Comprehensive scope 3 reporting software

Scope 3 emissions will soon be part of the regulatory landscape — make sure you're ready with comprehensive scope 3 management and reporting software from UL Solutions.

Overcome your scope 3 challenges

While companies are getting better at reporting their scope 1 and scope 2 emissions, reporting on scope 3 emissions remains difficult. Engaging your value chain can be complicated, time-consuming and costly. With the right tools, however, your company can start to understand the full impact of your operations.

Our scope 3 reporting software provides companies with a straightforward process for identifying, measuring and reporting scope 3 emissions. From pre-built templates to tailored value chain solutions, you can take your scope 3 commitments to the next level.

For companies seeking transparent and accurate scope 3 reporting software

Scope 3 reporting software from UL Solutions provides consistent reporting from across the value chain. The time is now: discover our scope 3 reporting software today.

Quick start — Add scope 3 content packs to your existing UL 360 software

Key benefit: Quick start content packs set you up for quick, complete and transparent assurance grade scope 3 reporting. Perfect for companies that are just starting out, looking to build credibility or wanting a high-level view for communications.

- Covers the most common scope 3 categories with over 3,500 indicators.
- Collect the underlying data you need with data entry forms and import capabilities. Optional automation capabilities are available.
- Track and analyze performance with pre-built dashboards.
- Easily communicate progress across your organization with preconfigured Word, Excel and PDF reports, automated data export tools and API protocols.

UL **Solutions**

Purchased goods and services module — for in-depth category 1 and category 2 measurement

Key benefit: Gain in-depth insight into your value chain for data-driven decarbonization decisions.

- Default emission factors for categories 1 and 2, including the Environmentally Extended Input-Output (EEIO).
- Increase transparency over time by focusing on the most material categories. This module covers spend, material, actual and hybrid calculation methods.
- Dynamic charts for communications, analysis and decision-making on decarbonization pathways.

Logistics module — default emission factors for scope 3 categories 4 and 9

Key benefit: Detailed carbon calculations, modeling and decision-making. Captures upstream and downstream data at a granular level for each shipment/transfer.

- Configuration available (e.g., tailoring freighting categories to DEFRA Freighting Goods emission factors).
- Delegate data entry, review and reporting and involve the right stakeholders.
- Reporting options allow users to track granular performance, data quality and completeness throughout the organization.
- Dynamic charts for communications, analysis and decision-making on decarbonization pathways.

Supply chain module — continuous live management for companies that really want to drive value chain performance.

Key benefit: Allows you to directly engage your suppliers to set KPIs and coach them on how to reduce their emissions. While other programs obtain supplier data either manually or at a point in time, our software allows for continuous live management.

- Onboard your suppliers in one system.
- Set knock-out criteria or gate-way flags during onboarding.
- Continuously collect primary emissions data.
- Send supplier surveys and generate scorecards against your own criteria.
- Supplier profile and communication tracking.
- Easily manage and share documents.
- Generate reports for transparency.

Why comprehensive scope 3 reporting software from UL Solutions?

We designed our software to make it easy for you to meet stakeholder demands for more transparency with accurate, reliable and relevant data. Our team has over 20 years of carbon measurement expertise and includes dedicated, in-house content management to maintain the most common emission factor libraries, frameworks and regulatory requirements. You have our commitment to keep the libraries up to date.

Whatever your scope 3 reporting needs, we have a solution for you. To learn more, contact ul360@ul.com or visit UL.com/scope3software
