precautions to be taken related to the site, trees and equipment
- Identify key aspects of planning and executing a plan for logging
- Identify key aspects of making safe cuts

Runtime: 29

Lone Worker: Concerns

Do you know what to expect when you are working alone or isolated from others? Take this course to learn what lone work is and about some of its common risks. This course is ideal for everyone who may perform or supervise someone who performs lone work.

Format: eLearning - Claro

Libraries: Safety Catalog

Content Suite:
- Lone Worker, Parts 1-2 [PS5-30137]

Course Objectives:
- Identify types of lone work
- Recall common health and safety concerns associated with lone work

Runtime: 8
Lone Worker: Risk Assessment

Preparation is the key to performing lone work safely. Take this course to learn about lone worker risks and factors to consider when planning for lone work activities. You will learn about considerations unique to your task and location, personal requirements and key safety precautions like monitoring lone worker safety by using check-ins. This course is ideal for everyone who may perform or supervise someone who performs lone work.

Format: eLearning - Claro

Libraries: 
- Safety Catalog

Topic/Industry:
- Construction
- Driver and Transportation Safety
- General Industry and Manufacturing
- Hi-tech/Semiconductor Safety
- Healthcare
- Wind Turbine
- Working from Home/Remote
- Workplace Violence and Harassment
- Health and Safety Management

Content Suite:
- Lone Worker, Parts 1-2 (PS5-30137)

Course Objectives:
- Remember how to perform formal and dynamic risk assessments for lone work;
- Recognize task, location and personal factors to consider during risk assessment for lone work;
- Recall when, how and why to monitor lone worker safety, including using check-ins

Runtime: 20

Low-Speed and Utility Vehicle Safety

When it comes to utility vehicles, such as golf carts, low speed doesn't mean low risk. Take this course to learn about the unique hazards you should consider before getting behind the wheel and learn how you can safely operate low-speed and utility vehicles. This course is ideal for anyone who operates or rides in low-speed and utility vehicles.

Format: eLearning - Claro

Libraries: 
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Warehouse Safety
- Driver and Transportation Safety

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
- Recognize hazards associated with low-speed and utility vehicles;
- Recall ways to stay safe when operating or riding in low-speed and utility vehicles

Runtime: 11
Machine Guarding Awareness

Cutting. Shearing. Rotation. Pinch points. All of these threaten your fingers and hands. Machine guards are designed to protect you from the hazards of moving machinery parts. This training describes common hazards associated with moving machinery parts and the requirements and safeguards that should be used to minimize your risk of injury. Ideal learners are those who work with machinery.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Warehouse Safety
- Electrical and LOTO
- Tools
- Awareness and Microlearning

Course Objectives:
- Understand the regulatory background of machine guarding
- Identify potential injuries machines can cause
- Identify the mechanical hazards common to all machines
- Identify the non-mechanical hazards common to all machines
- Recognize different types of machine safeguards used to control machine hazards
- Describe types of safety devices that may be used to minimize your risk of machine-related injury
- Identify personal protective equipment that you may use while operating industrial machinery

Runtime: 13

Machine Guarding Part 1: Hazards

Moving parts and power sources are among the machine hazards that can be dangerous when they are not guarded. Take this course to learn why machine guarding is important and the hazards from which it can protect you. Ideal learners are workers who operate, maintain or work near machines.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Wind Turbine
- Warehouse Safety
- Electrical and LOTO
- Tools
- General Industry and Manufacturing

Content Suite:
- Machine Guarding, Parts 1-2 (PS5-30126)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (BDL-12061)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12108)
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) (BDL-12074)

Course Objectives:
- Identify hazards that may result from machine motion

Runtime: 8
Machine Guarding Part 2: Precautions

When people install, use and maintain machine guards properly, they can help prevent injuries such as crushed digits or amputations. Take this course to learn what machine guards are and how to work with them safely. Ideal learners are workers who operate, maintain or work near machines.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Wind Turbine
- Warehouse Safety
- Electrical and LOTO
- Tools
- General Industry and Manufacturing

Content Suite:
- Machine Guarding, Parts 1-2 [PS5-30126]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]

Course Objectives:
- Know what machine guards and their requirements are
- Recognize types of machine guards
- Recall work practices to follow to prevent machine motion injuries and incidents

Runtime: 19

Materials Handling and Storage

By taking proper precautions when handling materials, you can prevent accidents ranging from small splinters, cuts or scrapes, to crushed fingers, hands and feet and even death. Take this course to learn about methods and equipment you can use to handle materials safely. You will also learn about basic ergonomic safety and health principles. This course is ideal for all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Warehouse Safety
- Ergonomics and Office Safety
- Crane and Rigging
- General Industry and Manufacturing

Content Suite:
- AES Ergonomic Improvement Specialist (IACET CEU=0.2) [BDL-12094]
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

Course Objectives:
- Identify potential hazards of handling and storing materials
- Recall methods of injury prevention
- Remember how to properly move, handle and store materials
- Identify types of materials-handling equipment and how to use them
- Recall basic ergonomic safety and health principles

Runtime: 19
Materials Handling and Storage Awareness

There are hundreds of thousands of materials handling accidents every year, ranging from small splinters, cuts or scrapes, to crushed fingers, hands and feet and even deaths. Through proper precautions, you can help prevent these incidents. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Warehouse Safety
- Ergonomics and Office Safety
- Awareness and Microlearning
- Crane and Rigging

Course Objectives:
Identify the proper methods of moving, handling and storing materials; Identify the types of materials handling equipment and how to use them; Understand and use basic ergonomic safety and health principles

Runtime: 9

Materials Handling Practices for Construction (US)

Knowing how to use materials handling equipment properly and ergonomically can help you avoid injuries. In this course, you will learn about types of equipment and associated safe practices. You will also learn safety and health principles that you can apply to your work. This course is ideal for all employees in the construction industry.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Warehouse Safety
- Crane and Rigging

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-1207]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
Identify the types of materials-handling equipment such as cranes, rugged terrain lifts, telehandlers and powered industrial trucks, and the requirements of how to use them; Recall basic ergonomic safety and health principles

Runtime: 9
MDROs: MRSA

This course provides learners with an in-depth overview of MDRO and MRSA development, risk factors and prevention techniques. This course is intended for a broad spectrum of healthcare workers.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Health and Safety Management
- First Aid, Health and Wellness

**Course Objectives:**
Define multidrug-resistant organisms, or MDROs; Define methicillin- and oxacillin-resistant staphylococcus aureus, or MRSA; Detect modes of transmission and symptoms of concern in patient populations; Describe the risks associated with acquiring MDROs; Identify the populations at risk of acquiring MRSA; Describe measures to prevent the transmission of MRSA in healthcare environments

**Runtime:** 11

---

**Mercury Exposure for Healthcare Workers (US)**

This course provides learners with a basic understanding of the health hazards associated with mercury exposure as well as prevention and post-spill procedures. This course is intended for a broad spectrum of healthcare workers.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Chemicals, Substances and Hazard Communication
- General Safety and Manufacturing
- Health and Safety Management
- Healthcare

**Course Objectives:**
Identify health hazards associated with mercury exposure; Describe the health effects of acute and chronic mercury exposure; Describe mercury exposure prevention measures; Identify the procedures for mercury cleanup; Identify employer requirements regarding mercury exposure

**Runtime:** 9
Mobile Elevated Work Platforms

When you cannot move work to ground level, mobile elevated work platforms, or MEWPs, such as aerial, scissor and vertical mast lifts, may be an appropriate solution. Each type has its own unique characteristics and safety strategies of which you need to be aware. You will receive hands-on training about the specific equipment you will use, but this course will lay the groundwork by giving you an overview of some universal considerations for mobile elevated work platforms. This course is ideal for people who use or manage others who use mobile elevated work platforms.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing, Warehouse Safety, Slips, Trips and Falls

Content Suite:
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU-1.0) [BDL-12060]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU-1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU-3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU-3.0) (Actively Proctored) [BDL-12109]
- Construction Industry Safety Program (IACET CEU-0.9) [BDL-12133]
- General Industry Safety Program (IACET CEU-1.1) [BDL-12132]
- Advanced Safety Orientation for General Industry (IACET CEU-0.9) [BDL-12074]

Course Objectives:
Recognize types of mobile elevated work platforms and their uses; Know how to prepare for safe mobile elevated work platform use; Recall mobile elevated work platform characteristics and safe operation principles; Know safe practices to use when working on mobile elevated work platforms

Runtime: 14

Mobile Elevated Work Platforms Awareness

Not everything we have to work on is within reach. There are times we need a little help. Sometimes ladders are chosen, other times fixed scaffolds, and still other times mobile equipment like aerial lifts (also referred to as an articulating boom or bucket lifts) and scissor lifts. Working safely with this last category will be the focus of this course. Ideal learners include employees who work on or around aerial lifts and scissor lifts.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing, Warehouse Safety, Slips, Trips and Falls, Awareness and Microlearning

Content Suite:
- OSHA 10: General Industry Outreach Training Course (IACET CEU-1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU-1.0) (Actively Proctored) [BDL-12108]

Course Objectives:
Explain the importance of equipment inspection and site survey; Recognize causes of mobile equipment incidents; Describe precautions to help prevent incidents such as falls, tip-over and catapulting

Runtime: 12
Office Ergonomics Awareness

We have all felt aches and pains from bad posture, repetitive work, and sitting or standing in one position for extended periods. Working in an office can take a toll on your muscles, but proper ergonomics can make you more comfortable and efficient. The goal of this course is to assist you in evaluating and modifying your office work environment to reduce ergonomic risk. Ideal learners include office workers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Awareness and Microlearning
- Ergonomics and Office Safety

Content Suite:
- Working from Home Suite [BDL-12127]
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) [IACET CEU:1.0] [BDL-12102]

Course Objectives:
- Recognize ergonomic risk factors in the office environment
- Identify adjustments needed to make the work area more ergonomically friendly
- Identify strategies to reduce ergonomic risks

Runtime: 13

Office Ergonomics Essentials

If you have ever sat at a computer for hours at a time, you may have experienced pain from sitting too long, numb limbs from poor circulation, and eye strain. This course will help you identify ways to make your workspace more ergonomically correct so that you can avoid this discomfort and pain. You will learn what the principle of ergonomics is; how to prepare yourself and your work area, and what adjustments you can make to your setup no matter where you work. This course is ideal for anyone who works at a computer for any length of time.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Ergonomics and Office Safety

Course Objectives:
- Define ergonomics
- Recognize work habits to break to improve ergonomics
- Identify how to prepare one’s body, work area and devices to be more ergonomically correct
- Recall strategies to improve ergonomics in work areas

Runtime: 12
Office Ergonomics for California (US)

We have all felt aches and pains from bad posture, repetitive work, and sitting or standing in one position for extended periods. Working in an office can take a toll on your muscles, but proper ergonomics can make you more comfortable and efficient. The goal of this course is to assist you in evaluating and modifying your office work environment to reduce ergonomic risk. Ideal learners are office workers or anyone who works at a desk.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Ergonomics and Office Safety

Course Objectives:
Define office ergonomics; Recognize ergonomic risk factors in the office environment; Identify adjustments needed to make the work area more ergonomically friendly; Identify strategies to reduce ergonomic risks; Know how to create a program designed to minimize repetitive motion injuries (RMIs)

Runtime: 28

Office Safety

Although accidents involving office personnel generally occur less frequently than mishaps to industrial workers, they do still occur and can result in serious injuries and even death. Office safety is the responsibility of everyone. You must understand what you can do to stay safe on the job, and you need to be aware of how to correct unsafe conditions. This course provides the information you need to work safer in your office environment. Ideal learners include office workers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Ergonomics and Office Safety

Content Suite:
- Working from Home Suite (BDL-12127)
- General Industry Safety Program (IACET CEU=1.1) (BDL-12132)

Course Objectives:
Common office hazards; Emergency response plan; Prevention techniques; Injury reporting process; Workplace security

Runtime: 27
Office Safety (US)

Although accidents involving office personnel generally occur less frequently than mishaps to industrial workers, they do still occur and can result in serious injuries and even death. Everyone is responsible for office safety. You must understand what you can do to stay safe on the job, and you need to be aware of how to correct unsafe conditions. This course provides the information you need to work safer in your office environment. Ideal learners are all office workers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Ergonomics and Office Safety

Course Objectives:
Identify common office hazards faced by office workers, including slip, trip and fall hazards, hazards involving tools and equipment, and electrical and flammable hazards; Take Hazard Communication training and use Safety Data Sheets and labels to learn about the hazards of materials you work with; Describe the actions to take in case of an emergency in the office; Use proper lifting techniques and recognize how to minimize risk potential for sprains and strains; Define the injury reporting process and identify when you should report an injury; Explain how a healthy lifestyle, including eating sensibly, exercising, and refraining from smoking, can reduce your risk of injury and illness; List the proper personal protective equipment to use when visiting locations outside the office environment; Describe common security policies

Runtime: 23

Office Safety Awareness

Although accidents involving office personnel generally occur less frequently than mishaps to industrial workers, they do still occur and can result in serious injuries and even death. Everyone is responsible for office safety. This awareness course provides information you need to work safer in your office environment. Ideal learners are all office workers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Ergonomics and Office Safety
- Awareness and Microlearning

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
Identify common office hazards faced by office workers; Describe the actions to take in case of an emergency in the office; Explain how a healthy lifestyle, including eating sensibly, exercising, and refraining from smoking, can reduce your risk of injury and illness; Describe common security policies

Runtime: 14
Order Picker Safety

Order pickers can make your job easier, but they also present unique hazards. Take this course to learn about the features of order pickers, how to prepare to safely use them, and what you can do to prevent accidents that could injure people or damage property. This course is ideal for learners who use or supervise people who use order pickers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Warehouse Safety

Course Objectives:
Recognize the features, common names and uses of order pickers; Know how to ensure that order picker operators, areas and equipment are ready for safe use; Know how to prevent accidents such as falling, crushing and tipping; Recall how to safely park order pickers

Runtime: 11

OSHA 300 Recordkeeping Requirements (US)

OSHA has a set of rules for recordkeeping. 29 CFR 1904 requires employers to record certain work-related injuries and illnesses. The rules also require that employers notify OSHA of severe incidents, such as fatalities. This training summarizes the key provisions of this rule, including explanations of OSHA forms 300, 301 and 300A. Ideal learners are managers and employers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Health and Safety Management

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Identify which OSHA forms should be used to record work-related injuries or illnesses; Identify which injuries and illnesses should be recorded; Recall how to protect employee privacy when recording or reporting injuries and illnesses; Classify work-related injuries and illnesses; Recall how to calculate injury and illness incidence rates; Recall how to properly record and post injuries and illnesses

Runtime: 31
OSHA Inspections for Construction and Multi-Employer Worksites (US)

When you work on a construction site that has multiple employers present, you know that communication and cooperation are important to make sure everyone stays safe. They are also important when OSHA performs inspections. You may be wondering how the employers work together during site inspections and how OSHA determines who to cite. This course will answer those questions. It is ideal for United States construction workers on multi-employer worksites.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Construction
- Health and Safety Management
- Warehouse Safety

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
Recognize that everyone on multi-employer construction sites can and should work together to avoid safety issues and OSHA citations; Define OSHA employer categories on multi-employer construction sites; Know how OSHA decides whom to cite for violations; Know employer responsibilities and best practices on multi-employer worksites; Know employer responsibilities and best practices during OSHA inspections

Runtime: 14

OSHA Outreach Training Learner Responsibilities

OSHA Outreach Training Learner Responsibilities

Format: eLearning - Claro

Content Suite:
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12107)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (BDL-12061)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12108)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)

Runtime: 3

Overhead and Gantry Crane Safety

Anyone who works with cranes knows not to underestimate the daily risk of collapse, electrical accidents, falls and other serious incidents. The power that makes overhead, gantry and similar cranes so useful also makes them dangerous. By properly maintaining and operating the cranes with which you work, you can protect yourself and your co-workers. Ideal learners are crane operators and their supervisors.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Warehouse Safety
- Crane and Rigging

