

We give you what you need to get compliance right

- ✓ Wire and Cable Materials Data Management and Assessment software

You only get one chance to get it right

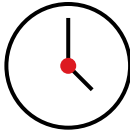

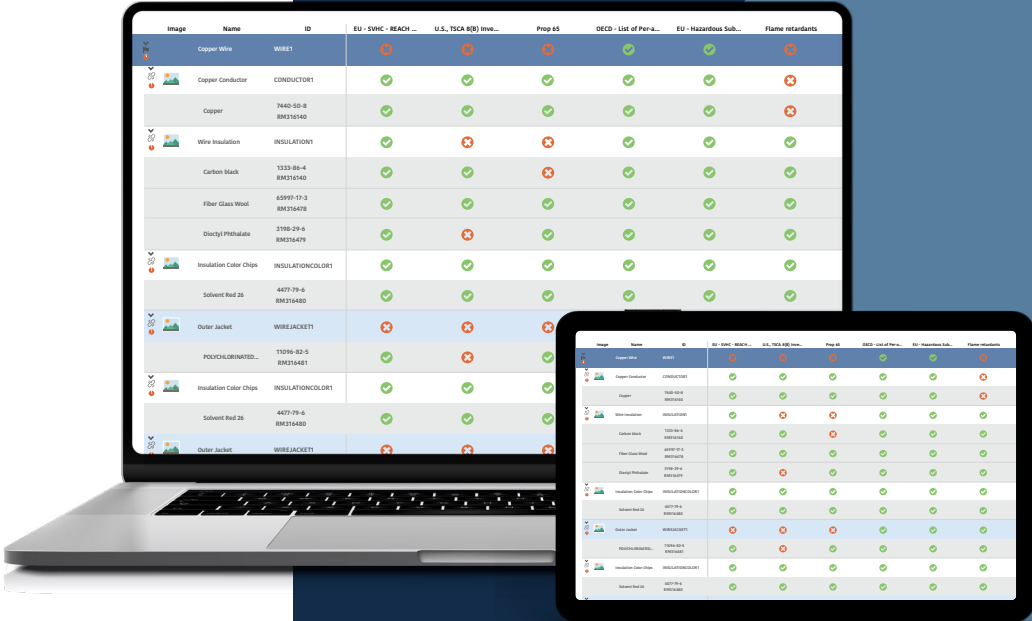

For wire and cable manufacturers, increased visibility into your product portfolio is crucial to your efforts to protect yourself and your customers against non-compliance. You need to consider the risks – to your finances, your reputation, and to consumers' health and the environment – at every step in production and use.

Fundamental to your success is an efficient, effective and reliable way to stay current with dynamic regulations and secure the accurate data you need.

Wire and Cable Materials Data Management and Assessment software

It's a software platform to help you quickly and accurately collect material data and assess it against regulations to provide you with the insights you need to determine how to best comply, protecting your reputation while saving you valuable time and resources.

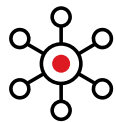

Key learning: Through conversations with compliance professionals, we've learned that many of them spend upward of 20% of their time tracking down materials and chemical data from suppliers.

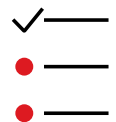

Because compliance has so much riding on it

Wire and Cable Materials Data Management and Assessment software from UL Solutions combines powerful software with global regulatory expertise to help solve your daily compliance challenges.

Providing a digital system to collect, organize and securely manage bills of materials (BoM) data from suppliers while protecting confidential business information

Assessing all materials in your wires and cables against industry-relevant regulations and standards, and customer requirements

Seamlessly securing critical data from your suppliers to provide crucial visibility into your product portfolio

Our experts around the globe constantly monitor changes to regulations and incorporate updates into the assessment software, providing the insights needed to determine how to best comply

Creating necessary reports and documentation required for the sale and shipment of wire and cable products and components

Mitigating business risks and potential damage to your brand, as well as meet customer requirements

A flexible business solution

Our regulatory experts around the globe are constantly monitoring changes in the dynamic regulatory environment so you don't have to. We then assess that data to provide the insights you need to determine how best to comply.

With the basic wire and cable offering, your materials will be assessed against these nine regulations, standards and substances of concern. Additional regulations and standards can be reviewed with our premium offerings.

- RoHS
- REACH
- Flame retardants
- WEEE
- TSCA
- PFAS
- Prop 65
- IEC
- Phthalates

Why UL Solutions?
