

Comprehensive Certification Services for Products and Materials that Contact Drinking Water

Certification to Demonstrate Compliance with Plumbing Codes

Products that contact the drinking water supply need to demonstrate conformity to applicable codes and standards. The UL Solutions ANSI-accredited global water product certification program, combined with our safety services for electrical, fire, gas, security and appliance standards, provide the widest range of health-effects and performance testing certification services to the following standards and product categories:

- NSF/ANSI/CAN 61 — Drinking Water System Components — Health Effects
- NSF/ANSI/CAN 372 — Drinking Water Systems Components — Lead Content

These standards include six product categories:

- Barrier materials
- Joining and sealing materials
- Mechanical devices
- Mechanical plumbing devices
- Pipes and related products
- Process media

Low-lead certification services

UL Solutions helps you demonstrate compliance to the new low lead law for manufacturers of products and materials covered by the scope of NSF Standard 61. We can also help you with products that contact drinking water but are excluded from NSF Standard 61.

Safety. Science. Transformation.™

Fully Accredited Program gives you a choice and a voice

UL certifications are recognized and accepted by authorities having jurisdiction across the United States, and our experts actively participate at national water product standard committees, trade shows, and industry technical task and joint committee groups.

Why UL Solutions?

UL Solutions customers have direct access to our dedicated team of toxicologists, engineers, chemists and sanitarians specializing in water product certification. We have the knowledge and experience to certify your products thoroughly and accurately.

Our dedicated team of regulatory experts supports the needs of the regulatory community.

Our council of experts in environmental and public health regulation — as well as academia from around the world — support and oversee our water product certification work.

UL Solutions has testing capabilities around the world, making it simple, easy and cost effective to certify products from any international location.

We offer a unique marketing advantage afforded by the high level of recognition of the UL Mark by U.S. consumers and demand drivers in the supply chain. The UL Mark appears on more than 20 billion products in the marketplace and on an average of 125 products in the typical home.

With UL Solutions, you can reduce costs by combining water certification with other services.

UL Solutions eases the transfer of your existing certifications from other certification bodies.