Content Suite:
- Crane Safety and Basic Rigging Training Suite (IACET CEU=0.3) [BDL-01232]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
Identify the crane components you need to formally inspect and the frequency at which you need to inspect them; Recall safe crane operating procedures; Recognize safe and unsafe crane components and working conditions

Runtime: 25
Overhead and Gantry Crane Safety Awareness

Anyone who works with cranes knows not to underestimate the daily risk of collapse, electrical accidents, falls and other serious incidents. The power that makes overhead, gantry and similar cranes so useful also makes them dangerous. By properly operating the cranes with which you work, you can protect yourself and your co-workers. Ideal learners are crane operators.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Warehouse Safety
- Awareness and Microlearning
- Crane and Rigging

Course Objectives:
- Recall safe crane operating procedures;
- Recognize safe and unsafe crane components and working conditions

Runtime: 12

Pallet Truck Safety

Operating a pallet truck is different than operating a forklift or other industrial truck. Take this course to learn how you can help eliminate or reduce injuries and incidents associated with this equipment. This course will give you the basic information you need to inspect and safely operate pallet trucks in a variety of situations. Ideal learners are all employees who operate or supervise the operation of pallet trucks in industrial settings.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Warehouse Safety

Course Objectives:
- Recognize the types of pallet trucks and their special considerations;
- Know how to prepare to safely operate pallet trucks;
- Recall general safe operation practices for pallet trucks;
- Know how to safely use pallet trucks at docks and on ramps or slopes

Runtime: 13

Pandemic Awareness

When an outbreak or pandemic is in the news, there is no need to panic. There are specific things you can do to protect yourself and those around you from infection. Take this course to learn about what to look for and what to do during outbreaks and pandemics. This course is ideal for all learners.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- All Industries
- Working from Home/Remote
- First Aid, Health and Wellness

Course Objectives:
- Define an outbreak and a pandemic;
- Recognize and react safely when there is an outbreak or pandemic;
- Know how to prevent catching and spreading diseases

Runtime: 16
Personal Factors in Safety

How do we make safe decisions? Knowledge alone is not enough. Take this course to learn about factors that influence the actions we decide to take and how you can improve personal factors in safety. Ideal learners include all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Warehouse Safety

Content Suite:
- AES Ergonomic Improvement Specialist (IACET CEU=0.2) (BDL-12094)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- HAZWOPER 8-Hr Supplemental Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.3) (BDL-12112)
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) (BDL-12111)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
- Recognize how experience can have positive and negative effects on safety
- Recall factors that affect our judgment
- Identify the effects of stress and fatigue
- Recall ways to counter the effects of stress and fatigue
- Identify communication strategies to improve safety

Runtime: 14

Personal Protective Equipment (PPE) Awareness

Workplaces are designed to be relatively free from hazards. Hazards that cannot be eliminated are guarded to keep workers away. Workers wear their own form of guarding, or personal protective equipment (PPE), as a final layer of protection against workplace hazards. This course is ideal for all workers who use PPE.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding
- Awareness and Microlearning

Course Objectives:
- Recognize the responsibilities you have relative to your employer's PPE program
- Identify different types of PPE
- Decide what PPE is suitable for the hazards present

Runtime: 13
Personal Protective Equipment (PPE) Overview

Workplaces can be very dangerous and unpredictable places with loud noises, falling objects, flying sparks, toxic chemicals, whirling blades and belts, and more. So what is one way to keep yourself safe? By wearing personal protective equipment, commonly known as PPE, you can protect yourself against hazards and reduce your chances of getting hurt or even killed.

Format: eLearning - Claro

Libraries:
- Safety Catalog
- General Safety and Manufacturing
- Wind Turbine
- Hot Work, Fire Watch and Welding

Content Suite:
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

Course Objectives:
- Identify different types of PPE
- Select the appropriate PPE for the hazards present
- Recognize the principles of proper PPE use, care and maintenance

Runtime: 32

Personal Protective Equipment (PPE) Overview (US)

Workplaces can be very dangerous and unpredictable places with loud noises, falling objects, flying sparks, toxic chemicals, whirling blades and belts, and more. So what is one way to keep yourself safe? By wearing personal protective equipment, commonly known as PPE, you can protect yourself against hazards and reduce your chances of getting hurt or even killed.

- Spanish (Latin America) (PS5-102345)
Personal Protective Equipment (PPE) Overview for Construction: Using and Maintaining PPE

When PPE is used appropriately and in good condition, it can help protect workers from loud noises, falling objects, flying sparks, toxic chemicals, and more. Take this course to learn how to use, care for, and maintain personal protective equipment, commonly known as PPE. Ideal learners are construction workers.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Construction

**Content Suite:**
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12060]

**Course Objectives:**
Recognize the principles of proper PPE use, care and maintenance

**Runtime:** 10

Personal Protective Equipment (PPE) Part 1 - Introduction (US)

This course introduces the 10-part training suite on personal protective equipment (PPE). In this introduction, you will learn about PPE standards outlined by OSHA and how employers determine PPE requirements.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding

**Content Suite:**
- Personal Protective Equipment (PPE), Parts I-10 (US) [PS5-00488]

**Course Objectives:**
List the main requirements of OSHA's PPE standard; Identify the types of hazards that may be found in your workplace; Give examples of engineering, work practice and administrative controls that could be implemented before PPE is used

**Runtime:** 9
Personal Protective Equipment (PPE) Part 10 - Levels of Protection and Protective Gear (US)

When faced with hazards, you must select the appropriate level of protection based on the severity of the hazard. This course examines personal protective equipment (PPE) selection factors and levels of protection.

Format: eLearning - Claro

Libraries:
- Safety Catalog
- Personal Protective Equipment (PPE), Parts 1-10 (US) (PSS-00488)

Content Suite:
- Personal Protective Equipment (PPE), Parts 1-10 (US) (PSS-00488)

Course Objectives:
- State the key factors in the PPE selection process;
- Describe the different levels of PPE protection and the PPE components applicable to each level

Runtime: 11

Personal Protective Equipment (PPE) Part 2 - Head Protection (US)

Head injuries can turn fatal. Therefore, it is important to be aware of potential hazards and always wear the proper head protection. This course presents head protection basics guiding you on selecting the right class of protection.

Format: eLearning - Claro

Libraries:
- Safety Catalog
- Personal Protective Equipment (PPE), Parts 1-10 (US) (PSS-00488)

Content Suite:
- Personal Protective Equipment (PPE), Parts 1-10 (US) (PSS-00488)

Course Objectives:
- List the hazards that typically cause head injuries;
- State when head protection should be worn;
- Describe how to select appropriate head protection for the hazards present in your work environment;
- Understand key concepts in the inspection and maintenance of head protection

Runtime: 8

Personal Protective Equipment (PPE) Part 3 - Eye and Face Protection (US)

You increase your risk of eye and face injuries when you do not wear personal protective equipment (PPE) or select the right kind of protection for the hazard. Learn how to select hazard-specific eye and face protection in this course.

Format: eLearning - Claro

Libraries:
- Safety Catalog
- Personal Protective Equipment (PPE), Parts 1-10 (US) (PSS-00488)

Content Suite:
- Personal Protective Equipment (PPE), Parts 1-10 (US) (PSS-00488)

Course Objectives:
- List the hazards that typically cause eye and face injuries;
- State when eye and face protection should be worn;
- Describe how to select appropriate eye and face protection for a given set of hazards;
- Inspect and maintain eye and face protection

Runtime: 10
Personal Protective Equipment (PPE) Part 4 - Hand and Arm Protection (US)  

When engineering, work practice or administrative controls do not eliminate hand and arm hazards, you must wear the appropriate type of protection. This portion of the Personal Protective Equipment (PPE) training suite helps you guard against hand and arm injuries.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing

Hot Work, Fire Watch and Welding

Content Suite:

* Personal Protective Equipment (PPE), Parts 1-10 (US) (PSS-00488)

Course Objectives:

List the hazards that typically cause hand and arm injuries; State when hand and arm protection should be worn; Describe how to select appropriate hand and arm protection for the hazards present in your work environment; Inspect and maintain hand and arm protection

Runtime: 9

---

Personal Protective Equipment (PPE) Part 5 - Body Protection (US)

Body protection is available to protect you against specific hazards. Learn more about hazard-specific body protection in this portion of the Personal Protective Equipment (PPE) training suite.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing

Hot Work, Fire Watch and Welding

Content Suite:

* Personal Protective Equipment (PPE), Parts 1-10 (US) (PSS-00488)

Course Objectives:

List the hazards that typically cause body injuries; State when body protection should be worn; Describe how to select appropriate body protection for the hazards present in your work environment; Inspect and maintain body protection

Runtime: 6

---

Personal Protective Equipment (PPE) Part 6 - Foot and Leg Protection (US)

How would your job change if you had a foot injury? Does it not make sense to wear foot protection when you need it? This course examines types of foot and leg protection.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing

Hot Work, Fire Watch and Welding

Content Suite:

* Personal Protective Equipment (PPE), Parts 1-10 (US) (PSS-00488)

Course Objectives:

List the hazards that typically cause foot injuries; State when foot protection should be worn; Describe how to select appropriate foot protection for the hazards present in your work environment; Inspect and maintain foot protection

Runtime: 10
Personal Protective Equipment (PPE) Part 7 - Hearing Conservation (US)

Protection against excessive noise exposure is the only way to avoid permanent hearing damage. In this course, you will learn about types of hearing protection as well as how to select, wear and maintain hearing protection.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Content Suite:
- Personal Protective Equipment (PPE), Parts 1-10 (US) (PS5-00488)

Course Objectives:
Define continuous and impact noise; State when hearing protection should be worn; Describe how to select appropriate hearing protection for the noise hazards present in your work environment; Inspect and maintain hearing protection

Runtime: 8

Personal Protective Equipment (PPE) Part 8 - Respiratory Protection (US)

Hazardous materials can enter your body by ingestion, absorption or inhalation. Proper respirator usage can protect you from inhalation hazards. Learn more about respiratory protection in this portion of the Personal Protective Equipment (PPE) training suite.

Format: eLearning - Claro

Libraries:
- Safety Catalog
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding

Content Suite:
- Personal Protective Equipment (PPE), Parts 1-10 (US) (PS5-00488)

Course Objectives:
State when respiratory protection should be worn; Describe different types of respirators and cartridges that may be used in your work environment; State requirements for wearing and maintaining respiratory protection

Runtime: 9

Personal Protective Equipment (PPE) Part 9 - Electrical Protective Devices (US)

When working around electricity you always follow proper safety precautions and choose the right tools for the job. This includes wearing the right type of personal protective equipment (PPE). This portion of the PPE training suite explores the types of electrical protective devices as well as their classes and ratings.

Format: eLearning - Claro

Libraries:
- Safety Catalog
- General Safety and Manufacturing
- Electrical and LOTO

Content Suite:
- Personal Protective Equipment (PPE), Parts 1-10 (US) (PS5-00488)

Course Objectives:
List the basic hazards of electricity; Identify the different types of electrical protective devices; State the basic requirements for electrical PPE; Describe how to inspect and maintain your electrical PPE

Runtime: 10
Personal Protective Equipment (PPE) Part Eight - Respiratory Protection

Hazardous materials can enter your body by ingestion, absorption or inhalation. Proper respirator usage can protect you from inhalation hazards. Learn more about respiratory protection in this portion of the Personal Protective Equipment (PPE) training suite.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding

Content Suite:
- Personal Protective Equipment (PPE), Parts 1-10 [PS5-30021]
- Personal Protective Equipment (PPE) Parts 1-10 (IACET CEU-0.2)

Course Objectives:
Respiratory hazards; Types of respiratory protection; Care and maintenance of respirators

Runtime: 10

Personal Protective Equipment (PPE) Part Five - Body Protection

Body protection is available to protect you against specific hazards. Learn more about hazard-specific body protection in this portion of the Personal Protective Equipment (PPE) training suite.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding

Content Suite:
- Personal Protective Equipment (PPE), Parts 1-10 [PS5-30021]
- Personal Protective Equipment (PPE) Parts 1-10 (IACET CEU-0.2)

Course Objectives:
Body hazards; Types of body protection; Selecting hazard-specific body protection; Care and maintenance of body protection

Runtime: 7

Personal Protective Equipment (PPE) Part Four - Hand and Arm Protection

When engineering, work practice or administrative controls do not eliminate hand and arm hazards, you must wear the appropriate type of protection. This portion of the Personal Protective Equipment (PPE) training suite helps you guard against hand and arm injuries.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding

Content Suite:
- Personal Protective Equipment (PPE), Parts 1-10 [PS5-30021]
- Personal Protective Equipment (PPE) Parts 1-10 (IACET CEU-0.2)

Course Objectives:
Hand and arm hazards; Types of hand and arm protection; Selecting, wearing and maintaining hand and arm protection

Runtime: 10
When working around electricity, always follow proper safety precautions and choose the right tools for the job. This includes wearing the right type of personal protective equipment (PPE). This portion of the PPE training suite explores the types of electrical protective devices as well as their classes and ratings.

**Course Objectives:**
- List the basic hazards of electricity; Identify the different types of electrical protective devices; Describe how to inspect and maintain your electrical PPE.

**Runtime:** 7
Personal Protective Equipment (PPE) Part Six - Foot and Leg Protection

How would your job change if you had a foot injury? Does it not make sense to wear foot protection when you need it? This course examines types of foot and leg protection.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding

**Content Suite:**
- Personal Protective Equipment (PPE), Parts 1-10 (PS5-30021)
- Personal Protective Equipment (PPE) Parts 1-10 (IACET CEU-0.2)

**Course Objectives:**
- Foot and leg hazards
- Types of foot and leg protection
- Foot protection selection, inspection and maintenance

**Runtime:** 9

---

Personal Protective Equipment (PPE) Part Ten - Levels of Protection and Protective Gear

When faced with hazards, you must select the appropriate level of protection based on the severity of the hazard. This course examines personal protective equipment (PPE) selection factors and levels of protection.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding

**Content Suite:**
- Personal Protective Equipment (PPE), Parts 1-10 (PS5-30021)
- Personal Protective Equipment (PPE) Parts 1-10 (IACET CEU-0.2)

**Course Objectives:**
- PPE selection factors
- PPE levels of protection
- PPE applicable to each level of protection

**Runtime:** 13

---

Personal Protective Equipment (PPE) Part Three - Eye and Face Protection

You increase your risk of eye and face injuries when you do not wear personal protective equipment (PPE) or select the right kind of protection for the potential hazards you may encounter at work. Learn how to select hazard-specific eye and face protection in this course.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding

**Content Suite:**
- Personal Protective Equipment (PPE), Parts 1-10 (PS5-30021)
- Personal Protective Equipment (PPE) Parts 1-10 (IACET CEU-0.2)

**Course Objectives:**
- Regulatory requirements for eye and face protection
- Types of eye and face protection
- Optical radiation
- Selecting, wearing and maintaining eye and face protection

**Runtime:** 10
Personal Protective Equipment (PPE) Part Two - Head Protection

Head injuries can turn fatal. Therefore, it is important to be aware of potential hazards and always wear the proper head protection. This course presents head protection basics guiding you on selecting the right class of protection. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding

Content Suite:
- Personal Protective Equipment (PPE), Parts 1-10 [PS5-30021]
- Personal Protective Equipment (PPE) Parts 1-10 (IACET CEU=0.2) [PS5-101383]

Course Objectives:
- Head protection basics
- Types of head protection
- Care and maintenance of head protection

Runtime: 8

Power Tool Safety for Construction

Power tools can be dangerous. Fortunately, there are things you can do to make sure you use them in a safe way. Take this course to find out about both general and specific power tool hazards and precautions. This course is ideal for all construction workers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Hot Work, Fire Watch and Welding
- Tools

Content Suite:
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)
- Hand and Power Tool Safety for Construction, Parts 1-2 [PS5-30071]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (BDL-12060)
- Construction Industry Safety Program (IACET CEU=0.9) (BDL-12133)

