

# Call for Proposals & Agenda Topics

## ANSI/UL 985 Ed. 6, Standard for Safety for Household Fire Warning System Units

Are there requirements that should be updated in UL 985 Ed. 6, Standard for Safety for Household Fire Warning System Units, or are there new technologies and applications that should be addressed through changes to the Standard?

We are asking for your proposals and/or feedback regarding this Standard. While we accept proposals at any time, we will periodically contact stakeholders to solicit proposals and input related to the content in individual standards.

We encourage you to submit formal proposals to revise the appropriate requirements. For your convenience, we have provided video tutorials with regard to [submitting proposals to UL Standards](#), and [accessing UL standards](#).

If you are aware of changes that need to be addressed by the Standards Technical Panel, STP 205C, but aren't prepared to submit a proposal, please contact the STP Chair, Diane Haithcock.

We appreciate your continual participation in the process to maintain UL 985 Ed.6 as an effective safety Standard. STP members and Standard subscribers can submit fully developed proposals and rationales through our [online Collaborative Standards Development System \(CSDS\)](#) by **July 30, 2021**.

Please do not hesitate to contact us if you have any questions regarding this request for proposals, our Collaborative Standards Development System (CSDS), or any aspect of the UL Standards Development Process.
