

Green building testing and inspection services

Not only do certified buildings make good economic sense to owners and investors, but they also show positive commitment to a healthy, vibrant community. Companies and businesses benefit from using an experienced third party to verify the achievement of the rigorous health and wellbeing criteria of the WELL, LEED and Fitwel certifications. Receiving one of these certifications publicly demonstrates your adherence to optimal building performance standards.

As a Performance Testing Agent Organization, UL Solutions provides on-site testing to demonstrate building performance for:

WELL Testing, including:

- Performance Verification for V2 and V2 Pilot projects by a WELL Performance Testing Agent
- Performance Rating Verification by a WELL
 Performance Testing Agent
- Performance assessments for the WELL Health
 Safety Rating

· Fitwel Testing, including:

- Indoor Air Quality Testing
- Water Quality Testing
- Water Management Program and Testing
- Enhanced Indoor Air Quality Testing and Monitoring Protocol for Viral Response Module

· LEED Testing, including:

- Indoor Air Quality Assessment (V3, V4 and V4.1)
 Testing for New Construction (NC) and
 Commercial Interiors (CI)
- Indoor Environmental Quality Performance for LEED O+M V4.1
- Minimum Indoor Air Quality (ventilation) prerequisites for LEED O+M V4 and V4.1
- Waste Performance LEED O+M V4.1
- Green Cleaning Custodial Effectiveness
 Assessment LEED O+M V4

Keep your real estate properties productive and profitable with guidance from the leaders in global safety science and our WELL, Fitwel and LEED testing team.