Course Objectives:
- Identify the hazards associated with power tools
- Recall precautions for using power tools

Runtime: 12
Powered Industrial Trucks - Operators Overview

Powered industrial trucks like forklifts, motorized pallet jacks, tuggers, tow motors and other powered equipment are used every day to lift and move equipment or materials. Because of the high risk of injury and even death while operating a powered industrial truck, some use and training recommendations have been developed to improve safety. Specifically, it is recommended that powered industrial truck operators receive comprehensive initial training, including facility specifics, a hands-on skill demonstration in the workplace and an evaluation. Employers are also encouraged to provide refresher training on powered industrial trucks under certain circumstances.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Warehouse Safety
- General Industry and Manufacturing

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)

Course Objectives:
- Give an overview of the different types and classes of powered industrial trucks;
- State the most common causes of powered industrial truck injuries and fatalities;
- Outline the process for conducting pre-use inspections;
- Identify key elements for safe operation of a powered industrial truck, including stability and load handling;
- Discuss safety considerations when refueling and changing or charging batteries;
- Recognize the most important considerations for stopping a lift and/or ending a shift

Runtime: 32

Powered Industrial Trucks Part 1: Classes and Types

Your job requires you to work with or around powered industrial trucks. What are they and what do you need to know about the different types? Take this course to learn the answers to these questions. This course is ideal for people who operate powered industrial trucks or those who manage them.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Warehouse Safety
- General Industry and Manufacturing

Content Suite:
- Powered Industrial Trucks, Parts 1-7 (PS5-30119)
- Powered Industrial Trucks, Parts 1-7 (IACET CEU=0.1) (BDL-30119)
- General Industry Safety Program (IACET CEU=1.1) (BDL-12132)

Course Objectives:
- Recall what a powered industrial truck is;
- Classify types of powered industrial trucks;
- Recall how power sources affect which powered industrial truck to choose for different jobs;
- Use data plates and markings to find information about a truck, including its weight and lifting capacity

Runtime: 16
Powered Industrial Trucks Part 2: Pre-Operation Inspection

Powered industrial truck safety begins before the truck is even in motion. This course will teach you how to visually inspect trucks to ensure they will function safely. This course is ideal for people who operate powered industrial trucks or those who manage them.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Warehouse Safety

General Industry and Manufacturing

Content Suite:
- Powered Industrial Trucks, Parts 1-7 (PS5-30119)
- Powered Industrial Trucks, Parts 1-7 (IACET CEU=0.1) (BDL-30119)
- General Industry Safety Program (IACET CEU=1.1) (BDL-12132)

Course Objectives:
Know how to ensure that an operator is ready to operate a powered industrial truck
Know how to evaluate five key pre-operation inspection points

Runtime: 12

Powered Industrial Trucks Part 3: Operational Inspection and Maintenance

Before you use a powered industrial truck, you need to make sure it operates safely and as expected. This course will teach you what is included in an operational inspection and will also help you understand the importance of preventive maintenance. This course is ideal for people who operate powered industrial trucks or those who manage them.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Warehouse Safety

General Industry and Manufacturing

Content Suite:
- Powered Industrial Trucks, Parts 1-7 (PS5-30119)
- Powered Industrial Trucks, Parts 1-7 (IACET CEU=0.1) (BDL-30119)
- General Industry Safety Program (IACET CEU=1.1) (BDL-12132)

Course Objectives:
Recall what is included in an operational inspection
Know what happens during truck maintenance and inspection follow-up

Runtime: 12
Powered Industrial Trucks Part 4: Fueling and Charging

Keeping an adequate power supply for a powered industrial truck is vital to its safe operation. Take this course to learn more about how to safely fuel and charge trucks. This course is ideal for people who operate powered industrial trucks or those who manage them.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Warehouse Safety
- General Industry and Manufacturing

**Content Suite:**
- Powered Industrial Trucks, Parts 1-7 (PS5-30119)
- Powered Industrial Trucks, Parts 1-7 (IACET CEU=0.1) [BDL-30119]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

**Course Objectives:**
Recall general safety procedures to take when refueling or changing and charging batteries

**Runtime:** 12

Powered Industrial Trucks Part 5: Preventing Incidents

Powered industrial truck operators can prevent incidents like tip-overs, collisions and lost loads by monitoring and avoiding factors that affect truck stability and the general safety of their work area. Take this course to learn how loading, capacity, obstructions, speed, braking, turning and surface conditions affect truck operation. This course is ideal for people who operate powered industrial trucks or those who manage them.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Warehouse Safety
- General Industry and Manufacturing

**Content Suite:**
- Powered Industrial Trucks, Parts 1-7 (PS5-30119)
- Powered Industrial Trucks, Parts 1-7 (IACET CEU=0.1) [BDL-30119]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

**Course Objectives:**
Know about the factors that influence the stability and safety of powered industrial trucks; Know what operators should do if their powered industrial truck tips over

**Runtime:** 14

Powered Industrial Trucks Part 6: Picking Up and Placing Loads

By properly picking up, handling and placing loads, powered industrial truck operators can help avoid dangerous conditions such as overloaded equipment, damaged racks and loads that fail or are damaged. Take this course to learn the general safe practices for using trucks to pick up and place loads. This course is ideal for people who operate powered industrial trucks or those who manage them.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Warehouse Safety
- General Industry and Manufacturing

**Content Suite:**
- Powered Industrial Trucks, Parts 1-7 (PS5-30119)
- Powered Industrial Trucks, Parts 1-7 (IACET CEU=0.1) [BDL-30119]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

**Course Objectives:**
Recall how to pick up, handle and place loads

**Runtime:** 8
Powered Industrial Trucks Part 7: Loading Dock Operations

In loading dock areas, traffic, ramps, elevators and ledges increase the danger of powered industrial truck collisions, tip-overs and other incidents. Take this course to learn about the safe decisions truck operators can make to maintain loading dock area safety. This course is ideal for people who operate powered industrial trucks or those who manage them.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Warehouse Safety
- General Industry and Manufacturing

Content Suite:
- Powered Industrial Trucks, Parts 1-7 (PS5-30119)
- Powered Industrial Trucks, Parts 1-7 (IACET CEU=0.1) (BDL-30119)
- General Industry Safety Program (IACET CEU=1.1) (BDL-12132)

Course Objectives:
Recall safe practices for operating powered industrial trucks at loading dock areas

Runtime: 9

Pre-Job Briefings

There are many risks associated with work, and many different safety precautions are required depending on what is being done, as well as where and by whom it is carried out. Pre-job briefings make sure workers know about current hazards, any changes that will affect how they work, and the safety precautions they need to take. This course covers how to conduct a pre-job briefing. Ideal learners are all employees

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Warehouse Safety

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- HAZWOPER 8-Hr Supplemental Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.3) (BDL-12112)
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) (BDL-12111)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
Describe what a pre-job briefing is; Describe when it takes place; Describe what it covers; Describe who conducts it; Describe how it should be documented

Runtime: 6
Preparing for Pandemic Influenza

An influenza pandemic occurs when a virus starts spreading worldwide or across a large number of international borders. Pandemics can result in fatalities and major disruptions of society, but their effects can be mitigated. That is why companies, governments and citizens around the world are undertaking preparations to delay viral spread.

Format: eLearning - Claro

Libraries:◆ Safety Catalog

Topic/Industry:◆ General Safety and Manufacturing
◆ Health and Safety Management
◆ First Aid, Health and Wellness

Content Suite:◆ Working from Home Suite [BDL-12127]

Course Objectives:
Identify elements of a pandemic and explain the difference between a pandemic and an epidemic;Recall how world and national organizations are preparing for pandemics;List the guiding principles of the National Strategy for Pandemic Influenza;Recognize ways that businesses and individuals can reduce or slow the spread of influenza

Runtime: 25

Pressure Vessel Safety (US)

We use pressure vessels in a variety of residential and industrial applications. Yet we must respect the dangers associated with them. The release of stored or potential energy and hazardous materials can cause personal injury, loss of life and catastrophic property damage. In this course, you will explore how pressure vessels are categorized and regulated, what safety measures you can take to stay safe and prevent pressure vessel failures, and what to look for when visually inspecting pressure vessels.

Format: eLearning - Claro

Libraries:◆ Safety Catalog

Topic/Industry:◆ General Safety and Manufacturing
◆ Electrical and LOTO

Course Objectives:
Distinguish how pressure vessels are categorized and regulated;Identify appropriate safety measures when handling, installing, operating, servicing and inspecting pressure vessels;Recognize potential hazards when visually inspecting pressure vessels

Runtime: 19
Preventing and Addressing Electrical Violations (US)

This course focuses on how to troubleshoot electrical hazard issues. It is intended for all employees and has particular value for electricians and safety managers.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- General Safety and Manufacturing
- Health and Safety Management
- Wind Turbine
- Electrical and LOTO

**Content Suite:**
- NFPA 70E Suite (IACET CEU=0.1) (BDL-12129)
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) (BDL-12074)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (BDL-12061)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12108)
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) (BDL-12102)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)
- General Industry Safety Program (IACET CEU=1.1) (BDL-12132)

**Course Objectives:**
Recall safe work practices regarding electrical hazards; Recognize potential electrical violations in the work environment; Identify how to correct electrical violations

**Runtime:** 25

Preventing Back Injury

Life is hard when your back hurts. Back ailments are painful. They can be debilitating. And they may prevent you from working and enjoying activities outside of work. This course helps you understand how the back works and what you can do to prevent back injuries. Ideal learners include all employees.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- General Safety and Manufacturing
- Working from Home/Remote
- Wind Turbine
- Warehouse Safety
- Ergonomics and Office Safety

**Content Suite:**
- AES Ergonomic Improvement Specialist (IACET CEU=0.2) (BDL-12094)
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) (BDL-12074)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (BDL-12061)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12108)
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) (BDL-12102)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)
- General Industry Safety Program (IACET CEU=1.1) (BDL-12132)

**Course Objectives:**
Recall how the back works; List the most common types of back injuries; Recognize risk factors for back injury; Recall the common causes of back injuries; Identify the best ways to prevent a back injury; Recall the steps you should take if a back injury occurs in the workplace

**Runtime:** 21
Preventing Cuts and Puncture Wounds

When someone gets a cut or suffers a puncture wound, precautions should be taken to prevent infection in order to help prevent serious or even life-threatening injuries. This course provides guidance on using machinery, knives and other sharp objects in a safe manner as well as treating cuts and puncture wounds. Ideal learners are all employees.

Format: eLearning - Claro

Languages Available:
- English
- Spanish (Latin America)

Libraries:
- Safety Catalog
- General Safety and Manufacturing
- Working from Home/Remote
- Warehouse Safety

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) (BDL-12009)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12107)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) (BDL-12074)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (BDL-12061)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12108)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (BDL-12060)

Course Objectives:
- Describe the potential health risks of cuts and puncture wounds
- Cite common causes of cuts and puncture wounds
- Identify preventive measures to avoid cuts or puncture wounds
- Describe the actions to take if you experience a cut or puncture wound

Runtime: 19
Preventing Slips, Trips and Falls

At best, slipping and tripping is embarrassing. Often, it leads to strains and sprains. At worst, it causes serious injury or even death. Preventing slips, trips and falls is fairly inexpensive and easy, but often ignored in the daily routine of trying to get work done quickly and efficiently. This course defines slips, trips and falls and details how you can avoid them. Ideal learners include all employees.

Format: eLearning - Claro

Libraries:

- Safety Catalog

Topic/Industry:

- General Safety and Manufacturing
- Working from Home/Remote
- Wind Turbine
- Warehouse Safety
- Slips, Trips and Falls
- Ergonomics and Office Safety

Content Suite:

- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]
- HAZWOPER 8-Hr Supplemental Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.3) [BDL-12112]
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) [BDL-12111]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]
- General Industry Safety Program (IACET CEU-1.1) [BDL-12132]

Course Objectives:

Define slips, trips and falls;identify major fall hazards; Protect yourself from fall hazards

Runtime: 13

Preventing Slips, Trips and Falls Awareness

At best, slipping and tripping is embarrassing. Often, it leads to strains and sprains. At worst, it causes serious injury or even death. Preventing slips, trips and falls is easy, but often ignored in the daily routine of trying to get work done quickly and efficiently. This course defines slips, trips and falls and details how you can avoid them. Ideal learners include all employees.

- Ergonomics and Office Safety
- Awareness and Microlearning

Content Suite:
- Microlearning: Preventing Slips, Trips and Falls Suite [PS5-30074]

Course Objectives:
- Describe the steps to reduce risk of injury in the event of a fall
- Explain steps to be taken after a fall

Runtime: 4

---

Preventing Slips, Trips and Falls: Keeping Work Areas Safe

Slips, trips and falls can cause numerous, sometimes severe, injuries. Take this course to learn ways you can make your workplace safer to prevent these accidents. This course is ideal for all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Wind Turbine
- Warehouse Safety
- Slips, Trips and Falls
- Ergonomics and Office Safety
- Awareness and Microlearning

Content Suite:
- Microlearning: Preventing Slips, Trips and Falls Suite [PS5-30074]

Course Objectives:
- Implement methods to maintain safe work areas
- Identify the dos and don'ts to reduce the risk of falls in a work area

Runtime: 4
Preventing Slips, Trips and Falls: Using Equipment Correctly

Using the wrong equipment, or using the right equipment in the wrong way, can cause you to slip, trip and fall. Take this course to learn how to make safe choices at work. This course is ideal for all employees.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- General Safety and Manufacturing
- Working from Home/Remote
- Wind Turbine
- Warehouse Safety
- Slips, Trips and Falls
- Ergonomics and Office Safety
- Awareness and Microlearning

**Content Suite:**
- Microlearning: Preventing Slips, Trips and Falls Suite (PS5-30074)

**Course Objectives:**
- Identify the significance of using equipment and facilities correctly
- Demonstrate the correct use of the equipment

**Runtime:** 4

Preventing Workplace Harassment - Employees (US)

This program addresses a crucial issue in the workplace, respect. Respect is reflected in a broad range of behavior. The opposite, disrespectful behavior, encompasses behavior that includes racial and sexual harassment, and discrimination. The consequences of disrespectful behavior for employees and the company can be devastating. Everyone deserves a respectful workplace, and this program will help you be able to do your part in creating one.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Topic/Industry:**
- Employment Liability
- Workplace Violence and Harassment

**Course Objectives:**
- Describe the laws that prohibit workplace harassment
- State the legally "protected classes"
- List the elements of a sound anti-harassment policy
- Provide definitions and examples of discrimination, harassment and sexual harassment
- Give examples of quid pro quo and hostile work environment
- State the actions to take if you become aware of workplace harassment
- Discuss your role in preventing workplace harassment and promoting respectful behavior

**Runtime:** 30
Preventing Workplace Harassment - Managers (US)

Victims of harassment have well-established rights under federal law and, in many cases, under state and local law, too. And as a Manager or Supervisor, you have an important responsibility to both prevent harassment from taking place and to address it whenever it occurs in your organization. In order to meet that responsibility, you need to know what harassment and discrimination are, what laws prohibit discrimination and harassment in the workplace, what you must do to prevent and act upon workplace harassment, and how the anti-discrimination policy of your organization helps you do this. That is what you are going to learn in this course.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Employment Liability
- Workplace Violence and Harassment

Course Objectives:
- Describe the laws that prohibit workplace harassment
- State the legally protected classes
- Provide definitions and examples of discrimination, harassment and sexual harassment
- Give examples of quid pro quo and hostile work environment
- Discuss your role as a supervisor in preventing workplace harassment and promoting respectful behavior
- List the elements of a sound anti-harassment policy
- State the actions to take if you become aware of workplace harassment

Runtime: 36

Prevention and Control of TB Part 1 (US)

This course provides learners with an overview of methods to prevent and control tuberculosis (TB) in the healthcare environment. This course is intended for a broad range of workers in the healthcare industry and is appropriate for all job descriptions, including non-healthcare workers as well as hands-on caregivers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Healthcare
- First Aid, Health and Wellness

Content Suite:
- Prevention and Control of TB, Parts 1-2 (US) (PS5-00473)

Course Objectives:
- Describe methods to prevent the spread of tuberculosis (TB) in the healthcare environment
- Describe the importance of having an infection control plan for TB
- Describe control measures important in preventing the spread of TB
- Describe housekeeping and cleaning procedures to follow for contaminated rooms
- Describe components of the respiratory program and respirator use when caring for patients with suspected or confirmed TB

Runtime: 13
Prevention and Control of TB Part 2 (US)

This course provides learners with an in-depth overview of abatement methods for the control of tuberculosis (TB), including early identification, medical surveillance and case management. This course also includes information about employer recordkeeping requirements. This course is intended for a broad range of workers in the healthcare industry and is appropriate for all job descriptions, including non-healthcare workers as well as hands-on caregivers.

