

DRINKING WATER PRODUCT CERTIFICATION

Delivering Value to the Water Treatment Chemical Industry

When choosing a certifier for drinking water treatment chemicals, make UL Solutions your service provider of choice for technical expertise and customer service that come only from a global leader in product certification.

The UL Solutions water products certification program: Expertise you can trust

You want confidence that your product certification is handled accurately and efficiently. With UL Solutions, you have access to:

- A dedicated team of toxicologists, engineers and chemists specializing in water product certification and who have the knowledge and experience to evaluate your product thoroughly and accurately
- Water product team members who actively participate in numerous national water product standard committees and industry technical task groups to make sure they understand the requirements that apply to your products
- A national team of experts to support you in meeting the needs of the regulatory community
- A council of experts in environmental and public health representing local, state and federal governments, as well as academic institutions around the world that support and provide oversight for UL Solutions water programs

UL Solutions expertise, breadth and track record help keep your business informed and prepared.

NSF/ANSI/CAN Standard 60 certification

UL Solutions provides the expertise and quality services you need to meet the requirements in NSF/ANSI/CAN Standard 60. Our comprehensive compliance services cover the following product categories:

- Coagulation and flocculation
- Corrosion and scale control
- Disinfection and oxidation
- pH adjustment
- Precipitation
- Sequestering
- Softening

The UL Solutions certification program to NSF/ANSI/CAN Standard 60 incorporates the use of NSF/ANSI/CAN Standard 223 for the surveillance of NSF/ANSI/CAN 60 certifications.

Complete resource for your certification needs

- Easy, step-by-step process utilizing existing water treatment chemical test results and product data
- Comprehensive surveillance (Follow-Up Services) program supported by a global network of technical professionals to assess ongoing product compliance, giving you confidence that your products continue to meet the requirements established by your customers
- Information about your certified products in virtual, searchable certification directories make it easy for buyers and specifiers to identify compliance and source your products

Return on your certification investment

- Ongoing compliance assessments create a level playing field to ensure that only those who have earned the UL Mark benefit from using it.
- Globally respected program to prevent counterfeiting of the UL Mark built on long-term relationships with U.S. Immigration and Customs Enforcement and the Royal Canadian Mounted Police

Why UL Solutions?

UL Solutions offers a single resource for all product certifications and follow-up surveillance requirements.

- UL Solutions customers have direct access to our dedicated team of toxicologists, engineers, chemists and sanitarians specializing in water product certification. We have the knowledge and experience to certify your products thoroughly and accurately.
- Our dedicated team of regulatory experts supports the needs of the regulatory community.
- Our council of experts in environmental and public health regulation — as well as academia from around the world — support and oversee our water product certification work.
- UL Solutions has testing capabilities around the world, making it simple, easy and cost effective to certify products from any international location.
- We offer a unique marketing advantage afforded by the high level of recognition of the UL Mark by U.S. consumers and demand drivers in the supply chain. The UL Mark appears on billions of marketplace items and on more than 100 products in the typical home.
- With UL Solutions, you can reduce costs by combining water certification with other services.
- UL Solutions eases the transfer of your existing certifications from other certification bodies.
