

# UL Solutions Hydrogen Ready/ Compatible Marketing Claim Verification

The UL Marketing Claim Verification for Hydrogen (H<sub>2</sub>) program is a first-of-its-kind offering to help establish the accuracy of claims about a gas appliance's performance when used with a natural gas fuel containing a percentage of hydrogen admixture, delivered through a trusted third party. The H<sub>2</sub> ready to XX% blend and H<sub>2</sub> compatible to XX% blend marketing claim program delivers objective verification of a customer's claim about the performance of their product, demonstrating a commitment to global decarbonization.

This offer is unique, as UL Solutions is the first trusted global TIC organization to verify the H<sub>2</sub> ready and H<sub>2</sub> compatible performance claims of natural gas appliance manufacturers. For more information, please visit <https://verify.ul.com>.

The first independent H<sub>2</sub> assessment designed to help support the commercialization of trustworthy H<sub>2</sub> blended products.

## ① H<sub>2</sub> Ready Claim

Blend percentage/composition volume fraction H<sub>2</sub> and natural gas (methane) to be specified by manufacturer for verification.

Appliance/component is verified to perform as specified by the manufacturer with up to XX% H<sub>2</sub> fuel source.

H<sub>2</sub> appliance or component may run with hydrogen as an acceptable fuel source with the addition of a conversion kit.

## ② H<sub>2</sub> Compatible Claim

Blend percentage/composition volume fraction H<sub>2</sub> and natural gas (methane) to be specified by manufacturer for verification.

Appliance/component is verified to perform as specified by the manufacturer with up to XX % H<sub>2</sub> fuel source.

H<sub>2</sub> appliance or component may run with hydrogen as an acceptable fuel source without the need of a conversion kit.

## ③ Unique Identifier

Empowers users to look up more information about your specific claim on the UL Verify site [Verify.UL.com](https://verify.ul.com).

## ④ Basic Verification Mark

Indicates the claim has been assessed and verified by UL Solutions.

## Benefits of H2 Verified Mark

Independent third-party verification

Enhances credibility of performance claims

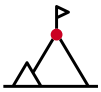

Provides claim trustworthiness

Product differentiation

Additive to UL certification

Leverages UL Solutions brand

Report and notice of authorization

Searchable record on Verify.UL.com

Verified Mark graphic file

Demonstrates company commitment to delivering on their marketing claim

Mark communicates clearly to the consumer that the AI in the product has been verified