Format: eLearning - Claro

Languages Available: English

Libraries:
- Safety Catalog

Topic/Industry:
- Healthcare
- First Aid, Health and Wellness

Content Suite:
- Prevention and Control of TB, Parts 1-2 (US) (PS5-00473)

Course Objectives:
- Describe abatement methods used in the prevention and control of tuberculosis (TB);
- Describe the components of a TB medical surveillance program;
- Describe the importance of case management in controlling the spread of TB;
- Describe the impact of having TB on a healthcare worker's ability to work;
- Describe TB recordkeeping requirements for the healthcare industry

Runtime: 10

Process Safety Management (PSM) (US)

When managing hazards associated with work processes using highly hazardous chemicals, Process Safety Management, or PSM, programs require active participation by both the employer and the employee to prevent harm from coming to hundreds and thousands of people. In this course, you will learn about proactive identification, evaluation and either prevention or mitigation of chemical releases that result from failures in processes, procedures or equipment. This course is ideal for supervisors, managers and other employees who are unfamiliar with the purpose and general requirements of PSM programs.

Format: eLearning - Claro

Languages Available: English, Spanish (Latin America) (PS5-102606)

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication
- Health and Safety Management

Course Objectives:
- Define the purpose of a Process Safety Management (PSM) program;
- Know when OSHA requires a PSM program;
- Recall employer responsibilities regarding PSM programs;
- Recognize what is included in training about a PSM program;
- Recognize elements of a Process Hazard Analysis (PHA);
- Identify elements of written operating procedures, incident investigations, emergency planning and compliance audits

Runtime: 22
Process Safety Management: Compliance Audits (US)

Process Safety Management (PSM) is a regulation that requires companies to comply with 14 elements to reduce the risk associated with highly hazardous chemicals in process facilities. Compliance auditing is one of the 14 elements and provides a way for companies to self-evaluate their implementation efforts. This course emphasizes the importance of performing a compliance audit to ensure they are meeting company standards. Topics in this course include: Compliance Audit, Elements, Preparation, and Conducting an Audit. After completing this course, learners will recognize what a compliance audit is, what PSM elements are included in a compliance audit, and what steps should be taken to perform an effective audit.

**Format:** eLearning - Claro

**Libraries:**

- Safety Catalog

**Topic/Industry:**

- Chemicals, Substances and Hazard Communication
- General Safety and Manufacturing
- Health and Safety Management
- EHS Manager

**Course Objectives:**

Recognize PSM regulations that apply to compliance audits; Identify how to successfully perform an effective audit

**Runtime:** 15

Process Safety Management: Contractors (US)

The Process Safety Management (PSM) regulation requires host employers and contractors to work together to manage process safety. This course defines different types of contractors and reviews special safety requirements for employers at multi-employer work sites. Topics in this course include: Types of Employers, Host Employers, Contract Employers, Responsible Parties, and Working Together. After completing this course, learners will be able to identify the different types of employers on a multi-employer work site, recognize the responsibilities of host and contract employers, identify which party is responsible for safety, and identify how employers work together to protect their workers.

**Format:** eLearning - Claro

**Libraries:**

- Safety Catalog

**Topic/Industry:**

- Chemicals, Substances and Hazard Communication
- General Safety and Manufacturing
- Health and Safety Management
- EHS Manager

**Course Objectives:**

Recognize the responsibilities that both host and contract employers have for ensuring safety at a process facility; Identify the different ways these employers work together to protect their workers

**Runtime:** 20
Companies that are subject to the Process Safety Management (PSM) regulations are required to investigate each incident that resulted in, or could have resulted in, a catastrophic release of highly hazardous chemicals in the workplace. This course illustrates the importance of investigating incidents and communicating incident reports internally to ensure that similar incidents do not occur in the future. Topics in this course include: Types of Incidents, Investigation Plan, Investigations, Collecting Data, Causes, Corrective Actions, and Incident Report. In this course, learners will learn about the different types of incidents that must be investigated, when incidents should be reported, how to prepare incident reports, how to uncover root causes, and how to establish an effective system to implement corrective actions.

**Course Objectives:**
- Recognize the different types of incidents that must be investigated;
- Identify how to conduct incident investigations;
- Recognize how to analyze the data collected in an investigation to uncover the root causes of the incident;
- Recognize the importance of recommending effective corrective actions;
- Identify how to include recommendations in a well-organized investigation report

**Runtime:** 24

---

Management of Change (MOC) is a program designed to identify, evaluate, and prevent chemical releases that could result from changes in processes, procedures, or equipment. This course discusses MOC requirements that are part of the Process Safety Management (PSM) regulations. Topics in this course include: Change, Purpose, MOC Procedure, Change Request Form, and Implementation. After completing this course, learners will be able to recognize how and when they must use an MOC procedure, identify the components of a successful MOC procedure, and identify how companies use implementation to make sure their MOC procedure is adequate.

**Course Objectives:**
- Recognize how and when you must use a Management of Change (MOC) procedure;
- Recognize what must be included in an MOC procedure

**Runtime:** 15
Inadequate mechanical integrity caused by unsafe process equipment can cause catastrophic events in chemical processing facilities. This course illustrates the importance of a Mechanical Integrity Program (MIP) that companies are required to follow in compliance with Process Safety Management (PSM) regulations to help prevent catastrophic events. Topics in this course include: Mechanical Integrity Program, Preparation, Written Procedures, and Quality Assurance. After completing this course, learners will be able to recognize why a good MIP is important. They will also be able to identify the required elements of an MIP and recognize how to maintain the mechanical integrity of a process.

**Course Objectives:**
Recognize why a good MIP is important; Identify the required elements of an MIP; Recognize how to maintain mechanical integrity

**Runtime:** 16
Process Safety Management: Overview (US)

Unexpected releases of toxic, reactive, and flammable liquids and gases have caused great harm and numerous deaths. Such events underscore the need for better industry practices and safety management controls. This course introduces the structure of a process safety management (PSM) program for processes involving highly hazardous chemicals. Topics in this course include: Application of PSM, Elements of a PSM Program, and Employee Involvement. After completing this course, learners will be able to recognize the components of a PSM program, the companies and processes that fall under PSM regulations, and the importance of employee involvement in a PSM program. This is the first in a series of courses on process safety management.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Course Objectives:**
- Recognize the components of a Process Safety Management (PSM) program;
- Recognize the companies and processes that fall under PSM regulations;
- Recognize the importance of employee involvement

**Runtime:** 13

Process Safety Management: Pre-Startup Safety Review (US)

In many organizations today, companies have been cited for noncompliance with Process Safety Management violations. One of the most frequently cited is the lack of a Pre-Startup Safety Review (PSSR) when a new or modified system is introduced into a process. This course outlines the purpose of a startup, PSSR, and the process of arranging, planning and implementing PSSRs. Topics in this course include: Pre-Startup Safety Review (PSSR), Startup Types, and Performing a PSSR. After completing this course, learners will be able to define a PSSR, differentiate the two types of startups, and identify how companies perform PSSRs.

**Format:** eLearning - Claro

**Libraries:**
- Safety Catalog

**Course Objectives:**
- Recognize what a startup is;
- Recognize what is involved in a PSSR;
- Recognize how PSSRs are planned and implemented

**Runtime:** 11
Process Safety Management: Process Hazard Analysis (US)  

Employers should perform appropriate Process Hazard Analysis (PHA) techniques in their workplace to ensure employee safety. This course describes Process Hazard Analysis techniques as part of the Process Safety Management (PSM) series. Topics in this course include: Controlling Process Hazards, Risk Assessment, PHA Methods, HAZOP Method, FMEA Method, FTA Method, PHA Reports, and Implementation. After completing this course, learners will be able to identify what a PHA is and recognize the different types of PHAs a company can perform.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Chemicals, Substances and Hazard Communication
- General Safety and Manufacturing
- Health and Safety Management
- EHS Manager

Course Objectives:
Identify what a PHA is and the different types of PHAs a company can perform; Recognize how PHAs are used to identify and reduce significant process hazards

Runtime: 45

Process Safety Management: Process Safety Information (US)  

In order to understand the hazards associated with a chemical process, documentation relating to the process must be gathered. This data provides the basis for developing process hazard analyses, preparing operating and maintenance procedures, training, performing incident investigations, and managing changes as they occur. This course discusses process safety information (PSI) that is part of the Process Safety Management (PSM) regulations. Topics in this course include: Process Safety Information, Chemicals, Technology, Flow Diagrams, Equipment, and Participation. After completing this course, learners will be able to identify PSI, and recognize the three main PSI categories along with the specific data gathered within them.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Chemicals, Substances and Hazard Communication
- General Safety and Manufacturing
- Health and Safety Management
- EHS Manager

Course Objectives:
Identify Process Safety Information (PSI); Recognize the three main PSI categories; Recognize the specific data gathered within them

Runtime: 14
Process Safety Management: Training (US)

The root cause of many accidents can be traced back to inadequate communication and employee training. This course discusses training as part of the Process Safety Management (PSM) series and presents information on the training requirements for employees working in process industries. Topics in this course include: Requirements, Responsibilities, Training Types, and Refresher Training. After completing this course, learners will be able to recognize the training requirements of the PSM regulations, identify what kind of training employers should provide, recognize the different training methods that might be used, and identify training documentation requirements.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Chemicals, Substances and Hazard Communication
- General Safety and Manufacturing
- Health and Safety Management
- EHS Manager

Course Objectives:
Recognize the training requirements of the PSM regulations; Identify what kind of training employers should provide; Recognize the different training methods that might be used; Identify training documentation requirements

Runtime: 11

Radiofrequency (RF) Training

Radiofrequency (RF) is an invisible energy that we use in most wireless equipment and devices, such as those for communication and heating. Although it has many important uses, RF energy also has risks that you need to understand and avoid. Take this course to learn what RF energy is, where you may find it, its hazards, how to avoid them and what to do if you’ve been overexposed. This course is ideal for anyone who may be exposed to RF energy.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing

Course Objectives:
Define radiofrequency (RF) energy; Identify RF sources; Recall the safety and health hazards associated with RF exposure; Know safety precautions to take to avoid overexposure to RF; Know what to do if someone has been overexposed to RF

Runtime: 11
Reasonable Suspicion Training for Alcohol and Substance Abuse (US)

This course provides information about drug and alcohol policies in the workplace. It is specifically designed to cover requirements for drivers as specified by the DOT Federal Motor Carrier Safety Administration (FMCSA). It educates learners about the process of identifying potential drug and alcohol users, including spotting the indicators of substance abuse, conducting testing, and following up once results are available. This training is intended for people who manage or supervise commercial drivers.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Drug and Alcohol Policies
- Health and Safety Management
- Employment Liability
- Wind Turbine
- Driver and Transportation Safety

Content Suite:
- Reasonable Suspicion Training (US) Suite (PS5-12015)
- Reasonable Suspicion Training (US) Suite (IACET CEU-0.2) (BDL-12015)

Course Objectives:
- Identify your company’s responsibilities regarding substance abuse prevention
- Recognize the behaviors that violate Federal Motor Carrier Safety Administration (FMCSA) drug and alcohol policies
- List the steps for identifying employees who may be abusing a substance
- Explain what to do and what not to do during the process of identifying employees who may be abusing a substance
- Identify the indicators of substance abuse
- Explain how safety and performance standards are enforced

Runtime: 55

Recognizing Electrical Hazards Awareness

This course explains how and why electricity is dangerous so that employees may recognize when hazards are present. It is intended for workers in all industries.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Electrical and LOTO
- Awareness and Microlearning

Content Suite:
- Working from Home Suite (BDL-12127)
- Advanced Safety Orientation for General Industry (IACET CEU-0.9) (BDL-12074)
- OSHA 10: General Industry Outreach Training Course (IACET CEU-1.0) (BDL-12061)
- OSHA 10: General Industry Outreach Training Course (IACET CEU-1.0) (Actively Proctored) (BDL-12108)
- NFPA 70E Suite (IACET CEU-0.1) (BDL-12129)
- General Industry Safety Program (IACET CEU-1.1) (BDL-12132)

Course Objectives:
- Recall how electricity works
- Define key electrical terms
- Recognize why electrical incidents occur
- Recall the dangers associated with electrical hazards

Runtime: 13
Reporting (Data Entry)

How do you document details about what you discover during observations and incident investigations? One effective way is reports! Take this course to learn about report benefits as well as the characteristics of good reports. Ideal learners are managers, supervisors and safety committee members.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Health and Safety Management

Content Suite:
- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3) [BDL-12117]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- Why Incident Management Matters (WIMM) Suite [PSS-30009]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
- Recall when to complete reports
- Recognize the benefits of documenting observations, near misses and incidents
- Know the characteristics of effective reports

Runtime: 13

Resource Conservation and Recovery Act (RCRA) Part 1 (US)

The Resource Conservation and Recovery Act (RCRA) places controls on the management of hazardous waste from its generation to its ultimate disposal. This course provides you with important information on RCRA, hazardous waste and your role in staying safe if your facility or organization produces, disposes of or accumulates hazardous waste.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Environmental

Chemicals, Substances and Hazard Communication

Content Suite:
- DOT/EPA Hazardous Materials Suite (IACET CEU=0.5) [BDL-01230]
- Resource Conservation and Recovery Act (RCRA) Parts 1-2 (US) (IACET CEU=0.1) [BDL-00478]
- Resource Conservation and Recovery Act (RCRA) Parts 1-2 (US) [PS5-00478]
- General Industry Safety Program [IACET CEU=1.1] [BDL-12132]
- Environmental Responsibility Suite (IACET CEU=0.3) [PS5-101431]

Course Objectives:
- Define the purpose of RCRA
- Determine if a waste is a hazardous waste
- Identify categories of hazardous waste generators
- Determine your generator status
- Follow hazardous waste management and accumulation requirements
- Prepare your hazardous waste for shipment off-site

Runtime: 33
Resource Conservation and Recovery Act (RCRA) Part 2 (US)

Whenever you generate hazardous waste and accumulate it on-site, you must take the necessary precautions and steps to prevent any sudden or accidental release into the environment. This course explores the actions you must take to carefully operate and maintain your facility and therefore reduce the possibility of fire, explosion and release of hazardous waste.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Environmental
- Chemicals, Substances and Hazard Communication

Content Suite:
- DOT/EPA Hazardous Materials Suite (IACET CEU=0.5) [BDL-01230]
- Resource Conservation and Recovery Act (RCRA) Parts 1-2 (US) [PS5-00478]
- Resource Conservation and Recovery Act (RCRA) Parts 1-2 (US) (IACET CEU=0.1) [BDL-00478]
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]
- Environmental Responsibility Suite (IACET CEU=0.3)

Course Objectives:
Prepare for and prevent accidents involving hazardous waste; Recognize why training is necessary to comply with RCRA; Recall waste minimization techniques; Conduct a self-inspection; Prepare for a facility inspection; Identify where to find answers to your questions about hazardous waste management

Runtime: 15

Respiratory Protection

A single exposure to an airborne chemical can cause health effects that may last for the rest of your life. If your workplace contains dangerous chemicals or hazardous atmospheres, you need to know when and how to wear a respirator. This training will present the basic requirements of respiratory protection and will focus on the types and limitations of respirators. Ideal learners include all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Content Suite:
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

Course Objectives:
Identify employer and employee respirator responsibilities; Describe what happens during medical evaluations and fit testing; Recognize characteristics of different types of respirators; Recall how to inspect respirators before each use; Recognize the signs of respirator failure; Recall how to maintain respirators

Runtime: 24
Respiratory Protection (US)

A single exposure to an airborne chemical can cause health effects that may last for the rest of your life. If your workplace contains dangerous chemicals or hazardous atmospheres, you need to know when and how to wear a respirator. This training will present the basic requirements of respiratory protection and will focus on the types and limitations of respirators. Learners include all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Construction
- Wind Turbine
- Hot Work, Fire Watch and Welding

Course Objectives:
Identify employer and employee respirator responsibilities; Describe what happens during medical evaluations and fit-testing; Recognize characteristics of different types of respirators; Recall how to inspect respirators before each use; Recognize the signs of respirator failure; Recall how to maintain respirators

Runtime: 25

Respiratory Protection Awareness

A single exposure to an airborne chemical can cause health effects that last for the rest of your life. If your workplace contains dangerous chemicals, you may need to know about respirator use. This training will present the basic requirements of respiratory protection and will focus on the types and limitations of respirators. Ideal learners include all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding
- Awareness and Microlearning

Content Suite:
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Identify typical elements of respiratory protection programs; Know what happens during medical evaluations and fit testing; Recognize characteristics of different types of respirators; Recall the importance of respirator inspection, maintenance and storage

Runtime: 11
Road Rage Awareness

In our fast-paced world, it seems that many drivers carry their frustrations and impatience into their vehicles with them. Road rage is something you must be aware of and control as a driver. This training is designed to give you the information you need to avoid becoming the victim of road rage or succumbing to it. Ideal learners are all drivers.

Format: eLearning - Claro

Languages Available: English

Libraries: Safety Catalog

Topic/Industry: Driver and Transportation Safety

Course Objectives:
Recognize aggressive driving and road rage
Know what triggers and traits are common for drivers with road rage
Recall ways to avoid road rage

Runtime: 9

Rough Terrain Forklift Safety - Part 1: Readiness

The steps you take before operating a rough terrain forklift can make a huge difference in your safety during operation. Take this course to learn what rough terrain forklifts and their components are and how to make sure operators, areas, equipment and loads are properly prepared. This course is ideal for workers who will use rough terrain forklifts and their supervisors.

Format: eLearning - Claro

Languages Available: English, Spanish (Latin America) (PS5-103357)

Libraries: Safety Catalog

Topic/Industry: Construction, General Safety and Manufacturing, Warehouse Safety

Content Suite:
OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Recognize rough terrain forklifts and their parts
Ensure that an operator is ready to operate a rough terrain forklift
Evaluate and prepare an area for rough terrain forklift operation
Know what is included in visual and operational inspections of rough terrain forklifts
Use a load capacity chart

Runtime: 14
Rough Terrain Forklift Safety - Part 2: Operation

Before you complete vital hands-on training about how to operate rough terrain forklifts, it is helpful to understand some basic safe practices. Take this course for tips on safely starting the forklift and avoiding collisions and tip-overs. You will also learn about lifting and parking safely. This course is ideal for workers who will use rough terrain forklifts and their supervisors.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- General Safety and Manufacturing
- Warehouse Safety

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU-3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU-3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Know how and when to start rough terrain forklifts; Recall safe practices to avoid collisions when operating rough terrain forklifts; Recall safe practices to prevent tip-overs when operating rough terrain forklifts; Recall safe practices for performing lifts with rough terrain forklifts; Know how to safely park rough terrain forklifts

Runtime: 9

Safe Return to the Workspace: Preparing Your Workspace

When it is time to return to the workspace, there are changes you and your employer can make to improve health and safety. This course specifically looks at cleaning workspaces, encouraging regular housekeeping, evaluating and separating workspaces, adjusting communal areas like bathrooms and break rooms, and limiting congregations and gatherings.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- All Industries

Course Objectives:
Recognize how to make workspaces as clean and safe as possible or practical

Runtime: 4

Safe Return to the Workspace: Preparing Yourself

When employers determine it is safe to return to workspaces, it is important to remember that aspects of the threat may still be present. This course specifically looks at evaluating personal wellness before returning; reporting illnesses and vaccinations; policies for unvaccinated employees; using transmission mitigation equipment (TME) such as face coverings; and anticipating entry checkpoints. This course is ideal for all workers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- All Industries

Course Objectives:
Recall how to prepare to return to workspaces

Runtime: 4
Safe Return to the Workspace: Sharing Workspaces

As we return to shared workspaces, we must all look out for and protect each other. This course specifically looks at precautions like avoiding commonly touched surfaces, washing hands, limiting travel, avoiding close contact, and being an advocate for health and safety. Ideal learners are all employees.

Format: eLearning - Claro

Languages Available: English

Course Objectives:
Recall how to practice good hygiene; Recognize controls to keep you safe and healthy; Identify how to be an advocate for health and safety

Runtime: 4

Safe Return to Work for Construction

Recently, the COVID-19 pandemic has affected your life at home and on the jobsite. This training is part of the efforts of your employer to ensure a safe and healthy jobsite. In it, you will learn about evaluating your health and taking precautions to prevent the spread of disease. This course is ideal for all workers on construction jobsites.

Format: eLearning - Claro

Languages Available: English

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
Recall how the COVID-19 virus spreads; Recognize symptoms of COVID-19; Recall controls to prevent the spread of disease, including social distancing, cleaning, hygiene and transmission mitigation equipment; Know how to be an advocate for health and safety

Runtime: 17

Safe Vehicle Operations (US)

This course educates commercial vehicle operators and other personnel at trucking companies about how to avoid accidents caused by speeding, following other vehicles too closely and executing turns incorrectly.

Format: eLearning - Claro

Languages Available: English

Content Suite:
- Commercial Drivers Suite (IACET CEU=0.4) (BDL-12055)

Course Objectives:
Explain how speed can affect the performance of a vehicle and the load it is carrying; Describe how to maintain safe following distances when behind a vehicle; List important guidelines regarding turning operations

Runtime: 10
### Safe Workspaces: Telecommuting

Some employees might not return to the workspace after an environmental disaster, catastrophic event or pandemic, such as the COVID-19 pandemic. If you continue working from home, you may need to adjust your workspace setup, communications software, security measures and daily routine. You’ll also need to learn the best ways to connect and collaborate with your work team while reducing distractions. Ideal learners are all employees.

**Format:** eLearning - Claro

**Libraries:** Safety Catalog  
**Topic/Industry:**  
- All Industries  
- Working from Home/Remote  
- Ergonomics and Office Safety

**Course Objectives:**  
- Recognize ways to stay safe and healthy while working from home  
- Know ways to keep company information safe  
- Recall how to effectively set up a home office  
- Recall how to work effectively with co-workers

**Runtime:** 4

### Safety and You

As a supervisor, your actions directly impact the employees you supervise. How you handle yourself, what you say and even what you do not say impact how employees behave. Therefore, we will examine several safety management approaches and help you build an enhanced climate for safety in your workplace. Ideal learners are supervisors and managers.

**Format:** eLearning - Claro

**Libraries:** Safety Catalog  
**Topic/Industry:**  
- General Safety and Manufacturing  
- Health and Safety Management  
- Warehouse Safety

**Content Suite:**  
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]  
- General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

**Course Objectives:**  
- Explain why traditional approaches to safety management are necessary but perhaps not sufficient to eliminate accidents and injuries  
- Identify why discipline-based safety management doesn't work to motivate safe behavior  
- Know how to use positive feedback to motivate safe performance  
- Specify how to build a climate for safety

**Runtime:** 46

### Safety and You Awareness

We make choices that affect jobsite safety every day. What motivates these choices? Are there ways to influence others and create a safer workplace? Take this course to find out! Ideal learners are all employees.

**Format:** eLearning - Claro

**Libraries:** Safety Catalog  
**Topic/Industry:**  
- General Safety and Manufacturing  
- Health and Safety Management  
- Warehouse Safety  
- Awareness and Microlearning

**Course Objectives:**  
- Know common reasons people take risks  
- Recognize how to motivate safe actions  
- Recall how to give praise and voice safety concerns

**Runtime:** 8
Safety and You for Construction: Encouraging Safe Work

Every day, the employees you supervise make choices that affect their safety and the safety of everyone on your jobsite. What motivates their choices? Are there ways you can influence them to act safely? Take this course to find out! Ideal learners are construction supervisors and managers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Health and Safety Management
- Warehouse Safety

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Know common reasons that people take risks; Recognize how to motivate safe actions; Recall how to effectively provide feedback about work performance

Runtime: 20

Safety and You for Construction: Supervisor Role

As a supervisor, your actions directly impact the employees you supervise. How you handle yourself, what you say and even what you do not say can influence the choices employees make. Therefore, we will examine several safety management approaches and help you build an enhanced climate for safety at your jobsite. Ideal learners are construction supervisors and managers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Health and Safety Management
- Warehouse Safety

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Know how supervisor action and inaction can shape the culture of safety on a construction site; Recall ways to manage the human element in safety; Identify steps supervisors can take to improve safety at their construction sites

Runtime: 13
Safety Everywhere: Carbon Monoxide

Did you know there is a potentially deadly gas in most homes? It has no odor or color, so it is hard to detect. This dangerous gas is carbon monoxide. The good news is, there are ways you can keep yourself and your family safe. Take this course to refresh your memory about the sources of carbon monoxide, symptoms of exposure and prevention. This course is intended for everyone.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Awareness and Microlearning
- Chemicals, Substances and Hazard Communication

Content Suite:
- Working from Home Suite [BDL-12127]
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- Microlearning: Safety Everywhere Suite (PS5-30072)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]

Course Objectives:
Recognize sources of carbon monoxide in your home; Remember ways to prevent carbon monoxide buildup; Know the symptoms of carbon monoxide exposure; Know what to do if you suspect the presence of carbon monoxide

Runtime: 5

Safety Everywhere: Coping with Cold

Did you know that extreme cold can seriously hurt you? Take this course to find out how you can stay warm and avoid the dangers of becoming too cold. This course is intended for everyone.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Warehouse Safety
- First Aid, Health and Wellness
- Awareness and Microlearning

Content Suite:
- Working from Home Suite [BDL-12127]
- Microlearning: Safety Everywhere Suite (PS5-30072)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]

Course Objectives:
Recall ways to warm up when it is cold; Recognize symptoms of too much cold exposure; Know what to do and not to do for victims of the cold

Runtime: 7
Safety Everywhere: Dealing with Heat

Hot temperatures can quickly go from uncomfortable to dangerous. Take this course to find out how you can stay safe in the heat. This course is intended for everyone.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Warehouse Safety
- Hot Work, Fire Watch and Welding
- First Aid, Health and Wellness
- Awareness and Microlearning

Content Suite:
- Working from Home Suite [BDL-12127]
- Microlearning: Safety Everywhere Suite [PS5-30072]

Course Objectives:
- Recall how heat affects your body
- Recognize how to avoid heat illnesses
- Know when to seek medical help

Runtime: 5

Safety Everywhere: Fire Safety

Fires can destroy property, homes and lives. No one wants to have to deal with a fire. Fortunately, there are things you can do that will help you stop fires from happening and ensure you can stay safe if there is a fire. Take this course to learn how! This course is intended for everyone.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress
- Awareness and Microlearning

Content Suite:
- Working from Home Suite [BDL-12127]
- Microlearning: Safety Everywhere Suite [PS5-30072]

Course Objectives:
- Remember ways to prevent and prepare for fires
- Know what to include in fire safety plans
- Decide what to do when there is a fire

Runtime: 5
Safety Everywhere: Staying Safe on Two Wheels

When you operate a two-wheeled vehicle, whether it is a bicycle or a motorized vehicle, you are vulnerable. You do not have the same protections as you do when you are inside a car or bus. That means you need to take extra care to remain safe. In this course, we will review some basic safety advice you can use to avoid accidents and injuries. This course is ideal for operators of bicycles and motorized two-wheeled vehicles.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Driver and Transportation Safety
- Awareness and Microlearning

Content Suite:
- Working from Home Suite (BDL-12127)
- Microlearning: Safety Everywhere Suite (PS5-30072)

Course Objectives:
Recall how to choose the right gear; Know how to avoid distractions; Recognize how to be safe on the road

Runtime: 5

Safety Orientation

This employee safety program is much more than an examination of set rules. It is a common-sense approach to training employees in order to prevent injuries and illness. Ideal learners are new employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Warehouse Safety

Content Suite:
- General Industry Safety Program (IACET CEU=1.1) (BDL-12132)

Course Objectives:
Realize the importance of safety in your daily responsibilities; Recall the rules to follow when handling hazardous materials or operating equipment; Report safety incidents

Runtime: 10
Safety Signs (US)

You can tell a great deal about the hazardous conditions in a work area by looking at the safety signs that are posted there. Take this course to find out why we have safety signs, what they mean and what you need to know about them. This course is ideal for all workers who visit or perform work at factories, construction job sites or healthcare facilities.

Format: eLearning - Claro

Languages Available:
- English
- Spanish (Latin America) (PS5-103295)

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Construction
- Warehouse Safety

Content Suite:
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (BDL-12060)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12107)
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) []

Course Objectives:
Recall the purpose of signs; Interpret the meaning of signs; Know best practices for signs including placement and accompanying controls

Runtime: 9

Scaffold Safety Essentials

Working on scaffolds can be dangerous, but it does not need to be. Take this course to learn about the hazards that are common to all scaffolds and the hazards that are unique to certain types of scaffolds. You will learn how scaffold design and work practices can make your work safer. This course is ideal for employees who work on or around scaffolds as well as their managers.

Format: eLearning - Claro

Languages Available:
- English
- French (Canadian) (PS5-103524)
- Portuguese (Brazil) (PS5-103531)
- Spanish (Latin America) (PS5-103496)

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Slips, Trips and Falls
- Awareness and Microlearning

Content Suite:
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (BDL-12060)
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) (BDL-12107)

Course Objectives:
Identify types of scaffolds and their associated characteristics; Recognize the general hazards associated with scaffolds; Know the role of the competent person as it relates to scaffolding; Know how scaffolds are made safe by design, during assembly and through proper use and maintenance; Recall safety strategies, protective measures and employer requirements associated with scaffolds; Recognize when scaffold work conditions are unsafe; Know what to do if you recognize potentially unsafe scaffold conditions

Runtime: 17
Semiconductor Chemical Safety Part 1a: Introduction to the GHS

Workers in the semiconductor industry work with and around hazardous chemicals every day. Take this course to learn about the Globally Harmonized System of Classification and Labelling of Chemicals (GHS) so you can use these chemicals safely. Ideal learners are semiconductor employees.

Format: eLearning - Claro
Partners: SESHA

Libraries:
- Hi-tech/Semiconductor Safety Library

Content Suite:
- SESHA: Semiconductor Chemical Safety Including Toxic Gases (IACET CEU=0.2) [BDL-12079]
- SESHA: Semiconductor Chemical Safety, Parts 1-4 (US) [PS5-30057]
- SESHA: Semiconductor Chemical Safety Including Toxic Gases (US) [PS5-12079]
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) (BDL-12102)
- SESHA Safety Bootcamp Suite (IACET CEU=0.9)

Course Objectives:
- Know what is included in the Globally Harmonized System of Classification and Labelling of Chemicals (GHS)
- Recognize the characteristics of hazardous materials
- Recall GHS classifications

Runtime: 20

Semiconductor Chemical Safety Part 1b: Communication Controls and Emergency Procedures (US)

Employees in the semiconductor industry work with and around hazardous chemicals every day. Take this course to learn about how to store, use and dispose of hazardous chemicals along with steps to take when there is a hazardous chemical event. Ideal learners include semiconductor employees.

Format: eLearning - Claro
Partners: SESHA

Libraries:
- Hi-tech/Semiconductor Safety Library

Content Suite:
- SESHA: Semiconductor Chemical Safety Including Toxic Gases (IACET CEU=0.2) [BDL-12079]
- SESHA: Semiconductor Chemical Safety, Parts 1-4 (US) [PS5-30057]
- SESHA: Semiconductor Chemical Safety Including Toxic Gases (US) [PS5-12079]
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) (BDL-12102)
- SESHA Safety Bootcamp Suite (IACET CEU=0.9)

Course Objectives:
- Know Safety Data Sheet (SDS) and label requirements according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS)
- Know what controls to use and precautions to take when storing and using hazardous chemicals
- Know what to do when there is an emergency situation involving hazardous chemicals
- Know disposal requirements and restrictions for hazardous chemicals

Runtime: 23
Semiconductor Chemical Safety Part 2: Hazards Controls and Emergency Actions

There are many chemicals you may be exposed to in semiconductor fabrication work. Each chemical has specific characteristics, hazards and safety measures associated with it. Take this course to learn what these chemicals are and how to protect yourself. Ideal learners are semiconductor employees.

Format: eLearning - Claro
Partners: SESHA
Libraries: Hi-tech/Semiconductor Safety Library
Topic/Industry: Hi-tech/Semiconductor Safety

Content Suite:
- SESHA: Semiconductor Chemical Safety Including Toxic Gases (IACET CEU=0.2) [BDL-12079]
- SESHA: Semiconductor Chemical Safety, Parts I-4 (US) [PS5-30057]
- SESHA: Semiconductor Chemical Safety Including Toxic Gases (US) [PS5-12079]
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) [BDL-12102]
- SESHA Safety Bootcamp Suite (IACET CEU=0.9)

Course Objectives:
Know about the chemical hazards in semiconductor fabrication facilities; Recognize common hazard controls in semiconductor fabrication facilities; Recall the initial actions to take during a hazardous chemical emergency

Runtime: 25

Semiconductor Chemical Safety Part 3: Extremely Hazardous Chemicals

There are many extremely hazardous chemical categories in semiconductor fabrication of which you need to be hyper-aware. Take this course to learn about nine of the categories, what they are and what to do in emergencies involving them. Ideal learners are semiconductor employees.

Format: eLearning - Claro
Partners: SESHA
Libraries: Hi-tech/Semiconductor Safety Library
Topic/Industry: Hi-tech/Semiconductor Safety

Content Suite:
- SESHA: Semiconductor Chemical Safety Including Toxic Gases (IACET CEU=0.2) [BDL-12079]
- SESHA: Semiconductor Chemical Safety, Parts I-4 (US) [PS5-30057]
- SESHA: Semiconductor Chemical Safety Including Toxic Gases (US) [PS5-12079]
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) [BDL-12102]
- SESHA Safety Bootcamp Suite (IACET CEU=0.9)

Course Objectives:
Recall important information about nine categories of extremely hazardous chemicals found in semiconductor fabrication; Use data sheets to answer questions about extremely hazardous chemicals; Recall important information about nine extremely hazardous chemical categories; Know what initial actions to take in the event of extremely hazardous chemical emergencies

Runtime: 25
Semiconductor Chemical Safety Part 4: Hazardous Gases and Control Systems (US)

Hazardous gases used in semiconductor fabrication facilities are typically stored outside of the manufacturing area and piped in to the processing equipment. An accidental release of any gas could cause injury or death. In this course you will learn about the gases used, the hazards they pose and the controls used to protect workers. Ideal learners are semiconductor employees.

Format: eLearning - Claro

Languages Available: English

We all know that electricity can be dangerous. It can even kill! Working around electricity is part of your job, so we want to make sure you have the information you need to stay safe. Take this course to learn about the characteristics of electricity and electrical hazards and how to avoid them. Ideal learners are semiconductor fabrication workers.

Format: eLearning - Claro

Languages Available: English

Course Objectives:
Recall the characteristics of electricity; Describe the relationship between current, voltage and resistance as expressed by Ohm's Law; Recognize conductors and insulators; Define electrical hazards including electrical shock and arc-flash; Recall the meaning of electrical hazard signs; Recognize electrical hazards and conditions to avoid.

Runtime: 21

Languages Available: English
Semiconductor Electrical Safety Part 2: Developing a Risk-Based Approach to Electrical Safety

To protect yourself from shock and electrocution, you have to understand electrical hazards in your semiconductor workplace. Take this course to learn about different electrical risk assessments and protective measures that may be implemented as a result. Ideal learners are semiconductor fabrication workers.

Format: eLearning - Claro
Libraries: Hi-tech/Semiconductor Safety Library
Topic/Industry: Hi-tech/Semiconductor Safety

Content Suite:
- SESHQA: Semiconductor Electrical Safety (IACET CEU-0.1) (PS5-12080)
- SESHQA: Semiconductor Hazardous Energy and Electrical Safety (US) (PS5-12080)
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU-1.0) (BDL-12102)
- SESHQA: Semiconductor Electrical Safety, Parts 1-4 (US) (PS5-30056)
- SESHQA Safety Bootcamp Suite (IACET CEU-0.9) [

Course Objectives:
- Identify how NFPA 70E® applies to semiconductor fabrication facilities;
- Select information that must be included in risk assessments;
- Recall electrical hazard protective measures;
- Recognize the steps required to establish electrically safe work conditions;
- Select examples of authorized energized work;
- Define “qualified person” responsibilities;
- Define approach boundaries

Runtime: 20

Semiconductor Electrical Safety Part 3: Implementing Electrical Safety (US)

Working safely around electricity is vital in semiconductor fabrication facilities. In this course, you will learn more about the process for implementing electrical safety, including how assessment results are used to help keep you and your co-workers safe. You will also get a review of the lockout/tagout process and learn the importance of an energized electrical work permit. Ideal learners are semiconductor fabrication workers.

Format: eLearning - Claro
Libraries: Hi-tech/Semiconductor Safety Library
Topic/Industry: Hi-tech/Semiconductor Safety

Content Suite:
- SESHQA: Semiconductor Electrical Safety (IACET CEU-0.1) (PS5-12080)
- SESHQA: Semiconductor Hazardous Energy and Electrical Safety (US) (PS5-12080)
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU-1.0) (BDL-12102)
- SESHQA: Semiconductor Electrical Safety, Parts 1-4 (US) (PS5-30056)
- SESHQA Safety Bootcamp Suite (IACET CEU-0.9) [

Course Objectives:
- Locate electrical hazard information in NFPA 70E® tables and on equipment labels;
- Define arc-flash risk assessment methods;
- Recognize the steps in the lockout/tagout process;
- Identify the required elements of an energized electrical work permit

Runtime: 16
Semiconductor Electrical Safety Part 4: Electrical Safety Program Components (US)

To ensure the safety of employees who work around electricity in semiconductor fabrication facilities, employers must meet several requirements. One of the requirements is to have a written electrical safety program. In this course, you will learn how the results of the risk assessments are used to create a program and implement safe work practices. You will also learn how to respond in the event of an electrical emergency. Ideal learners are semiconductor fabrication workers.

**Format:** eLearning - Claro

**Partners:** SESH

**Libraries:**
- Hi-tech/Semiconductor Safety Library
- Hi-tech/Semiconductor Safety
- Electrical and LOTO

**Content Suite:**
- SESH: Semiconductor Electrical Safety (IACET CEU-0.1) [PS5-12080]
- SESH: Semiconductor Hazardous Energy and Electrical Safety (US) [PS5-12080]
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU-1.0) [BDL-12102]
- SESH: Semiconductor Electrical Safety, Parts 1-4 (US) [PS5-30056]
- SESH Safety Bootcamp Suite (IACET CEU-0.9) [

**Course Objectives:**
- Identify electrical safety program components
- Recall safe electrical work practices
- Know electrical safety responsibilities and training requirements
- Recall how to respond during an electrical emergency

**Runtime:** 20

Semiconductor Environmental, Health and Safety at Work Part 1

Employers must do what they can to protect workers from injuries and illnesses. They must implement an environmental, safety and health program, and employees must be trained in it. This course is part of that program. You will learn about precautions, safety and security, workplace hazards, emergencies, and resource and energy conservation. Ideal learners are semiconductor employees.

**Format:** eLearning - Claro

**Partners:** SESH

**Libraries:**
- Hi-tech/Semiconductor Safety Library
- Hi-tech/Semiconductor Safety

**Content Suite:**
- SESH: General EHS, Ergonomics and Semiconductor Safety (IACET CEU-0.1) [BDL-12078]
- SESH: Semiconductor Environmental, Health and Safety at Work, Parts 1-3 (PS5-30078)
- SESH: General EHS, Ergonomics and Semiconductor Safety (US) (PS5-12078)
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU-1.0) [BDL-12102]
- SESH Safety Bootcamp Suite (IACET CEU-0.9) [

**Course Objectives:**
- Recognize EHS precautions and how they apply to you
- Know general safety and security precautions for your work environment
- Know how to report an EHS accident
- Identify common workplace hazards
- Know what to do in case of an emergency
- Recall housekeeping protocols to reduce hazards
- Recall three money and energy saving conservation practices

**Runtime:** 17
Semiconductor Environmental, Health and Safety at Work Part 2

Semiconductor fabrication workers are confronted with environmental, safety and health hazards on a daily basis. Take this course to learn about what steps your employer or host site is required to take and what actions you can take to ensure your safety and the safety of others. This course specifically addresses ergonomics, noise, personal protective equipment (PPE), working alone and chemical safety. Ideal learners are semiconductor fabrication workers.

Format: eLearning - Claro

Libraries:
- Hi-tech/Semiconductor Safety Library

Content Suite:
- SESHA: General EHS, Ergonomics and Semiconductor Safety (IACET CEU=0.1) [BDL-12078]
- SESHA: Semiconductor Environmental, Health and Safety at Work, Parts 1-3 [PS5-30078]
- SESHA: General EHS, Ergonomics and Semiconductor Safety (US) [PSS-12078]
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) [BDL-12102]
- SESHA Safety Bootcamp Suite (IACET CEU=0.9) [

Course Objectives:
- Recognize common types of ergonomic injuries and risk factors and best practices that can minimize them
- Identify the health effects of exposure to high levels of noise
- Define the hearing conservation program, including how noise is measured and types of hearing protection
- Recognize best practices for the use and maintenance of personal protective equipment (PPE)
- Identify risk factors and precautions for working alone
- Know the topics addressed in your company's hazard communication program, including labels and Safety Data Sheets (SDSs)
- Identify chemical routes of entry and ways to handle exposure
- Recognize the hazards new chemicals or equipment may bring to the facility

Runtime: 25

Semiconductor Environmental, Health and Safety at Work Part 3

Think about all the equipment used in a semiconductor fabrication facility. Now think about the different types of hazardous energy used to operate that equipment. Take this course to learn about these hazards and what you can do to ensure the safety of everyone exposed to them. This course specifically addresses hazardous energy types and regulations, energy isolating devices and electrical safety. Ideal learners are semiconductor fabrication workers.

Format: eLearning - Claro

Libraries:
- Hi-tech/Semiconductor Safety Library

Content Suite:
- SESHA: General EHS, Ergonomics and Semiconductor Safety (IACET CEU=0.1) [BDL-12078]
- SESHA: Semiconductor Environmental, Health and Safety at Work, Parts 1-3 [PS5-30078]
- SESHA: General EHS, Ergonomics and Semiconductor Safety (US) [PSS-12078]
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) [BDL-12102]
- SESHA Safety Bootcamp Suite (IACET CEU=0.9) [

Course Objectives:
- Recognize the types of hazardous energy that may be present in your environment
- Select the best source for determining hazardous energy regulations for your workplace
- Recall types of energy isolating devices and their purpose
- Identify electrical energy injuries and how to prevent them

Runtime: 15
Semiconductor Ergonomics for Maintenance and Service

Musculoskeletal disorders (MSDs) that result from ergonomic injuries are the most common reason employees cannot work. However, you can prevent these types of injuries. This course will explain the actions you can take to avoid or minimize the ergonomic risks you face at work. Ideal learners are semiconductor fabrication workers.

**Format:** eLearning - Claro  **Partners:** SE Hanna

**Libraries:**
- Hi-tech/Semiconductor Safety Library

**Content Suite:**
- SE Hanna: General EHS, Ergonomics and Semiconductor Safety (IACET CEU=0.1) [BDL-12078]
- SE Hanna: General EHS, Ergonomics and Semiconductor Safety (US) [PS5-12078]
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) [BDL-12102]
- SE Hanna Safety Bootcamp Suite (IACET CEU=0.9)

**Course Objectives:**
Recognize common types of injuries; Identify ergonomic risk factors; Recall early reporting guidelines; Recognize ergonomic best practices for setting up and using workstations, manually handling material, and completing common maintenance tasks; Select hand tools that optimize ergonomics; Identify planning considerations for service tasks

**Runtime:** 25

Semiconductor Fabrication Worker Safety Part 1

Each semiconductor fabrication factory area has unique hazards and controls. Take this course to learn about what to expect so that you can anticipate hazards and make sure controls are in place to maintain safety during each step of the semiconductor manufacturing process. Ideal learners are semiconductor fabrication workers.

**Format:** eLearning - Claro  **Languages Available:** English

**Libraries:**
- Hi-tech/Semiconductor Safety Library

**Content Suite:**
- SE Hanna: Semiconductor Fabrication Worker Safety (IACET CEU=0.1) [BDL-12081]
- SE Hanna: Semiconductor Fabrication Worker Safety, Parts 1-2 [PS5-30059]
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) [BDL-12102]
- SE Hanna Safety Bootcamp Suite (IACET CEU=0.9)

**Course Objectives:**
Know four basic areas that are common to all semiconductor fabrication factories (fabs); Identify hazards and controls in fab areas; Recall initial actions to take during an emergency event in a clean room; Identify the basic steps in the semiconductor manufacturing process; Recognize the hazards and controls associated with the semiconductor manufacturing processes

**Runtime:** 20
Semiconductor Fabrication Worker Safety Part 2

Each step of the semiconductor manufacturing process has its own hazards. It is important that you understand the hazards and what controls are in place to protect you. Take this course to find out about some of the specific steps, their hazards and safety measures. Ideal learners - Semiconductor fabrication workers

Format: eLearning - Claro
Libraries:
- Hi-tech/Semiconductor Safety Library

Content Suite:
- SESHA: Semiconductor Fabrication Worker Safety (IACET CEU-0.1) [BDL-12081]
- SESHA: Semiconductor Fabrication Worker Safety, Parts 1-2 (PS5-30059)
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU-1.0) [BDL-12102]
- SESHA Safety Bootcamp Suite (IACET CEU-0.9)

Course Objectives:
Recognize semiconductor manufacturing processes and associated hazards and controls

Runtime: 31

Semiconductor Hazardous Energy Control Part 1

Think safety first when working within semiconductor fabrication facilities. Become aware of the different types of hazardous energy that may injure or even kill you. Develop and practice a hazardous energy control program at your company using lockout/tagout procedures when servicing equipment or tools inside the fabrication facility. Ideal learners are semiconductor fabrication workers.

Format: eLearning - Claro
Libraries:
- Hi-tech/Semiconductor Safety Library

Content Suite:
- SESHA: Semiconductor Hazardous Energy Control, Parts 1-3 (PS5-30078)
- SESHA: Semiconductor Hazardous Energy and Electrical Safety (US) (PS5-12080)
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU-1.0) [BDL-12102]
- SESHA Safety Bootcamp Suite (IACET CEU-0.9)
- SESHA: Semiconductor Hazardous Energy (IACET CEU-0.2)

Course Objectives:
Know the types of hazardous energy that may be present in semiconductor fabrication environments; Recall the purpose of a hazardous energy control program; Identify employer requirements to establish and use a hazardous energy control program; Recall the responsibilities of three types of employee roles involved in a hazardous energy control program

Runtime: 21
Semiconductor Hazardous Energy Control Part 2

Think safety first when working within semiconductor fabrication units. Take this course to learn about the physical methods used to control hazardous energy found in your work area. Also learn about SEMI safety guidelines for interlock systems and hazardous energy isolation. Ideal learners are semiconductor fabrication workers, especially authorized employees.

**Format:** eLearning - Claro

**Partners:** SESHA

**Libraries:**
- Hi-tech/Semiconductor Safety Library
- Hi-tech/Semiconductor Safety
- Electrical and LOTO

**Content Suite:**
- SESHA: Semiconductor Hazardous Energy Control, Parts 1-3 (PSS-30078)
- SESHA: Semiconductor Hazardous Energy and Electrical Safety (US) (PSS-12080)
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) (BDL-12102)
- SESHA Safety Bootcamp Suite (IACET CEU=0.9) [ ]
- SESHA: Semiconductor Hazardous Energy (IACET CEU=0.2) [ ]

**Course Objectives:**
Choose the correct energy isolation method for different types of hazardous energies; Differentiate between devices that do and do not isolate energy; Distinguish between energy isolating devices that can and can't be locked out; Know how lockout devices and adapters are used; Recognize SEMI S2 guidelines for safety interlock systems; Recognize SEMI S2 guidelines for hazardous energy isolation

**Runtime:** 16

Semiconductor Hazardous Energy Control Part 3

Unexpected energization of semiconductor fabrication equipment being serviced or maintained can have fatal consequences. Take this course to learn how lockout/tagout procedures protect all employees and make the employees who perform maintenance and service work 100% responsible for their own safety. Ideal learners are semiconductor fabrication workers, especially authorized employees.

**Format:** eLearning - Claro

**Partners:** SESHA

**Libraries:**
- Hi-tech/Semiconductor Safety Library
- Hi-tech/Semiconductor Safety
- Electrical and LOTO

**Content Suite:**
- SESHA: Semiconductor Hazardous Energy Control, Parts 1-3 (PSS-30078)
- SESHA: Semiconductor Hazardous Energy and Electrical Safety (US) (PSS-12080)
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) (BDL-12102)
- SESHA Safety Bootcamp Suite (IACET CEU=0.9) [ ]
- SESHA: Semiconductor Hazardous Energy (IACET CEU=0.2) [ ]

**Course Objectives:**
Order the steps in the lockout/tagout procedure; Identify the requirements for each step in an effective lockout/tagout program; Identify the steps to be taken following the completion of the maintenance; Recognize when and how group LOTO may be used

**Runtime:** 16
Sexual Harassment and Abusive Conduct Prevention for Managers (California AB 1825 and 2053) (US)

When taken with Sexual Harassment Prevention for Managers, this course fulfills the California AB 1825 and AB 2053 requirements that employers of five or more employees educate supervisors about sexual harassment, discrimination, retaliation and abusive conduct every two years. Senate Bill (SB) 396 amends California's Fair Employment and Housing Act (FEHA) to include prevention of harassment based on gender identity, gender expression and sexual orientation. Potential harassment, discrimination, retaliation or abusive conduct can appear anywhere in the work environment and in many different forms. As a manager, you need to be on constant alert as to what is going on in the workplace and know how to deal with inappropriate and illegal behaviors. This course provides practical examples designed to raise management awareness of the potential employee issues and the legal liabilities associated with such conduct.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Content Suite:
- Sexual Harassment Prevention for Managers CA AB 1825 and 2053 Suite (IACET CEU=0.2) [BDL-12089]

Course Objectives:
Identify and explain your role as a manager; Discuss California law as it relates to harassment, discrimination, retaliation and abusive conduct; Identify the components of an effective sexual harassment and abusive conduct policy; List and explain what to do when an employee comes to you with a complaint; Given a scenario, correctly identify how to effectively report complaints and educate employees regarding inappropriate behavior that violates your company's policy

Runtime: 71

Sexual Harassment Prevention for Managers (US)

Potential sexual harassment entanglements can appear anywhere in the work environment and in many different forms. As a manager, you need to be on constant alert about what goes on in your workplace and know how to deal with inappropriate and unlawful behaviors. This course provides practical examples designed to raise management awareness of potential employee issues and the legal liabilities associated with sexual harassment. To fulfill the two-hour sexual harassment training requirements of California AB 1825, this course should be taken in conjunction with Sexual Harassment and Abusive Conduct Prevention for Managers (California AB 1825 and 2053).

Format: eLearning - Claro

Libraries:
- Safety Catalog

Content Suite:
- Sexual Harassment Prevention for Managers CA AB 1825 and 2053 Suite (IACET CEU=0.2) [BDL-12089]

Course Objectives:
List and define the different types of sexual harassment; Identify appropriate, inappropriate and illegal behaviors through factual scenarios; Become familiar with federal laws and legal trends for sexual harassment; List the actual and hidden costs of sexual harassment; List and apply methods for minimizing sexual harassment and resolving complaints; Identify and explain the role of the manager in reducing potential legal liability

Runtime: 61
Slips, Trips and Falls for Construction

At best, slipping and tripping is embarrassing. Often, it leads to strains and sprains. At worst, it causes serious injury or even death. Preventing slips, trips and falls from walking and working surfaces is easy, but often ignored in the daily routine of trying to get work done quickly and efficiently. This course defines slips, trips and falls and details how you can avoid them. Ideal learners are all employees who work construction.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Construction

Topics: Slips, Trips and Falls

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]

Course Objectives:
- Define slips, trips and falls
- Identify slip, trip and fall hazards
- Identify basic requirements for walking and working surfaces
- Explain causes of slips, trips and falls and ways to prevent them
- Describe good housekeeping and proper equipment use
- Identify falling techniques

Runtime: 20

---

Spill Prevention Control and Countermeasure (SPCC) (US)

You have seen media reports about the catastrophic effects an oil spill has on wildlife, the environment, and the livelihood of affected communities. The SPCC regulation was developed to prevent oil releases at facilities from polluting navigable waters of the United States. This course gives employees a general overview of SPCC requirements. Ideal learners are any employee involved in oil handling, transfer, storage, spill response or maintenance of oil equipment.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Environment

Topics: Chemicals, Substances and Hazard Communication

Course Objectives:
- List the general requirements and goals of an SPCC plan
- Identify the potential types and sources of oils and oil products covered by the regulations
- State the steps to take in the event of a spill
- Give examples of what you can do to prevent spills

Runtime: 22
Stacking and Storage Practices for Construction (US)

You can avoid materials handling accidents such as cuts, back injuries, crushed hands and even death by using general safety principles like the ones you will learn about in this course. This course is ideal for everyone who works in the construction industry.

Format: eLearning - Claro

Libraries:
- Safety Catalog
- Construction
- Warehouse Safety

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12060]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
Identify potential hazards of handling and storing materials; Recognize the methods of injury prevention; Recognize techniques to properly move, handle and store materials

Runtime: 12

Stop Signs and Signals - Large Vehicles (US)

The time you save by rolling past a stop sign or blazing past a yellow or red light will never justify the potential harm you might do to yourself and to other motorists. That's the central message of this course. Ideal learners are drivers of large commercial vehicles.

Format: eLearning - Claro

Libraries:
- Safety Catalog
- Driver and Transportation Safety

Content Suite:
- Driver Safety Training - Large Vehicles Suite (IACET CEU=0.1) [BDL-12020]

Course Objectives:
Explain the consequences of failing to obey stoplights and stop signals while driving your truck; Specify how to properly stop at intersections and railroad crossings; List strategies to overcome the impulse to ignore stop signs and signals

Runtime: 11
Stop Signs and Signals - Light Commercial Vehicles (US)

The time you save by rolling past a stop sign or blazing past a yellow or red light will never justify the potential harm you might do to yourself and to other motorists. That is the central message of this course.

Format: eLearning - Claro

Libraries:
- Safety Catalog
- Driver and Transportation Safety

Content Suite:
- Driver Safety Training - Light Commercial Vehicles Suite (IACET CEU=0.1) (BDL-12025)

Course Objectives:
Explain the consequences of failing to obey stop lights and stop signals while driving your light commercial vehicle; Specify how to properly stop at intersections and railroad crossings; List strategies to overcome the impulse to ignore stop signs and signals

Runtime: 12

Stormwater and Erosion Control for Construction

Runoff from rainstorms and snowmelt picks up pollutants like sediment, oil, grease and other chemicals. Contaminated runoff may flow into storm drains or it may flow directly into lakes, rivers and streams. Preventing stormwater contamination ensures clean water for swimming, fishing and drinking. U.S. Federal law requires construction sites to obtain stormwater permits any time an acre or more of land will be disturbed. As part of the permitting process, companies implement stormwater pollution prevention programs, or SWPPPs. This course covers Best Management Practices (BMPs) for stormwater and erosion control. Ideal employees are those in the construction industry.

Format: eLearning - Claro

Libraries: Safety Catalog
- Construction

Content Suite:
- Construction Industry Safety Program (IACET CEU=0.9) (BDL-12133)

Course Objectives:
Identify ways you can help control stormwater and erosion; Know specific techniques for controlling stormwater and erosion in places such as construction entrances and natural areas; Distinguish between sites with effective and ineffective stormwater and erosion control

Runtime: 10
Stormwater Pollution Prevention (US)

Laws require us to regulate stormwater in order to reduce the pollution of rivers and lakes. Identifying sources of stormwater pollution and keeping them from coming in contact with runoff is one of the best and most economical ways of protecting the quality of our waters. This course presents best management practices to prevent stormwater pollution.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Environmental
- Chemicals, Substances and Hazard Communication

Content Suite:
- Environmental Responsibility Suite (IACET CEU=0.3)

Course Objectives:
Define stormwater; Recall how the regulation of stormwater has developed; Identify common sources of stormwater pollution; Recall the effects of stormwater pollution on the environment; Know some best management practices for preventing stormwater pollution; Know how to respond to a spill; Recall the fines and penalties for polluting stormwater; Know the purpose and requirements of a Stormwater Pollution Prevention Plan (SWP3)

Runtime: 24

Struck By, Caught Between - Staying Out of the Line of Fire (US)

According to OSHA, two of the most frequently severe types of construction incidents are being either struck by or caught in or between materials and equipment. This course focuses on the steps workers can take to stay out of the line of fire and avoid being struck by or caught in or between hazards at work, including hazard awareness, prevention and control, with an emphasis on taking personal responsibility for safety. Ideal learners are construction workers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction

Content Suite:
- Advanced Safety Orientation for Construction Industry (IACET CEU=0.9) [BDL-12009]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
State different types of controls to address struck-by and caught-in/caught-between hazards; Describe worker-level controls for a variety of line-of-fire hazards

Runtime: 28
Tasks and Corrective Actions

Tasks and corrective actions give you a chance to put everything you learned during inspections and observations to work so that you can improve safety. Take this course to learn about factors that should influence the corrective actions you choose and best practices you should follow. This course is intended for all industries and construction employees, including managers.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Health and Safety Management, Management Skills

Content Suite:
- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3) (BDL-12117)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- Why Incident Management Matters (WIMM) Suite (PS5-30009)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
Know how to structure effective hazard controls; Identify factors that should influence how you choose and implement corrective actions; Evaluate and prioritize risks; Know how to monitor and follow up about corrective actions

Runtime: 16

Towing Trailers (US)

Trailers towed by motor vehicles provide an efficient, convenient way to carry heavy loads but they present challenges to drivers. To avoid accidents, you should understand exactly how towing a trailer affects the vehicle you are driving and what you can do as a driver to stay safe as you tow your load.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Warehouse Safety, Driver and Transportation Safety

Course Objectives:
Know and understand how towing a trailer affects a vehicle's operation, how to connect a vehicle and trailer, how to conduct pre-trip inspections of the vehicle and trailer, how to load a trailer, tips for driving with a load, how to back with a trailer, and tips for parking with the trailer

Runtime: 17

Transportation of Dangerous Goods (Canada)

The dangers associated with hazardous goods are magnified when people transport them since they are in motion and may be exposed to dangerous conditions. The Canadian government enacted the Transportation of Dangerous Goods (TDG) Act to promote public safety. Everyone who transports hazardous goods needs to know what they are handling, what the dangers are and what to do in case of an emergency. Take this course as an overview to TDG regulations. Ideal learners include anyone who is involved in shipping or receiving dangerous goods.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Chemicals, Substances and Hazard Communication, Driver and Transportation Safety

Course Objectives:
What are dangerous goods?; Regulations; Identification; Responsibilities; Requirements; Accidental release

Runtime: 18
Tree Trimming Safety (US)

Tree trimming operations require climbing, pruning and felling trees. Hand and portable power tools such as loppers, trimmers and chainsaws make the necessary cuts. Aerial lifts and chippers bring workers to the right height and clean up the worksite. All of these activities have the potential to be extremely hazardous. This course covers safety precautions for tree trimming. Ideal learners are employees who participate in tree trimming operations.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing

Course Objectives:
State the common hazards of tree trimming; Describe what you can do to avoid these hazards

Runtime: 25

Trending and Analysis

You cannot continuously improve unless you constantly evaluate your performance. The best way to improve safety is to follow through on your plans and then analyze the results to see if there is room for improvement. Take this course to learn about the data you should analyze, what it can tell you and how you can follow up. Ideal learners are managers, supervisors and safety committee members.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: Health and Safety Management, Management Skills

Content Suite:
- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3) (BDL-12117)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- Why Incident Management Matters (WIMM) Suite [PS5-30009]

Course Objectives:
Recognize the importance of measuring the effectiveness of incident management systems; Define lagging and leading indicators; Recall best practices for following up on corrective actions

Runtime: 13

Tugger and Tow Tractor Safety, Part 1: Readiness

Preparing tugger and tow tractor operators, areas and equipment can prevent incidents. Take this course to learn about the unique features of tuggers and tow tractors and how to safely prepare for operation. This course is ideal for people who use tuggers or tow tractors and their supervisors. This course will help lay the groundwork for the mandatory in-person training you will receive about your specific equipment and work area.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry: General Safety and Manufacturing, Warehouse Safety

Content Suite:
- Tugger and Tow Tractor Safety, Parts 1-2 (PS5-30116)

Course Objectives:
Distinguish tuggers and tow tractors from other types of powered industrial trucks; Know how to prepare tugger and tow tractor operators, environments and equipment for safe operation

Runtime: 9
Tugger and Tow Tractor Safety, Part 2: Operation

Do you know how to safely operate tuggers and tow tractors? Take this course to learn about some basic practices you should follow to prevent incidents during and after operation. This course is ideal for people who use tuggers or tow tractors and their supervisors. This course will help lay the groundwork for the mandatory in-person training you will receive about your specific equipment and work area.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Warehouse Safety

Content Suite:
- Tugger and Tow Tractor Safety, Parts 1-2 [PS5-30116]

Course Objectives:
Recall safe practices for operating tuggers and tow tractors while riding and walking; Know how to safely stop, park and store tuggers and tow tractors

Runtime: 8

Using Electrical Safety Programs (US)

Electricity can kill. That is why NFPA 70E was created. It requires employers to develop and implement an electrical safety program. This course explains basic electrical safety practices that apply to electrical work. These practices include wearing personal protective equipment and completing arc-flash hazard analyses. Ideal learners include people in all industries, particularly supervisors, electrical maintenance and installation workers, and safety managers.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Electrical and LOTO

Content Suite:
- NFPA 70E Suite (IACET CEU=0.1) [BDL-12129]

Course Objectives:
Explain the purpose of electrical safety programs; Recognize the elements of an electrical safety program; Recall how to complete an arc-flash hazard analysis; Distinguish between arc-flash, limited and restricted approach boundaries; Identify appropriate personal protective equipment for electrical hazards

Runtime: 23
Using Eyewashes and Emergency Showers

This awareness-level course provides anyone who may need to use an eyewash or emergency shower with important information including how to spot neglect, resolve potential problems and use eyewashes and emergency showers safely and effectively. Ideal learners are any employees who may be exposed to chemicals.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- First Aid, Health and Wellness
- Chemicals, Substances and Hazard Communication

Content Suite:
- HAZWOPER 8-Hr Supplemental Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.3) [BDL-12112]
- HAZWOPER 8-Hr Refresher Training 29 CFR 1910.120/29 CFR 1926.65 (IACET CEU=0.8) [BDL-12111]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
- Identify why it's important to have quick and easy access to eyewashes and emergency showers;
- Recognize eyewash and emergency shower neglect;
- Identify how to correct common eyewash and emergency shower problems;
- Explain how to safely use eyewashes and emergency showers.

Runtime: 15

Vector-Borne Disease Awareness: Mosquitoes, Ticks and Other Pests

Mosquitoes, ticks and other pests are more than just an annoyance. They can carry serious diseases. Take this course to learn what environments they prefer and what you can do to protect yourself and others from them. This course is ideal for everyone, but especially people who work outdoors.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Wind Turbine
- Warehouse Safety
- First Aid, Health and Wellness

Content Suite:
- Working from Home Suite [BDL-12127]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12107]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]
- OSHA 10: Construction Industry Outreach Training Course (IACET CEU=1.0) [BDL-12060]

Course Objectives:
- Know what vector-borne diseases are and which pests may carry them;
- Identify environmental factors that can harbor pests;
- Recall ways to make the environment less hospitable to pests;
- Know which personal factors can reduce the risk of exposure to pests;
- Know why it is important to report bites and symptoms of vector-borne illnesses.

Runtime: 15
Vehicle Inspections

No one wants to deal with a flat tire, overheated engine or some other maintenance problem that could cause delays or accidents. That is why it is essential to maintain your vehicle and perform inspections so that you can identify and address issues. Take this course to learn when, where and how to inspect your vehicle. This course is ideal for anyone who drives a non-commercial vehicle to, from or for work.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Working from Home/Remote
- Driver and Transportation Safety

Course Objectives:
Know why vehicle inspections are important; Know when, where and how to inspect light-duty vehicles; Be able to recognize issues to address during an inspection

Runtime: 14

Walking/Working Surfaces

Slips, trips and falls remain one of the most common causes of employee injury in the workplace. Understanding the actions you can take to prevent these incidents will help keep you and your co-workers safe and productive. This course provides a clear understanding of general guidelines for staying safe on walking and working surfaces. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Working from Home/Remote
- Warehouse Safety
- Slips, Trips and Falls
- Ergonomics and Office Safety

Content Suite:
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) [BDL-12010]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- OSHA 10: General Industry Outreach Training Course (High-Tech/Semiconductor) (IACET CEU=1.0) [BDL-12102]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Know how housekeeping helps keep walking and working surfaces safe; Recall general safety recommendations for floors, passageways, ladders, step bolts, stairways and steps, scaffolds, dockboards and ramps

Runtime: 15
Warehouse Safety

You do not think of warehouses as dangerous places, but materials, equipment and vehicles can be harmful if you do not practice safe work procedures, monitor your surroundings and correct unsafe conditions. This training will help you create a safe warehouse environment. Ideal learners are employees and supervisors who work in or visit warehouses.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Theme/Industry:
- General Safety and Manufacturing
- Warehouse Safety
- Ergonomics and Office Safety

Course Objectives:
- Identify safe material handling and storage procedures
- Recall safe lifting techniques
- Understand how to work safely around loading docks and conveyors
- Recognize correct vehicle and equipment use protocols
- Name emergency prevention and preparation steps
- List routines for maintaining a safe warehouse

Runtime: 37

Warehouse Safety Awareness

You do not think of warehouses as dangerous places, but materials, equipment and vehicles can be harmful if you do not practice safe work procedures, monitor your surroundings and correct unsafe conditions. This training will help you create a safe warehouse environment. Ideal learners are employees and supervisors who work in or visit warehouses.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Theme/Industry:
- General Safety and Manufacturing
- Warehouse Safety
- Ergonomics and Office Safety
- Awareness and Microlearning

Course Objectives:
- Identify safe material handling and storage procedures
- Recall safe lifting techniques
- Understand how to work safely around loading docks and conveyors
- Recognize correct vehicle and equipment use protocols
- Name emergency prevention and preparation steps
- List routines for maintaining a safe warehouse

Runtime: 13
Welding, Cutting and Brazing

Welding, cutting, brazing and other hot work are common, and inherently dangerous, activities on many job sites. Care must be taken to ensure that work is performed safely. This course introduces common hazards associated with welding, cutting and brazing and ways to prevent injury and damage. Ideal learners are workers who perform welding, cutting and brazing.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Wind Turbine
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress

Course Objectives:
- Describe the roles of personnel involved in welding, cutting, brazing and other hot work operations;
- Recognize how the hot work permit system ensures that all hazards are identified, communicated and controlled;
- Identify fire prevention techniques used during welding, cutting and brazing;
- Understand hazards associated with oxyacetylene and arc welding and methods to mitigate risks;
- Recall the proper storage, handling, transportation and use of compressed gas cylinders;
- Be aware of the chemical and physical agents produced in welding operations;
- Identify personal protective equipment (PPE) to be worn.

Runtime: 38

Languages Available:
- English
- Portuguese (Brazil) (PS5-102010)
- Spanish (Latin America) (PS5-01027)

Welding, Cutting and Brazing Awareness

Workers must take steps to prevent injury and damage when welding, cutting and brazing. The risk from fatal injuries alone is more than four deaths per thousand workers over a working lifetime. Therefore, care must be taken to ensure that work is performed safely. This course introduces common hazards associated with welding, cutting, and brazing and ways to prevent injury and damage. Ideal learners are employees who perform hot work.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress
- Awareness and Microlearning

Course Objectives:
- Identify fire prevention techniques used during welding, cutting and brazing;
- Recognize hazards associated with oxyacetylene and arc welding and methods to prevent these hazards;
- Recall the proper handling, transportation, use and storage of compressed gas cylinders;
- Identify personal protective equipment (PPE) to be worn when performing hot work operations.

Runtime: 10

Languages Available:
- English
Welding, Cutting and Brazing for Construction: Health Concerns

It is not surprising that welding, cutting, brazing and other hot work can cause fires, burns or explosions. But did you know that hot work also has health hazards associated with welding fumes and light exposure? Take this course to find out about chemical, radiation and light hazards and how to control them. Ideal learners are workers who perform welding, cutting and brazing in construction settings.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Content Suite:
- Welding, Cutting and Brazing for Construction, Parts 1-3 (PS5-30109)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
Recognize the hazards in welding fumes that may be present during hot work;Recall ways to control hazards including ventilation, personal protective equipment and body protection;Know what radiation and light hazards are for hot work

Runtime: 12

Welding, Cutting and Brazing for Construction: Methods

Different types of welding, cutting and brazing methods have different safety considerations. Take this course to learn about these considerations. Ideal learners are workers who perform welding, cutting and brazing in construction settings.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Content Suite:
- Welding, Cutting and Brazing for Construction, Parts 1-3 (PS5-30109)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
Recall dangers and safe practices when working with oxyacetylene torches;Know how to work with welding gas cylinders safely;Recall the hazards of arc welding and safe practices to use;Know what basic personal protective equipment to wear for hot work

Runtime: 10
Welding, Cutting and Brazing for Construction: Safety Concerns

Welding, cutting, brazing and other hot work can cause fires and injure workers. Take this course to learn about welder safety and fire prevention. Ideal learners are workers who perform welding, cutting and brazing in construction settings.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Construction
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress

Content Suite:
- Welding, Cutting and Brazing for Construction, Parts 1-3 [PS5-30109]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) [BDL-12062]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) [BDL-12109]

Course Objectives:
Know how to inspect and prepare the hot work area; Know how to prepare for potential fires; Remember safety precautions to take before welding or cutting containers

Runtime: 8

Welding, Cutting and Brazing: Health Concerns

It is not surprising that welding, cutting, brazing and other hot work can cause fires, burns or explosions. But did you know that hot work also has health hazards associated with welding fumes and light exposure? Take this course to find out about chemical, radiation and light hazards and how to control them. Ideal learners are workers who perform welding, cutting and brazing.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress
- Chemicals, Substances and Hazard Communication

Content Suite:
- Welding, Cutting and Brazing, Parts 1-3 [PS5-30064]

Course Objectives:
Recognize the hazards in welding fumes that may be present during hot work; Recall ways to control hazards including ventilation, personal protective equipment and body protection; Know what radiation and light hazards are for hot work

Runtime: 12
Welding, Cutting and Brazing: Methods

Different types of welding, cutting and brazing methods have different safety considerations. Take this course to learn about these considerations. Ideal learners are workers who perform welding, cutting and brazing.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress

Content Suite:
- Welding, Cutting and Brazing, Parts 1-3 [PS5-30064]

Course Objectives:
Recall the dangers and safe practices when working with oxyacetylene torches; Know how to work with welding gas cylinders safely; Recall the hazards of arc welding and safe practices to use; Know what basic personal protective equipment to wear for hot work

Runtime: 10

Welding, Cutting and Brazing: Safety Concerns

Welding, cutting, brazing and other hot work can cause fires and injure welders. Take this course to learn about welder safety and fire prevention. Ideal learners are workers who perform welding, cutting and brazing.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Hot Work, Fire Watch and Welding
- Fire Extinguisher, Prevention and Egress

Content Suite:
- Welding, Cutting and Brazing, Parts 1-3 [PS5-30064]

Course Objectives:
Know how to inspect and prepare the hot work area; Know how to prepare for potential fires; Remember safety precautions to take before welding or cutting containers

Runtime: 6
What If? Mentality

You do not have to be psychic to predict how things may go wrong. Take this course to find out how to adopt a WHAT IF? mentality that will help you avoid near-misses and serious incidents. Ideal learners include managers, supervisors and safety committee members.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Health and Safety Management
- Management Skills

Content Suite:
- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3) (BDL-12117)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- Why Incident Management Matters (WIMM) Suite [PS5-30009]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Course Objectives:
Understand what “What If?” mentality means; Recall the benefits of utilizing a “What If?” mentality; Apply a “What If?” mentality to different scenes and situations

Runtime: 7

Why Incident Management Matters Introduction

Find out how our incident management suite can help YOU make your workplace safer for EVERYONE.

Format: eLearning - Claro

Libraries: Safety Catalog

Topic/Industry:
- Health and Safety Management
- Management Skills

Content Suite:
- Why Incident Management Matters (WIMM) Suite (IACET CEU=0.3) (BDL-12117)
- Advanced Safety Orientation for Managers and Supervisors in Construction (IACET CEU=2.7) (BDL-12010)
- Why Incident Management Matters (WIMM) Suite [PS5-30009]
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (BDL-12062)
- OSHA 30: Construction Outreach Training Course (IACET CEU=3.0) (Actively Proctored) (BDL-12109)

Runtime: 2
Work Zone Safety, Part 1: Preparation (US)

Making work zones safe for workers and motorists requires careful planning and inspection. Take this course to learn about the common traffic control standards and plans we use in the United States. You will also learn about the five sections of every work zone and how to inspect them. This course is ideal for construction workers in the United States.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Construction
- Driver and Transportation Safety

Content Suite:
- Work Zone Safety, Parts 1-2 [PS5-30118]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
Know what is included in traffic control standards and plans; Identify the five areas in every work zone; Know when and how to inspect the work zone

Runtime: 8

Work Zone Safety, Part 2: Operations (US)

Keeping everyone safe in work zones requires tools, practices and people. Take this course to learn about types of traffic control devices, safe practices you should follow, and requirements for flaggers. This course is ideal for construction workers in the United States.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Construction
- Driver and Transportation Safety

Content Suite:
- Work Zone Safety, Parts 1-2 [PS5-30118]
- Construction Industry Safety Program (IACET CEU=0.9) [BDL-12133]

Course Objectives:
Recall the standards for the use of various traffic control devices (TCDs); Recall general safe practices to use in work zones; Recall safety precautions to take in work zones at night; Recall flagger requirements and best practices

Runtime: 14

The Workplace Hazardous Materials Information System (WHMIS) makes chemical information uniformly available to all Canadian workers. This course explains how WHMIS works, who is responsible for various tasks under WHMIS, and how everyone can take full advantage of the hazardous material information available to them. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Content Suite:
- Workplace Hazardous Materials Information System (WHMIS), Parts 1-2 (PS5-30012)
- Workplace Hazardous Materials Information System (WHMIS), Parts 1-2 (IACET CEU=0.1) (BDL-30012)

Course Objectives:
Recall how WHMIS works; Specify your rights and responsibilities under WHMIS; Identify the responsibilities of suppliers and employers under WHMIS

Runtime: 20

The Workplace Hazardous Materials Information System (WHMIS) makes hazardous material information uniformly available to all Canadian workers. Given the amount of information and number of parties involved, this can be a complex undertaking. This course explains how WHMIS works, how the Globally Harmonized System of Classification and Labelling (GHS) is aligned with WHMIS, who is responsible for various tasks under WHMIS, and how everyone can take full advantage of the hazardous material information available to them. This course covers the most recent WHMIS 2015 regulations. Ideal learners are all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- General Safety and Manufacturing
- Chemicals, Substances and Hazard Communication

Content Suite:
- Workplace Hazardous Materials Information System (WHMIS), Parts 1-2 (PS5-30012)
- Workplace Hazardous Materials Information System (WHMIS), Parts 1-2 (IACET CEU=0.1) (BDL-30012)

Course Objectives:
Describe how WHMIS works; Recall how the Globally Harmonized System of Labelling and Classification of Chemicals (GHS) aligns with WHMIS

Runtime: 18
Workplace Safety Awareness

This employee safety program is much more than an examination of set rules. It is a common sense approach to training employees in order to prevent injuries and illness. Ideal learners are new employees.

**Format**: eLearning - Claro

**Libraries**: Safety Catalog

**Topic/Industry**: General Safety and Manufacturing, Warehouse Safety, Ergonomics and Office Safety, Awareness and Microlearning

**Course Objectives**: Realize the importance of safety in your daily responsibilities; Recall basic information about hazardous materials and equipment operation; Report safety incidents

**Runtime**: 7

Workplace Violence Prevention

You or someone you know could be involved in workplace violence anytime, anywhere. This course will give you a basic understanding of what constitutes workplace violence, the warning signs to watch for, and what you and others around you can do to prevent it. Ideal learners include all employees.

**Format**: eLearning - Claro

**Libraries**: Safety Catalog

**Topic/Industry**: Employment Liability, Health and Safety Management, Ergonomics and Office Safety, Workplace Violence and Harassment

**Content Suite**: General Industry Safety Program (IACET CEU=1.1) [BDL-12132]

**Course Objectives**: Identify the various types of workplace violence; Recognize risk factors and warning signs; Explain the roles of various groups of people in workplace violence prevention; Identify components of workplace violence prevention programs

**Runtime**: 45
Workplace Violence Prevention Awareness

You or someone you know could be involved in workplace violence anytime, anywhere. Take this course to learn about the warning signs, how to react to active shooters, and ways you can help prevent violent incidents. Ideal learners include all employees.

Format: eLearning - Claro

Libraries:
- Safety Catalog

Topic/Industry:
- Employment Liability
- Health and Safety Management
- Awareness and Microlearning
- Workplace Violence and Harassment

Content Suite:
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) [BDL-12061]
- OSHA 10: General Industry Outreach Training Course (IACET CEU=1.0) (Actively Proctored) [BDL-12108]
- Advanced Safety Orientation for General Industry (IACET CEU=0.9) [BDL-12074]

Course Objectives:
Define workplace violence; Identify workplace violence risk factors and warning signs; Know how to react to an active shooter situation; Recall ways to identify and address workplace security risks; Know how to help prevent workplace violence

Runtime: 14
About UL Solutions EHS Learning Solutions

Since 1999, UL Solutions EHS Learning Solutions has been the industry’s leading provider of comprehensive workforce health and safety solutions, providing innovative software and services that protect the well-being of workers, ensuring organizational compliance and peace of mind, and driving measurable business improvement. We are an authorized OSHA Outreach Provider offering OSHA 10 General Industry and Construction (English and Spanish) and OSHA 30 Construction (English). UL Solutions is a premier global independent safety science company that has championed progress for 120 years. More than 12,000 professionals are guided by the UL Solutions mission to promote safe, secure and sustainable living and working environments.
